Highly motivated and driven biotechnology postgraduate with a strong foundation in molecular biology, quality control, cell-culture and laboratory techniques. Eager to contribute to biomanufacturing processes and ensuring compliance with cGMP standards. Quick learner with excellent documentation skills and attention to detail.

EDUCATION

Motilal Nehru National Institute of Technology | M. Tech Biotechnology | CGPA: 9.41/10 **Sep 2020- July 2022**
Dr M.C. Saxena College of Engineering & Technology | B. Tech Biotechnology | 81.7% **Aug 2015-June 2019**

WORK EXPERIENCE

Asia Research Partners LLP | Research Consultant **Sep 2023 - March 2024**

- Conducted data verification and documentation review for biotechnology and pharmaceutical sectors.
- Analyzed market trends and developed insights to support strategic research reports and maintained updated knowledge of biopharmaceutical industry developments
- Utilized Microsoft Office (Word, PowerPoint, Excel) for report writing, data organization, and presentation of findings.

PROJECTS

- Expression profiling of CHRDL1 gene in colorectal cancer and its functional analysis (RT PCR, PCR, Gel electrophoresis, Cell culture Techniques, Nucleic Acid Extraction, Media preparation, MTT assay, Wound Healing assay) **2021-2022**
    - Checked the methylation status of the candidate genes in normal and tumor CRC samples using COBRA analysis.
    - Further, have also evaluated the expression analysis of candidate genes in normal and tumor samples of CRC using Real-time PCR.
    - Moreover, methylation status and expression analysis of the candidate genes were also validated in different CRC cell lines and migration and proliferation of the cells were compared using MTT assay and Wound Healing assay.
- An integrated bioinformatics approach to screen potent fusion transcripts in colorectal cancer **2021**
- Screening of natural metabolites as potent quorum sensing inhibitor against *Pseudomonas aeruginosa* **2019**
- Investigation of the capability to clone laccase-producing. gene isolated from *Aspergillus niger* and *Bacillus subtilis* into *E.coli* and its expression **2018**

SKILLS SUMMARY

- Media preparation, buffer preparation, microbial culture maintenance, isolation of pure colony, biochemical testing for the identification of bacteria, antimicrobial sensitivity test, minimum inhibitory concentration (MIC) test
- Aseptic techniques and mammalian cell culture maintenance
- Agarose- gel electrophoresis, SDS-PAGE (sodium dodecyl sulfate-polyacrylamide gel electrophoresis), Spectrophotometer, Polymerase chain reaction PCR, Real-time PCR
- High-performance liquid chromatography (HPLC)
- Strong adherence to GLP, cGMP, SOPs, and regulatory compliance
- Documentation, batch record maintenance, data review and data analysis
- Familiarity with cell culture techniques, flow cytometry and bioinformatics tools related to expression, methylation, and survival analysis
- Demonstrated ability to perform complex data analysis and interpret results during academic and professional projects.
- Proficiency in MS Office (Outlook, Word, Excel, PowerPoint), report writing, data analysis & Visualization using Excel

ACHIEVEMENTS

- Won first prize in Poster presentation on "An integrated bioinformatics approach to screen potent fusion transcripts in colorectal cancer in an international conference"
- Qualified GATE 2020 (Biotechnology)
- IELTS over all band score 7
