EDUCATION

Washington State University

Master of Science, Computer Science | GPA: 3.93/4.00

Pullman, WA, USA

Jan 2024 - May 2025

Relevant Coursework: Artificial Intelligence · Advanced Algorithms · Computer Vision · Data Science · Machine Learning · Neural Network · Reinforcement Learning · Software Design & Architecture · Web Security

Sastra University

Bachelor of Technology, Computer Science Engineering | GPA: 7.55 / 10.00

Tanjore, India

Jun 2017 - May 2021

SKILLS & CERTIFICATIONS

Programming: Java, Python, R, Scala

Database: Snowflake, SQL, MySQL, Teradata SQL, OracleDB, MongoDB

Libraries/Tools: Airflow, Docker, Excel, Git, GitHub, Hadoop, Microsoft Office 365, ServiceNow, Spark, Tableau, Power BI

Cloud Technologies & Development Practices: Azure, Data Engineering, Data Pipelines, ETL, Cloud DevOps

Certifications: SnowPro Associate: Platform Certification · GitHub Foundations · Infosys Certified: Snowflake and Data Warehouse Developer, Spark Professional, Database and SQL Associate, Business Intelligence Associate · Architecting with Google Compute Engine · Postman API Fundamentals

WORK EXPERIENCE

Software Trainee

Redmond, WA

Quadrant Technologies LLC

July 2025 – Present

- Building an AI-driven [management web application](#) using Python (Django), React Vite and Azure Services, focusing on AI/ML, user dashboards, cloud services and DevOps by leveraging Microsoft Azure services to support scalable, production-ready deployment.

Student Success Advisor, Instructor

Pullman, WA

Office of Academic Engagement, Washington State University

Aug 2024 – May 2025

- Delivered engaging lectures as a substitute instructor for UNIV 104 at Washington State University, supporting over 120 students in becoming more academically involved on campus. I have helped over 90% improve their grades.

Data Engineer

Bangalore, India

Infosys Ltd - Client: Apple Inc

Sep 2021 - Dec 2023

- Converted 500+ SQL Stored Procedures from Teradata to Snowflake using Python, sourcing core data from GCP and AWS and storing them in semantic tables. Automated job monitoring with Python-Selenium, saving 2 hours daily, and maintained ETL pipelines using Airflow and Excel for quality assurance. We leveraged git to update Stored procedures daily for the migration project.
- Managed ServiceNow tickets and performed financial reporting using Tableau and BI tools, ensuring 100% billing accuracy; contributed to open-source projects via GitHub during Hacktoberfest for 2 consecutive years.

Technical Content Writer

Bangalore, India

Ashwin Aptitude Classes

Jul 2021 - Sep 2021

- I developed comprehensive training programming solutions in C, C++ and Java to train over 200 students of non-tech backgrounds.

Research Intern

Trichy, India

National Institute of Technology

May 2019 - Jun 2019

- Researched and simulated cache-based side-channel attacks using open-source tools (e.g., Flush+Reload, Prime+Probe).
- Implemented and evaluated mitigation techniques across multiple system configurations to enhance system security.

PROJECTS

[Elariis](#)

(Jul 2025 - Present)

- Developed an internal web portal tool with a team of 6, featuring modules (Employee, HR & IT ticket management and learning hub) with BI dashboard and AI enhancements including RAG chatbot, training course recommenders and job matching with resume.

[FlavorBlend](#)

(Feb 2025)

- Collaborated in a team of 4 to develop FlavorBlend for hackathon, an AI-powered application that generates culturally blended recipes from 190+ countries using LLaMA 3 and diffusion models for text-to-image generation and integrated Firebase Authentication.

[WhisperRx](#)

(Mar 2025)

- Developed WhisperRx, an AI-driven web application that transcribes doctor-patient conversations into structured SOAP medical reports using Cloudflare Whisper and Llama 3 models, helping medical staff save 45% time in documentation.
- Engineered a user-friendly UI using HTML/CSS and JavaScript, leveraging prompt engineering, to complete the project in 3 days.

[Neural Network-Driven Histopathological Tumor Classification](#)

(Aug 2024 - Dec 2024)

- Tumor classification using Inception V3 & RNNs models; achieved 84% accuracy in distinguishing adenoma vs. adenocarcinoma.

HACKATHONS, ACHIEVEMENTS & EXTRA CURRICULAR

- Won 1st place in internship for developing an [internal tool](#), earning opportunity to implement it in real-time within the company.
- Won Best AI App Built with Cloudflare and Coca-Cola Scholarship - Best Growth Potential at [CrimsonCode Hackathon 2025](#).
- Our project won Honourable mention for AgAID Digital AgAth0n 2025 hackathon for [Snowpack Prediction Challenge](#).
- Entrepreneurship Cell, SASTRA - Led teams of about 50 students across marketing, media, and treasury divisions for 2.5 years.
