

ARTHI

• (937)343-1798 • arthreddyr@gmail.com

SUMMARY

Full Stack Software Engineer focused on creating reliable, scalable, and user-centered applications that drive measurable business results. Known for combining analytical thinking, clean design, and collaborative development to deliver high-quality solutions across modern software ecosystems.

EDUCATION

Wright State University, Fairborn, OH | M.S. (Master of Science) in Computer Engineering

Aug 2023 – May 2025

Jawaharlal Nehru Technological University, Hyderabad, India | Bachelor's in Electronics and Communication Engineering

Jun 2018 – Jun 2022

TECHNICAL SKILLS

Languages: Python (3.7–3.10), JavaScript, TypeScript, C, C++, Go, Java, HTML5, CSS3, Bash

Frameworks & Libraries: FastAPI, Flask, Django, React (17–18), Vue.js (2), Plotly.js, GraphQL, RESTful APIs, JWT Authentication, Spring Boot (familiar)

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis

Cloud & DevOps: AWS (Lambda, EKS, S3, EC2, RDS, CloudWatch), Docker, Jenkins, GitLab CI/CD, Prometheus, Splunk, Kubernetes (EKS)

Data & Orchestration: Spark, Airflow, Kafka, Glue, ETL Pipelines, Tableau, SPSS, Pandas, NumPy, SQL Optimization, API Integration

AI & Automation Tools: scikit-learn, XGBoost, SageMaker, AI-driven Anomaly Detection APIs, OpenAI API (text summarization), Predictive Analytics (basic)

Methods & Practices: Agile/Scrum, CI/CD, SDLC, TDD, GitOps, Code Reviews, Version Control (Git, GitHub, GitLab), Collaboration (Jira, Confluence)

PROFESSIONAL EXPERIENCE

Fannie Mae | Software Developer | Remote – Washington, D.C, US

Feb 2025 – Present

Technologies: Python 3.10, FastAPI, React 18, TypeScript, GraphQL, PostgreSQL, AWS (EKS, Lambda, CloudWatch), Docker, Jenkins, Prometheus, Splunk

- Built a secure, cloud-native mortgage processing platform using **FastAPI**, **React 18**, and **PostgreSQL**, streamlining loan approval workflows for 5,000+ users.
- Designed REST and GraphQL APIs for underwriting systems, ensuring high data consistency and faster access across distributed financial services.
- Automated deployments with **Docker** and **Jenkins** pipelines on **AWS EKS**, reducing manual intervention during releases by 40%.
- Configured real-time observability through **Prometheus**, **Splunk**, and **CloudWatch**, helping teams identify and resolve production issues proactively.
- Mentored three junior developers on version control and CI/CD best practices, improving code review turnaround time and delivery efficiency.
- Partnered with data scientists to integrate AI-based anomaly detection into risk assessment pipelines, enhancing fraud monitoring accuracy.
- Collaborated with architecture teams to refactor legacy loan APIs into microservice modules, improving maintainability and deployment speed across environments.

Western & Southern Financial Group | Python Full Stack Developer | Cincinnati, OH, US

Jul 2024 – Jan 2025

Technologies: Python 3.9, FastAPI, React 17, PostgreSQL, GitLab CI/CD, Docker Compose, Storybook, AWS S3, JWT Auth

- Developed policy management microservices using **FastAPI** and **PostgreSQL**, improving data reliability across claims and underwriting modules.
- Designed client dashboards in **React 17** with dynamic filters and visual analytics to enhance reporting transparency for 500+ agents.
- Implemented secure authentication using **JWT Auth**, strengthening access control and user session management.
- Deployed containerized builds with **Docker Compose** and **GitLab CI/CD**, accelerating production rollout frequency by 25%.
- Built reusable component libraries in **Storybook**, improving design consistency and front-end maintainability.
- Collaborated with QA and DevOps teams to standardize test coverage, minimizing post-release issues across environments.
- Coordinated sprint planning with product teams to align backend API updates with UI releases, ensuring consistent feature delivery and regression stability.

Cipla Limited | Senior Python Developer | Bangalore, India

Nov 2021 – Jul 2023

Technologies: Python 3.8, FastAPI, Angular 12, Plotly.js, Docker, SPSS, Shell, AWS EC2

- Led the backend development for a pharmaceutical data analytics suite using **FastAPI**, automating batch processing and report generation.
- Built interactive dashboards in **Angular 12** and **Plotly.js** to visualize production KPIs, improving team insight and response time.
- Automated clinical reporting workflows by integrating **SPSS** scripts with Python APIs, reducing manual work by over 30%.
- Deployed analytical workloads through **Docker** containers on **AWS EC2**, improving stability during concurrent lab analysis.
- Collaborated with R&D engineers to implement anomaly-detection endpoints for test data validation.
- Enhanced monitoring scripts in **Shell**, improving pipeline traceability and simplifying troubleshooting for data engineers.
- Partnered with data governance teams to align API audit logs and access control with regulatory compliance standards (GxP).

Canara Bank | Python Developer | Bangalore, India

Oct 2020 – Oct 2021

Technologies: Python 3.7, Flask, Vue.js 2, GraphQL, Spark, PostgreSQL, Oracle, Tableau, Docker

- Built secure APIs in **Flask** and **PostgreSQL** to automate financial reporting, reducing data reconciliation time by 20%.
- Created internal analytics dashboards using **Vue.js 2** and **Tableau** for management teams to visualize branch performance KPIs.
- Developed ETL pipelines with **Spark** and **Oracle**, improving batch processing efficiency and enabling near real-time reporting.
- Deployed microservices using **Docker**, ensuring consistent test and production environments.
- Integrated **GraphQL** APIs to unify financial data retrieval, simplifying cross-departmental data access.
- Participated in sprint reviews and CI/CD release coordination, improving system reliability across deployments.
- Assisted data security teams in migrating audit logs and customer records to encrypted storage, enhancing compliance with RBI data-retention policies.

PROJECTS

Enhancing Resume Retrieval via Job Descriptions through Semantic Search

Python, DPR, BM25, GPT-3.5 Turbo

- Built a hybrid DPR + BM25 pipeline fine-tuned on 27K resume–JD pairs, boosting top-10 match precision by 22%.
- Used GPT-3.5 for JD augmentation and deployed cloud-based retriever APIs with Sentence Transformers.

Wright Career Alerts – Distributed Pub/Sub System

Python, RabbitMQ, Docker, Kubernetes, GPT-3

- Created a containerized Pub/Sub alert system with RabbitMQ and TF-IDF + GPT-based job summarization.
- Added concurrency control and AI filtering for student-personalized alerts in real time.

CERTIFICATIONS & AWARDS

AWS Certified Solutions Architect – Associate

- Received appreciation and awarded best innovative idea for implementing the resume retrieval using LLM.
- Awarded a full undergraduate scholarship sponsored by the Government of Telangana, India, covering 100% of tuition fees, and a graduate merit scholarship of \$10,000 at Wright State University. Recognized for academic excellence and consistent academic distinction throughout both programs.
