SUMMARY

●Around 5 years of experience as a Data Analyst with a proven track record in leveraging Python, Tableau, Power BI, ETL tools, and cloud platforms (AWS) to extract, transform, and load data from various sources, perform complex data analysis, and deliver actionable insights.
● Skilled in Python to manipulate data for data loading and extraction and worked with Python libraries like NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, and TensorFlow.
● Expert in Python for data manipulation and insightful data visualizations, build interactive dashboards using Tableau and Power BI to effectively communicate complex findings to stakeholders.
● Practical understanding of Data modeling (Dimensional and relational) concepts like Star-Schema Modeling, Snowflake Schema Modeling, and Fact and Dimension tables.

EDUCATION

M.S. Information Systems Expected Jun 2024
Northwest Missouri State University, Maryville, MO 4.00 GPA

B.Tech. Electronics and Communication June 2018 – May 2022
Swarna Bharathi Institute of Science and Technology, Telangana, India 3.55 GPA

TECHNICAL SKILLS

● Languages: Python, R, SQL, NoSQL
● Visualizations: Tableau, Power BI, Looker, Excel, A/B Testing
● IDEs: Visual Studio Code, Jupyter Notebook
● Machine Learning: Naïve Bayes, Statistical Modeling, Time-series Regression, Data Analysis, Predictive Analysis, Clustering (K-Means)
● ETL and Cloud: SSIS, SSAS, Informatica Power Center, AWS (DynamoDB, S3, EC2, Redshift), Azure
● Packages: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Keras, TensorFlow, Ggplot2
● Database & Tools: SQL Server, MySQL, PostgreSQL, MongoDB, Snowflake, Teradata, Talend, Active Directory, SQL Server Management Studio (SSMS), GitHub, Git
● Data Skills: Data Warehousing, Data Mining, Data Manipulation, Statistical Analysis, Data Modeling, Big Data Processing.

PROFESSIONAL EXPERIENCE

McKesson, MO, United States | **Data Analyst** Sep 2023 - December 2024

● Achieved a 20% enhancement in data lake integration efficiency by seamlessly connecting and querying data in data lakes, leveraging Snowflake capabilities for effective integration.
● Utilized AWS services such as EC2, S3, Lambda, and Redshift leading to a 25% enhancement in data processing efficiency, cost-effectiveness, process automation, accelerated analytics, and data-centric decision-making.
● Industrialized various interactive dashboards using Tableau to communicate data trends and KPIs to non-technical audiences, leading to a 30% increase in data-driven decision-making.
● Built and maintained various DBT models and macros, focusing on incremental model design and modularization, resulting in a 40% increase in data pipeline efficiency and a 25% reduction in pipeline execution time.
● Created multiple informative visualizations (histograms, scatter plots, boxplots) using Matplotlib and Seaborn to communicate complex data insights to stakeholders, leading to a 30% improvement in decision-making efficiency.
● Established various SQL queries and stored procedures to extract, transform, and load customer data from MySQL into a data warehouse, increasing data ingestion efficiency by 25%.

Kpit Technologies, India | **Data Analyst - II** Jan 2019 – March 2023

●Wrote and optimized complex SQL queries to extract and transform large datasets from relational databases (SQL Server, PostgreSQL), retrieving 1 million records for analysis.
● Established and maintained SSIS packages to extract, transform, and load (ETL) data from various sources (databases, flat files, APIs) into data warehouses, improving data processing efficiency by 20%.
● Developed and deployed a predictive customer churn model using random forest that accurately predicted customer churn with a 92% accuracy rate, resulting in a 25% reduction in customer churn costs. ● Developed Snowflake SQL queries and views to support ad-hoc analysis and reporting on marketing campaign performance.
● Extracted and cleaned terabytes of data from relational databases (MySQL) and cloud data warehouses (Snowflake) to prepare for analysis, ensuring data accuracy and reducing analysis time by 20%.
