WORK EXPERIENCE

SEG IT USA Business System Analyst

Mar 2024 – Mar 2025

Collaborated with cross-functional teams, including marketing, finance, and product development, to translate complex data insights into actionable business strategies.

Facilitated regular strategy sessions to ensure alignment on objectives, resulting in integrated marketing campaigns that increased overall performance metrics.

Contributed to the development and analysis of Media Mix Models (MMM) by evaluating historical data and+ marketing performance.

Utilized advanced statistical techniques to assess the effectiveness of various marketing channels, which helped determine optimal marketing spend allocation, maximizing ROI and improving budget efficiency.

Extracted, cleaned, and processed extensive datasets from digital marketing platforms using SQL.

Implemented rigorous data validation techniques to ensure the accuracy and consistency of data, which streamlined the preparation process.

Performed detailed analyses of marketing and media campaign performance using key metrics such as impressions and conversions.

Utilized Python libraries like Pandas and NumPy for data manipulation and statistical calculations, leading to insights that drive campaign enhancements.

Conducted advanced audience segmentation analyses to identify key demographics and psychographics, using techniques such as cluster analysis and regression modelling.

Optimized targeting strategies based on these insights, which led to enhanced media personalization and increase in engagement rates among targeted audiences.

Stayed updated with emerging analytics tools and methodologies by actively participating in industry webinars, training sessions, and professional forums.

Implemented best practices and innovative strategies within the analytics team, resulting in the adoption of new tools that improved data processing efficiency and analytical capabilities.

Developed and delivered training sessions for cross-functional team members on new analytics methodologies and tools, fostering a data-driven culture throughout the organization.

Maintained comprehensive documentation of SQL processes and data structures.

Developed and enhanced multi-touch attribution models through advanced statistical methods implemented in Python.

Applied machine learning algorithms to evaluate the effectiveness of different media channels, which supports informed budget allocation and strategic marketing decisions.

SKILLS & INTERESTS

Programming & Scripting: Python (Pandas, NumPy, Scikit-learn), SQL (Joins, CTEs, Stored Procedures), R, Excel (Advanced Macros, VBA)

Data Analysis & Modelling: Predictive Modelling, A/B Testing, Multivariate Analysis, Time Series Forecasting, Regression Analysis, Cluster Analysis, Media Mix Modelling (MMM)

Data Visualization & BI Tools: Power BI, Tableau, Looker, Matplotlib, Seaborn, ggplot2

Data Engineering & ETL: Data Extraction and Transformation, SQL Query Optimization, Database Management (MySQL, PostgreSQL, Snowflake, Big Query)

ILI TECHNOLOGY IND BUSINESS ANALYST

SEP 2021 – AUG 2022

Conducted business process modelling (BPMN, UML) to identify bottlenecks and inefficiencies.

Performed gap analysis to compare current vs. target state processes.

Developed process flow diagrams, swim lane diagrams, and documentation for optimized workflows.

Elicited functional and non-functional requirements using JAD, Moscow, and Kano models.

Defined user stories, epics, and acceptance criteria using Agile frameworks.

Documented requirements in BRD (Business Requirement Document) & SRS (Software Requirement Specification).

Participated in daily stand-ups, sprint planning, backlog grooming, and retrospectives.

Acted as a proxy Product Owner, ensuring business requirements align with sprint goals.

Utilized JIRA, Confluence, or Azure DevOps for sprint tracking and documentation.

Created use case diagrams, sequence diagrams, and activity flows using UML tools (Lucid chart, Draw.io, Visio).

Developed wireframes and prototypes using Figma, Balsamiq, or Adobe XD.

Defined test scenarios, test cases, and test scripts for functional and regression testing.

Conducted User Acceptance Testing (UAT) and validated results against acceptance criteria.

Used defect tracking tools like JIRA, Bugzilla, or TestRail to report and track issues.

Performed SQL queries (Joins, Subqueries, Stored Procedures) to extract business insights.

Developed interactive dashboards using Power BI, Tableau, or Looker.

Statistical & Machine Learning Techniques: Supervised & Unsupervised Learning, Feature Engineering, Data Normalization, Model Evaluation Metrics.

Cloud & Big Data Technologies: AWS (S3, Redshift, Lambda), GCP (Big Query, Cloud Functions), Azure (Synapse, Data Factory)

Agile & Project Management: Agile (Scrum, Kanban), Requirement Elicitation (BRD, SRS), JIRA, Confluence, Stakeholder Communication

Marketing & Business Intelligence: Campaign Performance Analysis, Multi-Touch Attribution, Audience Segmentation, Customer Retention Strategies

EDUCATION

MASTERS IN DATA SCIENCE

AUG 2022- MAY-2024
