Work Experience

Data Analyst

Ford Motor Company (Remote)

June 2020 – Present

- Collaborated with functional heads to identify opportunities for operational improvement and strategic decisions in respective functions based on data.
- Defined and tracked key performance indicators for existing and new functions / projects across the company.
- Conducted detailed analysis, generated insights and visualizations and pushed reports based on company-wide data.
- Created visually impactful dashboards in Excel and Tableau for data reporting by using pivot tables and XLOOKUP. Extracted, interpreted and analyzed data to identify key metrics and transform raw data into meaningful and actionable information.
- Improved data accuracy, viability and value by improving and streamlining processes regarding data flow and data quality.

Data Analyst

Inalfa Roof Systems Inc, Atlanta GA

June 2019 - August 2020

- Built out the data and reporting infrastructure from the ground up using Tableau and SQL to provide real-time insights into the product, marketing funnels, and business KPIs.
- Converted data into actionable insights by predicting and modelling future outcomes.
- Designed and implemented A/B experiments for products to improve the conversation rate by 19 basis points and reduce churn by 12 basis points.
- Implemented long term pricing experiment that improved customer value by 25%.
- Built operational reporting in Tableau to find areas of improvement for contractors resulting in \$250K in annual incremental revenue.
- Led a team of 2 full-time employees and 4 contractors.

Data Analyst Intern

ORANGE SA CMR, Douala Cameroon

June 2017 - August 2018

- Planned and coordinated the metric data in the organization.
- Prepared various reports on market conditions for a product feasibility study.
- Reviewed the CRM (Customer Relationship Management) database system with the aim of improving efficiency and introducing new algorithms focused on developing customers from generated leads.
- Created and maintained complex financial models for each company division.
- Performed analysis of archived data including data cleanup and data visualization.

Hobbies and Interest
