SKILLS

- **Languages** Python, R, C#, Java, JavaScript, HTML, SQL
- **Tools/Frameworks** GitHub, Azure, NIST, Microsoft project, AI, VS code, Jira
- **Databases** MySql workbench, Microsoft SQL server,
- **Other** User Research, AWS, Google cloud platform , Data Analysis, Networking, Penetration testing, Cyber forensics, troubleshooting, data mining

EDUCATION

Bachelor of Science in Information systems and technology

January 2022 – May 2025

California State University of San Bernardino

- GPA: 3.75, Relevant Courses: Data Structures, Web Dev, Databases, Software Engineering, Enterprise system Administration, big data structures, Pen. Test and ethical hacking, Cyber investigation and incident handling, Networking, Cyber Security, Cloud technologies

PROJECTS

Fitness website

project using Python, C#, Java, HTML

- Designed and deployed a website that allows user login, user profiles, calculations, recommends workouts and stores information in a database.

Red team vs blue team

Created a pen testing environment, also pen tested another created environment

- Built a enterprise network with a website, database, email server, firewall, Active directory, And DNS server.
- Ran security checks and deployed monitoring techniques, along with cyber investigation. Tested the opposing systems setup and security.

Data Analysis

Using R

- Analyzed dataset and visualized trends
- Shared insights via tech repository, deployed data mining techniques.

WORK EXPERIENCE

Computer Lab Assistant

August 2024 – May 2025

California State University of San Bernardino, San Bernardino

- Provided Tier 1 tech support to 18000+ students and professors
- Assisted with hardware and software setup, usage, and troubleshooting
- Documented solutions and improved knowledge base resources

CERTIFICATES

Red Hat System Administration I (RH124)

November 2025

- This course provides a foundational introduction to Red Hat Enterprise Linux, covering essential skills such as command-line usage, file and user management, text editing, networking, and system security. It also teaches software installation, remote access configuration, log analysis, and troubleshooting using both command-line tools and Red Hat support resources.

Red Hat System Administration II (134)

December 2025

- This course builds on Red Hat Enterprise Linux skills by teaching advanced command-line productivity, task automation, system performance tuning, SELinux security, storage management, and container usage. It is designed for system administrators—especially those with Windows or Linux backgrounds—who are responsible for installing, configuring, maintaining, and securing Linux systems in enterprise or cloud environments.
