Profile

Data Analyst with 2+ years of experience in leveraging advanced analytical techniques and machine learning algorithms to drive data-driven insights and solutions. Proficient in Python, R, SQL, and familiar with a suite of data visualization tools like Tableau and Power BI. Skilled in statistical analysis, data preprocessing, and predictive modeling. Strong understanding of data mining, machine learning, and statistical modeling.

Skills

Core Expertise: Machine Learning, AWS, NLP, Data Engineering, Data Visualization and Data Warehousing.

Programming & Scripting: Python, JavaScript, R (R Markdown, Dplyr, Tidy verse, GGplot2, Prophet), SQL, NoSQL, DAX and Shell scripting.

Frameworks & Tools: Pandas, NumPy, Matplotlib, Scikit-Learn, Tensorflow2, PyTorch, Spacy, Hugging Face, Tableau, Power BI, JIRA, Confluence, Git, AWS (EC2, S3, EBS, Lambda, IAM, EMR, CloudWatch, CloudTrail) Docker, Microsoft Excel (VLOOKUP, Pivot tables), Dremio, MongoDB and Snowflake.

ML Techniques: Linear/ Logistic Regression, ARIMA, Time Series Analysis & Forecasting, SVM, Decision Tree, Bagging (Random Forest), Boosting (XGBoost, AdaBoost), K-Means clustering and Neural Networks (CNN, RNN, Transformers).

Professional Experience

Data Analyst, Anblicks

01/2023 – present | Remote, USA

- Engineered and managed Apache Kafka pipelines for real-time ingestion and processing of diverse customer datasets, ensuring timely availability of critical data for analysis.
- Performed comprehensive data cleaning, exploration, engineering, and visualization facilitating data-driven insights and decision-making using Pandas and Matplotlib.
- Designed and developed interactive Power BI dashboards and reports that translated complex data analyses into actionable insights, empowering stakeholders with real-time, visually compelling decision tools.
- Architected and implemented scalable data lake and data warehouse solutions, optimizing data accessibility and reliability for analytics and reporting purposes.
- Leveraged AWS services such as Amazon S3, EC2, EMR to design, deploy, and optimize data processing pipelines and storage solutions resulting in cost savings and improved scalability for data-intensive operations.
- Applied machine learning algorithms using TensorFlow, to develop and optimize predictive models, conducting rigorous testing and hyperparameter tuning to get the most optimal model.
- Orchestrated A/B testing initiatives that led to a 20% reduction in customer churn rates within one year.

Data Analyst, Genpact

03/2020 – 05/2021

- Developed and executed an advanced analytics project focused on enhancing anomaly detection in human bone X-rays deep learning models.
- Conducted comprehensive data preprocessing such as Noise Reduction, Contrast Enhancement, and Image Resizing on image datasets using OpenCV to refine and optimize data quality.
- Utilized TensorFlow to develop and deploy robust deep learning models, leading to significant improvement in precision and F1 score.
- Designed and deployed model using scalable data pipeline using Apache Airflow, automating data processing tasks and enhancing workflow efficiency.
- Worked with Power BI for in-depth visualization and interpretation of machine learning model outcomes, providing actionable insights and improving decision-making processes in medical diagnostics.

Education

Master of Science, Stevens Institute of Technology
Computer Science

08/2021 – 05/2023 | Hoboken, USA

Bachelor of Technology,
Charotar University of Science and Technology
Computer Engineering

07/2017 – 05/2021 | Gujarat, India
