# PRATHIGA THIYAGARAJAN

**Full stack Developer**

thiyagaprathiga@gmail.com | (720)-496-9055|Dallas, Texas

## Experience

**Sage IT, US**

*Full stack Developer* ***|June 2023- Present***

- Designed and implemented **Java-based microservices** using **Spring Boot** with **RESTful APIs**, integrating **MySQL, PostgreSQL, and MongoDB** databases to improve API reliability and performance.
- Integrated **Docker and Kubernetes** for containerized deployments, reducing application downtime by **40%** during updates.
- Pioneered user friendly web application by integrating **Angular framework and Material UI** components, creating a modern interface and leading to a **40%** improvement in average task completion time.
- Built **CI/CD pipelines using Jenkins,** leading to a **50%** reduction in deployment time and enhancing the efficiency of continuous integration and continuous delivery processes.
- Leveraged **GitHub Copilot** and **Microsoft Copilot** to accelerate development workflows and improve code quality through AI-assisted programming.
- Utilized **Hugging Face** transformers for NLP tasks and integrated multiple LLM tools to automate complex multi-step business processes.
- Deployed and managed applications on **Azure**, leveraging **Azure OpenAI Service (GPT models), Document Intelligence, and Azure AI Services** for intelligent document processing and natural language capabilities, **achieving 90% accuracy in data extraction.**

**Dish Network, US**

*Software Developer* ***|June 2022- Dec 2022***

- Developed and maintained scalable Full-stack applications using **python and React with TypeScript**, resulting in a **30%** improvement in user engagement across platforms through seamless user experience.
- Utilized **PySpark for data processing** tasks to handle large datasets efficiently, optimizing data transformations and aggregation operations, which resulted in a **20%** reduction in processing times.
- Implemented **data pipelines and machine learning models in Databricks**, enhancing model performance and scalability, and providing actionable insights from complex data sources.
- Leveraged **Node.js and Express.js** to develop efficient **Web APIs**, improving client-server integration performance and reducing latency.
- Optimized application performance through profiling and performance tuning, and enhanced user experience by implementing visually appealing **CSS, HTML and JavaScript**.
- Managed application deployment and infrastructure using **AWS services (EC2, S3, RDS, Lambda)** shortened launch time by **45%** and enhanced system reliability.

**Lakee e shopping, India** ***|Aug 2020- July 2021***

*Java Developer*

- Utilized **Spring framework (Spring Boot and Hibernate)** for efficient application development, leveraging **MySQL** for robust data management, which augmented query performance by **25%**.
- Incorporated **Splunk** with various data sources, **for real-time application monitoring**, enhancing end-to-end visibility across the application stack and reducing troubleshooting time.
- Integrated **Redis for caching**, improving application response times by **40%** and reducing database load.
- Employed **Git for effective version control** and coordinated with multidisciplinary teams on GitHub, ensuring seamless code integration and enhancing collaboration efficiency.

## Education

**University of Colorado, Denver** **/May 2023**

*Masters of Science in Computer Science*

**Anna University** **/May 2021**

*Bachelors of Engineering in Computer Science*

## Skills

**Languages**: Java, Python, C, C++, Golang, Javascript, TypeScript
**Frameworks**: Flask, Django, React, Angular, Node.js
**Databases**: SQL, NoSQL, MongoDB, PostgreSQL, MySQL, DynamoDB
**J2EE Technologies**: Spring, SpringBoot
**AWS**: S3 Bucket, IAM, Elastic beanstalk, CloudWatch, Dynamodb, Redshift and EC2 Instances
**Web Technologies**: HTML, CSS, JQuery, Bootstrap, REST API Development and Web Application
**AI & Automation:** Azure OpenAI (GPT Models), Azure Document Intelligence, LangChain, Hugging Face, n8n, MCP, GitHub Copilot, Agentic AI.
**Methodologies:** SDLC and Agile
**Operating System**: Windows, Mac OS and Linux/Unix
**ETL Tools**: Alteryx, Talend Open Studio, Data Factory, Airflow, Docker
**CI/CD and DevOps:** Jenkins, Kubernetes
**Version control Tools**: SVN, Git, GitHub
**Tools**: Postman, Swagger, Snowflake, Pyspark, Databricks, Apache Kafka, Tableau, selenium, Junit

## Project

**AI-Powered Automation Workflow with n8n and MCP Flows**

- Designed and implemented automated workflows using **n8n** and **MCP flows** to streamline client data retrieval from PostgreSQL, reducing manual effort by 40%.
- Integrated **SerpAPI** to fetch external company intelligence and enrich client profiles for sales team prospecting, improving data completeness by 60%
- Built **agentic AI systems** leveraging **LLMs and prompt engineering** to create autonomous agents that perform intelligent data gathering, analysis, and enrichment without human intervention.
