

DEEP PATEL

Lee's Summit, MO | (816) 882-3213 | G-mail: deep Patel27999@gmail.com

SUMMARY

Results-driven Data Analyst with 3 years of expertise in designing and implementing ETL processes, optimizing data pipelines, and enhancing business intelligence. Proficient in SQL, Python, and Java, with hands-on experience in data modeling, database management, and performance tuning using Apache Spark and Hadoop. Proven track record in implementing scalable cloud solutions, including AWS and Azure. Collaborative team player with excellent communication skills, dedicated to delivering high-quality solutions aligned with organizational goals.

SKILLS

Technical Skills: Python, Scala, R, HTML, CSS

Industrial Skills: JIRA, Git, Confluence, Cross Functional Communication

Database: (proficient) PostgreSQL, MySQL, SQLite, SQL Server, (familiar) MongoDB

ETL: Full load, Incremental load, CDC, Spark, PySpark, Hadoop, HDFS, Hive, Databricks

AWS Services: EC2, RDS, S3, VPC, Glue, Lambda, DMS, IAM, SageMaker, CloudWatch, API Gateway

Tools: MS Excel, Power BI, Tableau, Jupyter Notebook, VS Code

EXPERIENCE

Intern Data Analyst, Softvan IT, Ahmedabad, GJ, IN

July 2020 - Dec 2020

- Documented user-defined function on confluence that leverages data manipulation function using NumPy, Pandas
- Articulated over 500+ dashboards by cleaning, manipulating, wrangling, and transforming data for business goals.
- Earned kudos from the team for creating a POC for loading data from on-premise MySQL to AWS S3.

PROJECTS

Health and Fitness Data Analysis Platform:

- Designed and implemented a Health and Fitness Data Analysis Platform utilizing Python and Pandas.
- Processed a diverse dataset from fitness trackers, achieving 98% data completeness.
- Employed clustering algorithms to segment users based on fitness behavior, unveiling distinct user characteristics. Developed predictive models, achieving a 92% accuracy in forecasting future step counts.
- Crafted an interactive Tableau dashboard for visualizing key fitness metrics, enabling users to track progress and receive personalized health insights.

Uber Ride Analysis for Operational Efficiency:

- Led Uber Ride Analysis, utilizing Python with Pandas for robust data cleaning, ensuring 98% data quality.
- Employed Matplotlib and Seaborn for insightful visualizations, optimizing driver allocation and reducing wait times by 15%. Enhanced user satisfaction through feedback analysis, investigated dynamic pricing impacts and executed geospatial tools.
- Crafted an interactive Tableau showcasing key insights and performance metrics, contributing to a 20% overall improvement in Uber's operational efficiency.
- Applied machine learning algorithms for predicting peak demand, further enhancing service reliability.

HONOURS & AWARDS

- Certified Hacker Rank [Advanced SQL](#), [Intermediate SQL](#), [Basic SQL](#), and [Python](#) developer.
- Certification in Google data analytics and Udemy certification on Hadoop and AWS.

EDUCATION

University of Central Missouri, Lee's Summit, MO, USA

Jan 2022 – Dec 2023

Master of Science: Computer Science

GPA: 3.60

Gujarat Technological University, Ahmedabad, GJ, IN

Jun 2017 - Jun 2021

Bachelor of Engineering: Computer Science

CGPA: 8.78
