Summary

I am a passionate developer with design focus, crafting beautiful and captivating user and interface experiences. My focus is to continually push my ability as a programmer in learning as many languages and skills in web design.

Experience

Nov 2022- PRESENT

Judah B. Sullivan

Grand Rapids, MI – *FreeLance Full Stack Developer*

- Building Modern Full Stack Web and Mobile applications using Html, CSS, and Javascript.
- I specialize using frameworks such as NextJS, ReactJS, React Native, and Vue/Nuxt. Depending on the complexity and need of the client.
- Using modern styling libraries such as Tailwind, Scss, Styled Components, Chakra-UI and Material.
- Building backends using Content Management Platforms such as Strapi, Contentful and Sanity.io or NodeJS.
- Working with RestFUL Apis. graphql, groqQL, mySQL, SQLite, and noSQL.
- Using Deployment services such as Hostinger, Netlify and Vercel. Setting environment variables and webhooks.
- Proficient knowledge of using git and version control.

Jun 2022 - Nov 2022

Robert Half,

Grand Rapids, MI – *Technical Support I/ PassPort Customer Service*

- Help with administrative access and password changes.
- Make Reports to the upper IT teams of issues going on in the system and websites.
- Answer Phones with the Call Center Team to help customers get scheduled or general information for their passports.

Aug 2020 - Jun 2021

Rocket Power- Nuro Ai,

Houston, TX- *Junior Devops/Autonomous Vehicle Operator*

- Performed Vehicle Safety checks alongside Computer Systems checks, after Team meetings.
- Would contribute by completing objected milage in autonomous mode.
- Reported any bugs and issues, whenever bugs would show themselves to the engineers.
- Performed Machine Learning procedures alongside Engineers.
- Helped System connectivity support so the Engineers in california could safely take control of the cars. Allowing them to operate it safely.
- Contributing to end of the day report meetings so we as a team could always be on the same page.
