SHREYAS MYSORE NARAYANA

mnshreyas615@gmail.com | +1 (972) 987-7821 | LinkedIn| GitHub | Portfolio

Houston, Texas 77054

Professional Summary

Analytical and detail-oriented Data Scientist with hands-on experience in predictive modeling, machine learning, and statistical analysis. Skilled in Python, R, SQL, and cloud platforms (AWS, Google Cloud), with a strong foundation in NLP, deep learning (PyTorch), and data engineering. Adept at designing robust models and automating end-to-end ML workflows. Passionate about solving business problems through data-driven solutions in healthcare, engineering, and insurance domains.

Education

Master of Engineering in Data Science, University of Houston, TX *(3.96/4.0)*

Bachelor of Engineering in Computer Science, Atria Institute of Technology, India *(8.85/10)*

Work Experience

Research Assistant | University of Houston (Jan 2024 – Jan 2025)

- Built predictive models (SVM, Logistic Regression, Random Forest) to analyze 500,000+ MRI and brain scan data points, achieving up to 88% accuracy in predicting DBS procedure outcomes.
- Applied feature selection techniques including LASSO, Recursive Feature Elimination, and Genetic Algorithms, reducing feature count by 30% while improving generalizability.
- Used Python, PyTorch, and sklearn for model development; conducted A/B testing and statistical evaluations to increase model robustness.
- Designed synthetic augmentation pipelines using Diffusion Models, enhancing dataset diversity by 20%.

Junior Data Analyst | Konigtronics (OPC) Private Limited (May 2022 – May 2023)

- Developed and optimized SQL-based ETL pipelines for 10M+ records, improving reporting speed and reliability.
- Built interactive dashboards using Tableau; reduced manual reporting time by 50% and improved stakeholder decision-making.
- Performed regression analysis and statistical tests for marketing optimization, contributing to improved campaign ROI.

Embedded System Intern | Bharat Electronics Limited (Sep 2022 – Oct 2022)

- Developed a satellite data transmission system using PHP and Shell Script; optimized backend workflows improving data retrieval by 25%.
- Assisted in system integration and real-time validation for mission-critical data streams.

Technical Skills

- **Programming:** Python, SQL, Java, C++, R, Shell Scripting
- **Machine Learning:** PyTorch, scikit-learn, TensorFlow, XGBoost, LASSO, RFE, A/B testing
- **Data Science:** Feature Engineering, Model Optimization, Deep Learning, NLP
- **Data Engineering & Cloud:** Google Cloud, Snowflake, BigQuery, AWS, Hadoop
- **BI & Visualization:** Power BI, Tableau
- **Software Development:** Debugging, API Development, Version Control (Git)

Projects & Research

Smart Parking System (IoT, Edge AI, Cloud) – DOI: 10.17148/IJARCCE.2023.12468

- Designed a real-time parking detection system with sensor-based IoT devices, achieving 93% prediction accuracy across 1.5M+ data points and reducing system latency by 20% for smart urban parking management.
- Integrated Edge AI models for on-device inference and built cloud-based pipelines to ensure scalable data handling.

Earthquake Impact Analysis (SQL, CNN, Cloud) – DOI: 10.17148/IJARCCE.2023.12605

- Built a cloud-based data warehouse with 600K+ geospatial records enabling faster data access and scalable storage.
- Developed CNN models using TensorFlow & Keras to predict earthquake severity, improving forecasting accuracy by 35% over baseline models &Optimized SQL queries reducing ETL pipeline processing time by 42%

Food Ordering Chatbot (NLP, Dialogflow, Python)

- Developed an NLP-driven chatbot integrated with Dialogflow and Python, enabling real-time menu navigation with over 90% intent detection accuracy.
- Deployed the chatbot on a web interface, increasing user engagement and order conversion by 25%.

Certifications & Achievements

- Oracle Cloud Infrastructure 2024 Generative AI Professional
- QWIKLABS: 12 Badges in Google Cloud Computing
- CISCO: Cybersecurity Essentials
- Best Outgoing Student (2019–23) – Recognized for academic excellence, leadership, and technical contribution.
