ADITYA REDDY GUNDA

+1 (620) 719-9296 | adityagundareddy@gmail.com | linkedin.com/in/gundaaditya | Pittsburg, KS, 66762, USA

SUMMARY

Computer Science graduate specialized in Artificial Intelligence & Machine Learning. Skilled in transforming complex data into actionable insights and solving problems using advanced technologies. Eager to apply my expertise in AI/ML to create innovative solutions that push technological boundaries. Passionate about advancing AI and committed to contributing to impactful projects that drive the future of intelligent systems.

EDUCATION

Bachelors in Technology: Artificial Intelligence and Machine Learning *(3+1 Transfer Program)*
PITTSBURG STATE UNIVERSITY, Pittsburg, KS, USA. GPA: 3.84 *2024-2025*

MALLAREDDY UNIVERSITY, Hyderabad, INDIA. GPA: 9 /10 *2021-2024*

SKILLS

Technical Skills:

- **Programming**: Python, SQL, JavaScript, C, Java, R
- **Frameworks**: TensorFlow, Keras, PyTorch, scikit-learn
- **NLP**: Tokenization, NER, Sentiment Analysis, GPT
- **Deep Learning**: CNNs, RNNs, GANs, LSTM
- **Cloud**: AWS, Google Cloud (GCP), Microsoft Azure
- **Data Preprocessing**: Pandas, NumPy, PySpark
- **Deployment**: Docker, Kubernetes, Jenkins, CI/CD
- **Databases**: MongoDB, MySQL, PostgreSQL, NoSQL
- **Version Control**: Git, GitHub Actions
- **Visualization**: Matplotlib, Seaborn, Tableau, Power BI
- **Time-Series**: ARIMA, Prophet, Seasonal Decomposition

Soft Skills:

- Collaboration
- Communication
- Problem-Solving
- Time Management
- Adaptability
- Leadership
- Critical Thinking

EXPERIENCE

AI Software Engineering Intern

iBroad Solutions, *Hyderabad, India* *Jan 2024 - June 2024*

Key Responsibilities & Achievements:

- Designed and developed AI models for automation and decision-making processes using deep learning (DL) and natural language processing (NLP) techniques.
- Created custom algorithms to enhance machine learning (ML) model performance, focusing on predictive analytics and real-time decision-making.
- Integrated AI models into cloud platforms (AWS, GCP), optimizing cost and performance by 15%.
- Built data preprocessing pipelines to ensure data quality and improve model accuracy and efficiency.
- Increased AI model performance by 20%, improving decision accuracy in enterprise-level applications.
- Reduced production cycle time by 30% through scalable model deployment and automation.

Machine Learning Intern

Intrainz, *Bangalore, India* *Nov 2023 - Jan 2024*

Key Responsibilities & Achievements:

- Developed predictive models for traffic forecasting and fleet management optimization, leveraging time-series analysis and regression models.
- Enhanced forecasting accuracy by 18% using data feature engineering and statistical modeling.
- Built real-time machine learning solutions for route optimization and delay prediction using IoT and GPS data.
- Integrated machine learning algorithms with cloud infrastructure to enable real-time decision-making and reduce operational delays.
- Optimized route prediction models, cutting prediction time by 25% and improving operational efficiency.

ACADEMIC PROJECTS AND PUBLICATIONS

- **Brain Tumor Detection**: Developed a CNN model with 90% accuracy on 1,100 MRI images, speeding up diagnosis.
  Publication: *"Use of Support Vector Machine to Detect Brain Tumour," International Research Journal of Modernization in Engineering Technology and Science, May 2024.*
- **Credit Card Fraud Detection**: Achieved 93% accuracy on 60,000 records, reducing false positives by 30%.
  Publication: *"Analysis of Credit Card Fraud Detection Using Machine Learning," International Journal of Scientific Research in Engineering and Management (IJSREM), Dec 2023.*
- **Hangman Game**: Developed a Python GUI game with 1,000+ words, engaging kids with positive feedback.
  Publication: *"Development of Hangman Game Using Python," International Journal of Scientific Research in Engineering and Management (IJSREM), Jun 2023.*
- **Farmers Portal with Crop Disease Detection**: Developed a web-based portal for farmers to upload crop images for disease detection using Gemini (AI-based model). The system identifies crop diseases with 95% accuracy, helping farmers improve crop yield.

ADDITIONAL EXPERIENCE & ACHIEVEMENTS

Workshops:

- Natural Language Processing (NLP) Workshop, IIT Hyderabad: Gained practical knowledge in NLP techniques such as text preprocessing, tokenization, named entity recognition (NER), and sentiment analysis, enhancing hands-on expertise in NLP frameworks like spaCy, NLTK, and transformers.

Hackathon:

- 24-Hour Hackathon, Hyderabad, India: Led a team to develop a real-time AI-driven solution using Python and machine learning algorithms, demonstrating expertise in problem-solving, innovation, and rapid application development under time constraints.

Certifications:

- Completed 40+ certifications, including advanced courses in Natural Language Processing (NLP), AI/ML, and Data Science from platforms like Coursera, showcasing continuous learning and expertise in emerging technologies.
