

SPURTHY RAMAPPA

DATA ANALYST

Location: KS | Phone: (913) 742-9748 | Email: spurthyram1520@gmail.com | [LinkedIn](#) | [Git Hub](#)

SUMMARY

- Results-oriented Data Analyst with 3 years of professional experience leveraging advanced technical skills to drive data-driven decision-making.
- Experienced in working with relational databases like MySQL for structured data storage and retrieval, and NoSQL databases like MongoDB for handling unstructured data, optimizing database queries for efficient data access.
- Skilled in deploying and managing cloud technologies using AWS services including IAM, EC2, S3, RDS, RedShift, and Cloud Watch.
- Expert in data visualization using Power BI, Tableau, and MS Excel, adept at creating compelling visualizations to communicate complex data insights effectively.
- Proficient in using analytical libraries such as NumPy, Pandas, Matplotlib, and Scikit-Learn for data manipulation and statistical analysis.
- Experienced in applying Agile and Waterfall methodologies to ensure efficient project execution and delivery.
- Strong background in data mining, data cleansing, statistical analysis, text mining, ETL, data wrangling, and data warehousing.
- Demonstrated ability to utilize Hadoop, Hive, Apache Spark, and Snowflake for large-scale data processing and storage solutions.
- Proven critical thinking, problem-solving, and communication skills, with a track record of delivering high-quality, data-driven insights that support strategic business decisions.
- Proficient in version control tools like Git and GitHub, ensuring collaborative and streamlined project management.
- Skilled in transforming raw, unstructured data into structured formats for analysis using Python scripting, employing data transformation techniques to prepare data for machine learning models and statistical analysis.

PROFESSIONAL EXPERIENCE

Data Analyst

Sep 2024 – Current

JPMC

KS

- Designed and implemented complex financial dashboards using Tableau and Power BI, presenting key financial metrics such as profit margins, asset performance, and risk indicators, enabling senior management to make informed investment decisions.
- Collaborated with cross-functional teams to define KPIs, transforming complex data into actionable insights that supported the optimization of strategies and enhanced overall performance.
- Optimized data extraction processes from SAP S/4 HANA, leveraging SQL and Python to ensure seamless integration between SAP and reporting systems, reducing manual data manipulation efforts and increasing data accuracy.
- Utilized SQL to write advanced queries, ensuring data consistency and accuracy while providing detailed insights that informed decision-making processes across various departments.
- Developed predictive models in Python using machine-learning algorithms, uncovering patterns and trends that contributed to more accurate forecasting and effective risk mitigation.
- Automated reporting workflows using SQL and Python, significantly reducing manual efforts and ensuring the timely delivery of key metrics, enhancing operational efficiency and accuracy across the organization.
- Built solution-driven views and dashboards in Power BI, incorporating various chart types including Tree Maps, Circle Views, Line Charts, Area Charts, and more to effectively visualize key metrics and trends.

Data Analyst Intern

Jan 2024 – May 2024

BCBS

KS

- Cleaned, transformed, and loaded (ETL) healthcare member and claims data, improving data quality by 20%, resulting in more accurate analysis for cost-reduction initiatives and improved healthcare delivery.
- Optimized SQL queries and database performance to reduce response times and enhance data access, while developing queries to extract key metrics on member demographics, healthcare trends, and provider performance, supporting data-driven decisions for strategy.
- Created sophisticated Tableau dashboards with advanced features to enhance user engagement and deliver meaningful insights.
- Employed Git for version control and JIRA for project management to support effective team collaboration.
- Conducted statistical analysis and utilized Tableau for visualizing extensive datasets, uncovering patterns and trends in patient readmissions, which resulted in a 5% decrease in 30-day readmission rates for a targeted patient group.
- Supported the development of data-driven recommendations for optimizing healthcare programs, contributing to improved patient outcomes and cost efficiencies.
- Assisted in data manipulation and preprocessing using Python's Pandas and NumPy libraries, ensuring data accuracy and consistency for real-time analysis.
- Researched and stayed current on industry trends and best practices in healthcare data analytics, actively participating in knowledge-sharing sessions to enhance team expertise and ensure alignment with industry standards.
- Supported developing and maintaining SQL queries, scripts, stored procedures, and functions for efficient data extraction and manipulation for real-time analysis.
- Utilized Agile methodologies to break down complex data analysis projects into manageable sprints, facilitating efficient collaboration with the data science team and timely delivery of insights.

Data Analyst

Jan 2020 - Jul 2022

Trigent Software

India

- Programmed Python scripts using libraries like NumPy and Pandas to manipulate data, improving data processing efficiency. Implemented

- data cleansing procedures that enhanced dataset accuracy, reducing errors in subsequent analytics.
- Collaborated with a team of developers to design, develop, and implement a BI solution for tracking sales, product, and customer KPIs.
- Developed and maintained complex SQL queries and scripts for data analysis and extraction, utilizing both MySQL and Oracle databases to ensure data accuracy and integrity.
- Worked with management and team members to clarify visualization requirements and business strategic report requirements.
- Leveraged AWS services, including S3, EC2, and Lambda, to automate data workflows, reducing processing time, improving scalability, and enhancing data storage efficiency through serverless computing and event-driven automation.
- Supported the automation of reporting processes using Power BI tools such as Power BI reports, dashboards, scorecards (KPIs), and MySQL, along with data warehouse sources, resulting in more efficient reporting workflows.
- Created comprehensive reports and presentations to communicate complex data insights to stakeholders across various departments, fostering improved cross-functional collaboration and informed decision-making.
- Interpreted data to formulate managerial strategies and presented findings using MS PowerPoint and Power BI, resulting in increase in customer service usage.
- Utilized Python's data visualization libraries, including Matplotlib, Seaborn, and Plotly, to create visually compelling graphs, charts, and plots in presentations, effectively conveying data insights to stakeholders.
- Leveraged advanced Excel techniques such as complex formulas, pivot tables, and VBA scripting to streamline repetitive tasks, boosting data processing speed and decreasing manual data handling.
- Optimized data storage and processing by implementing Snowflake for data warehousing, which enhanced data accessibility and query performance, supporting more efficient and scalable data analysis.
- Conducted extensive data mining and statistical analysis to uncover hidden patterns and insights, directly influencing marketing strategies and operational efficiencies.
- Collaborated in an Agile (Scrum) environment, managing version control with Git and GitHub, which improved project delivery times, reduced overlapping efforts, and ensured better team coordination and documentation across multiple data analysis projects.

TECHNICAL SKILLS

Programming Language:	Python, SQL.
Databases:	MySQL, Oracle, PostgreSQL, MongoDB.
Cloud Technologies:	AWS (IAM, EC2, S3, RDS, RedShift, Cloud Watch).
Data Visualization Skills:	Power BI, Tableau, MS Excel.
Libraries:	NumPy, Pandas, Matplotlib, Scikit – Learn.
Methodologies:	Agile, Waterfall.
Version Control Tools:	Git, GitHub.
Analytical Skills:	Data Mining, Data Cleansing, Statistical Analysis, Data Visualization, Text Mining, ETL, Data Wrangling, Data Warehousing, Critical Thinking, Problem-solving, Communication Skills, Presentation Skills, Microsoft Office (Word, Excel, PowerPoint, Access), Jupiter notebook.
Other Skills:	Hadoop, Hive, Apache Spark, Snowflake

EDUCATION

University of Central Missouri	Missouri, US
Master of Science in Computer Science	Aug 2022 – May 2024
Acharya Institute of Technology	Bengaluru, India
Bachelor of Engineering in Computer Science and Engineering	Aug 2017 – Aug 2021

CERTIFICATION

- [Microsoft Certified: Power BI Data Analyst Associate](#)
- [Google Analytics Certification](#)
- [SAP S/4HANA Essential Training](#)

PROJECTS

- AtliQ Mart Supply Chain Analysis**
- AtliQ Mart, a burgeoning FMCG manufacturer. They provided their dataset on their products, target and orders as a collection of CSV files.
 - Prepared data model for above database and ingested these csv files into MYSQL database and Used MS Excel and SQL to write and run various queries.
 - Used Power BI for plotting gauge charts to check if they met the target, line charts for ‘On Time’, ‘In Full’, ‘Line Fill Rate’, ‘Volume Fill Rate’ and bar graphs to check the number of Order Delays.
- Movie Dataset Analysis: Data Visualization and Reporting with Tableau**
- Developed an interactive Tableau dashboard to analyze over 45,000 IMDb movies, facilitating trend identification and boosting user engagement.
 - Leveraged Tableau visualizations and insights to collaborate with the team and implement strategies that increased viewer satisfaction by 30% and platform retention.
 - Streamlined data workflows for movie analysis using Tableau, enabling faster updates, efficient data exploration, and ongoing insights.
