PROFESSIONAL SUMMARY

Results-driven Data Analyst and Data Scientist with 3+ years of experience in developing and deploying data-driven solutions across real estate and e-commerce industries. Expertise in Machine Learning (ML), Predictive Analytics, Big Data technologies, and AI-driven Solutions. Proven track record of enhancing business KPIs through data insights and AI-driven solutions.

Key Skills and Experience:

- Developed and deployed Machine Learning models using TensorFlow, PyTorch, Scikit-learn, Keras, and Numpy.
- Utilized data analysis and visualization tools such as Matplotlib, Seaborn, Tableau, and Power BI to deliver actionable insights.
- Managed large datasets with Apache Spark, Hadoop, and cloud platforms like AWS, GCP, and Azure.
- Integrated AI/ML solutions into business workflows to drive informed decision-making across real estate and e-commerce sectors.
- Led real estate market analysis, reducing data inaccuracies by 95% and improving market trend prediction accuracy by 20%.
- Created predictive analytics models for e-commerce sales forecasting with a Mean Absolute Percentage Error (MAPE) of 5.8%.
- Implemented recommendation systems for real estate investors and e-commerce platforms using predictive analytics.
- Collaborated with cross-functional teams to deliver data-driven solutions aligned with business objectives.
- Utilized Agile methodologies and CI/CD pipelines using Jenkins, Docker, and Kubernetes for efficient deployment.
- Demonstrated strong analytical, communication, and collaboration skills, focusing on translating data insights into actionable business strategies.

Technical Skills

Machine Learning: TensorFlow, PyTorch, Scikit-learn, Keras, Numpy, Pandas, XGBoost, LightGBM, OpenCV, YOLO, MLlib; Statistical Models, Regression Analysis, Classification Algorithms.

Artificial Intelligence: Hugging Face Transformers, OpenAI, LangChain, Google Gemini, Hugging Face Models, Llama; Knowledge Representation and Cognitive Systems.

Vector Databases: Pinecone, ChromoDB, CosmosDB, Faiss, Color, OpenSearch, Milvus, ElasticSearch.

Big Data: Hadoop, Apache Spark, Apache Kafka, Apache Hive, Google BigQuery, Data Lake, Apache Flink; Distributed Computing and Stream Processing.

ETL Tools: Databricks, Snowflake, Azure Data Factory, AWS Glue, Informatica, Apache Airflow, Kinesis; Data Pipelines and Data Warehousing.

Statistical Analysis: Hypothesis Testing, Bayesian Statistics, Regression Analysis (Linear and Logistic), Time Series Analysis; A/B Testing and Experimental Design.

Bioinformatics: Sequence Analysis, Genomic Data Processing; Biological Data Visualization and Phylogenetic Analysis.

Web Development and Frameworks: HTML5, CSS3, JavaScript; Django, React.js, Angular.js; Flask and FastAPI.

Databases: PL/SQL (Oracle), MySQL; NoSQL (MongoDB), GraphQL; Database Design and Query Optimization.

Cloud and Servers: GCP (Google Cloud Platform), AWS (Amazon Web Services), Azure; Apache Tomcat and Nginx.

Data Visualization: Tableau, Power BI; Matplotlib and Seaborn; Interactive Dashboards using D3.js.

Logging and Analytics Tools: Prometheus, Grafana; Datadog and ELK Stack (Elasticsearch-Logstash-Kibana).

Containerization & Infrastructure Tools: Docker and Kubernetes; Terraform and Ansible for Infrastructure as Code (IaC).

Project Management: Agile Methodologies (Scrum and Kanban), JIRA; Risk Assessment and Stakeholder Management.

Professional Experience

US Bank Remote

Data Analyst *Jan 2024 – Present*

- Led extensive data analysis projects across multiple business units, utilizing SQL, Alteryx, and data visualization tools like Tableau and Power BI to gather insights and develop actionable recommendations, enhancing business decision-making by 30%.
- Created over 15 detailed visualizations and interactive dashboards using Tableau and Power BI, delivering clear insights on complex data sets to senior leadership and stakeholders within tight deadlines.
- Conducted exploratory data analysis (EDA) to uncover actionable insights, guiding business strategies and enhancing key performance indicators (KPIs) by 25%.
- Developed predictive models leveraging statistical techniques and machine learning algorithms to forecast business trends, driving informed decision-making and improving forecasting accuracy by 15%.
- Performed geospatial analysis to identify high-growth areas and emerging trends, informing strategic business expansions and investments.
- Designed and implemented A/B testing frameworks to evaluate the impact of new features and predictive models on business outcomes, improving engagement metrics by 20%.
- Analyzed large-scale datasets using SQL and data warehousing tools to uncover insights into business dynamics, enabling the development of more accurate forecasting tools.
- Built real-time dashboards in Tableau and Power BI to visualize key performance metrics for stakeholders and senior management, facilitating data-driven decisions.
- Collaborated with cross-functional teams (product, engineering, marketing) to define data requirements and deliver data-driven solutions aligned with business objectives, enhancing collaboration and efficiency.
- Utilized cloud ecosystems (AWS/GCP) and MLOps tools to streamline model deployment, monitoring, and feedback loops, ensuring high performance and reliability.

Environment: Python (Beautiful Soup, regex, requests), Tableau, Power BI, Matplotlib, Seaborn, Apache Spark, Hadoop, AWS/GCP (S3, BigQuery, Redshift), Jupyter Notebooks, Git, A/B Testing (Optimizely, StatsModels), CI/CD (Jenkins, Docker, Kubernetes).

Data Scientist *Apr 2022 – Jul 2023*

- Implemented sophisticated forecasting models (SARIMA, Prophet) to predict monthly e-commerce sales demand with an impressive Mean Absolute Percentage Error (MAPE) of just 5.8%, enabling precise inventory management.

- Applied clustering algorithms (K-means, DBSCAN) to segment customers into five distinct groups, uncovering that the top 20% of customers contributed to 80% of revenue, directly informing targeted marketing strategies.
- Developed recommendation systems for e-commerce platforms, leveraging customer behavior data and predictive analytics to suggest personalized products and promotions.
- Conducted exploratory data analysis (EDA) to uncover actionable insights, guiding product strategy and enhancing business KPIs.
- Designed and implemented A/B testing frameworks to evaluate the impact of new features and marketing campaigns on customer engagement and conversion rates.
- Created predictive analytics models to forecast sales trends, driving informed business decisions for e-commerce clients.
- Analyzed large-scale e-commerce datasets using Spark and Hadoop to uncover insights into customer behavior, enabling the development of more effective marketing strategies.
- Built real-time dashboards in Tableau and Power BI to visualize key performance metrics (e.g., sales growth, customer retention) for stakeholders and senior management.
- Collaborated with cross-functional teams (product, marketing, operations) to define data requirements and deliver data-driven solutions aligned with business goals.
- Utilized AWS/Azure/GCP ecosystems and MLOps tools to streamline model deployment, monitoring, and feedback loops, ensuring high performance and reliability.
- Developed customer-360 features and advanced analytics capabilities, enhancing the ability to deliver personalized and data-driven experiences.

Environment: Python (SARIMA, Prophet), SQL, K-means clustering, DBSCAN clustering, Apache Spark, Hadoop, Tableau, Power BI, AWS/GCP (S3, BigQuery, Redshift), Jupyter Notebooks, Git, A/B Testing (Optimizely, StatsModels), CI/CD (Jenkins, Docker, Kubernetes).

Data Scientist *Apr 2021 – Mar 2022*

- Developed advanced deep learning models (LSTM, GRU, RNN, Dense Neural Networks) in Python to predict stock closing prices, achieving 93.5% training accuracy and enhancing validation accuracy to 80% through comprehensive hyperparameter optimization.
- Conducted comparative analysis across multiple models, identifying GRU as the optimal solution with the lowest mean squared error (0.041), significantly improving prediction reliability.
- Built real-time dashboards to visualize key performance metrics for stakeholders and senior management.
- Collaborated with cross-functional teams to integrate AI/ML solutions into existing platforms, ensuring seamless deployment and scalability.
- Developed recommendation systems for investors, leveraging historical stock data and predictive analytics to suggest optimal investment strategies.
- Performed natural language processing (NLP) on financial news and reports to extract actionable insights, improving stock price forecasting models.
- Designed and implemented A/B testing frameworks to evaluate the impact of new features and predictive models on investor engagement and conversion rates.
- Created predictive analytics models to forecast stock price movements, driving informed investment decisions for clients.
- Analyzed large-scale financial datasets using Spark and Hadoop to uncover insights into market trends, enabling the development of more accurate forecasting tools.
- Utilized AWS/GCP ecosystems and MLOps tools to streamline model deployment, monitoring, and feedback loops, ensuring high performance and reliability.
- Developed reusable analytical frameworks and code artifacts to address recurring business questions efficiently across the data science team.

Environment: Python (TensorFlow, Keras), SQL, Apache Spark, Hadoop, Tableau, Power BI, AWS/GCP (S3, BigQuery, Redshift), Jupyter Notebooks, Git, A/B Testing (Optimizely, StatsModels), NLP (NLTK, SpaCy, Hugging Face), CI/CD (Jenkins, Docker, Kubernetes).

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials,Amazon Web Services (AWS)**
- **Automation Anywhere Certified Advanced RPA Professional (V11.0)**
- **Aviatrix Certified Engineer – Multi cloud Network Associate, Aviatrix**
- **Automation Anywhere Certified Essentials RPA Professional (AA-Essentials)**
- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **Foundations of User Experience (UX) Design, Google**

EDUCATIONAL EXPERIENCE

Illinois Institute of Technology May 2025
Master of Applied Science in Data Science— *Chicago, IL, USA*

- **Relevant Coursework: Machine Learning, Big Data Technologies, Data preparation and analysis, Data Visualization, Mathematical Statistics, Montecarlo Simulation and Applications, Statistical Learning, Project Management**

KL University May 2023
, Bachelor of Technology in Computer Science — *AP, IND*

- **Relevant Courses: Data Structure and Algorithms, Artificial Intelligence (AI), Database, Software Design and Development, Operating Systems, Data Science, Python full stack, Java full stack, C++**
