Abhishek Joshi

682-377-4746 | abhishek.j@ajobguide.com | Arlington, Texas | LinkedIn | GitHub

Professional Summary

- 4 years of Data Scientist experience leveraging statistical and machine learning techniques, including Python, R, and SQL, to perform in-depth analyses, build predictive models Linear/Logistic Regression, Decision Trees, and conduct A/B testing.
- Experienced in applying advanced analytics, including Artificial Neural Networks, Convolutional Neural Networks, and Recurrent Neural Networks, leveraging cloud platforms like AWS and Microsoft Azure for data processing and model deployment.
- Ability in data analysis and visualization, proficient in tools like Tableau and Power BI, and skilled in utilizing Python libraries such as NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, TensorFlow, XGBoost, and PyTorch for advanced data analysis.
- Expertise in data analysis, proficient in SQL and databases, including SQL Server, MySQL, PostgreSQL, and MongoDB, for data extraction, transformation, and analysis to support business decisions.

Education

Masters of Science in Data Science | The University of Texas at Arlington, Texas

Skills

- **Languages/ IDE's:** Python, R, SQL, Jupyter Notebook, Google Colab, MATLAB
- **Machine Learning:** Linear, Logistic Regression, Decision Trees, Random Forests, Naive Bayes, SVM, A/B Testing
- **Deep Learning:** ANN, CNN, RNN, LSTM
- **Cloud/Visualizations:** AWS, Microsoft Azure, Tableau, Power BI, Google Data Studios
- **Packages:** NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, TensorFlow, Keras, NLTK, XGBoost, PyTorch
- **Database and Tools:** SQL Server, MySQL, PostgreSQL, MongoDB, DynamoDB, Cassandra, SPSS
- **Technology:** pedantic models, FAST API, FAAIS vector database, Recommendation system, A/B testing

Work Experience

Charles Schwab, TX | Data Scientist **Sep 2023 – Current**

- Improved machine learning model robustness using an innovative approach LangChain to build a data augmentation pipeline, generating synthetic data that enhanced model performance by 20% and addressed data scarcity challenges.
- Built high-performing Convolutional Neural Networks (CNNs) for image classification tasks, achieving 35% accuracy in false positive rates, demonstrating a strong understanding of deep learning principles and best practices.
- Employed rigorous evaluation techniques (BLEU, ROUGE, perplexity) to assess and optimize the performance of 30% NLP models for translation, summarization, and language generation tasks.
- Enhanced agility by leveraging AWS to design and deploy scalable and high-performing applications, achieving application response times and a 20% increase in system throughput, enabling faster time-to-market for new products and services.

Fusion Software Technologies, India | Data Scientist - II **Jan 2021– Jul 2022**

- Employed ANN architectures such as feedforward networks, to solve complex machine learning problems, resulting in a 15% improvement in model performance and a 5% reduction in development time.
- Implemented innovative AI/ML solutions using Azure services, such as Azure Cognitive Services and Azure Machine Learning, leading to a 12% increase in business agility time-to-market for AI-powered products.
- Designed and deployed sentiment analysis tools with NLTK, achieving 95% accuracy in identifying customer sentiment from social media and reviews, driving a 15% increase in customer satisfaction.
- Streamlined data analysis and reporting processes by utilizing the powerful features of Power BI, resulting in a 20% reduction in report generation time and a 15% increase in analyst productivity, enabling faster.

Fusion Software Technologies, India | Data Scientist - I **Jan 2020 – Dec 2020**

- Applied logistic regression techniques to solve complex classification problems, achieving 20% accuracy and demonstrating a strong understanding of statistical modeling and machine learning principles.
- Developed high-performing machine learning models using Scikit-learn, achieving 95% accuracy and a 10% reduction in model development time compared to alternative libraries.
- Leveraged A/B testing to optimize marketing campaigns, resulting in a 15% increase in campaign effectiveness, a reduction in marketing costs, and data-driven decisions that overall marketing performance.
- Optimized XGBoost for structured data and PyTorch for high-performing and innovative machine learning models, resulting in a 15% increase in model accuracy in model development time and system performance.
- Deployed high-performing machine learning models in production using TensorFlow's advanced features, such as TensorFlow Serving and TensorFlow Lite, achieving a 15% improvement in model inference speed.

Certification

- Microsoft 98381: Globally Certified in Introduction to Programming Using Python by Microsoft
- AWS Academy Machine Learning Foundations
- AWS Academy Data Analytics
- Data Science Professional Certification training by IBM (Coursera)
- Data Analyst Professional Certification training by IBM (Coursera)
- Google Data Analyst Professional Certification (Coursera)
- AWS Academy Cloud Foundations
