Summary

Data Analyst with 3+ years of experience in analytics, intelligence, and predictive modelling across healthcare, insurance, and digital domains. Skilled in Python, SQL, Spark, Tableau, Power BI, and Snowflake to deliver insights and automate ETL workflows. Proven track record of driving cost savings, risk mitigation, and customer engagement improvements through robust data pipelines, statistical analysis, and stakeholder collaboration in Agile environments.

Education

Master of Science University of Central Missouri, Lee's Summit, Missouri	Aug2023 – May 2025
Bachelor of Technology Joginpally B.R. Engineering College, Hyderabad, India	June 2018 – July 2022

Skills

- **Programming & Analysis:** Python (Pandas, NumPy, Scikit-learn, Statsmodels, Plotly), R, VBA, Regex, APIs
- **SQL & Data Warehousing:** Complex Joins, CTEs, Indexing, Explain Plan, Snowflake, Redshift, PostgreSQL, SQL Server, BigQuery, Delta Lake, Synapse, dbt (dbt Cloud)
- **Visualization & BI:** Tableau (LOD, Parameters, Blending), Power BI (DAX, Drillthrough, Row-Level Security), Looker (LookML), Qlik, Excel (PivotTables, Solver, Macros), Google Data Studio, Streamlit, Alteryx
- **Data Engineering & Orchestration:** PySpark, Databricks, AWS Glue, Talend, Apache Airflow, Kafka, Docker, Jenkins, Terraform, Data Lake Partitioning, Data Lake
- **Statistics & ML:** Logistic/Linear Regression, Clustering (K-means, DBSCAN), Isolation Forest, LightGBM, Time-Series (ARIMA, ETS), Hypothesis Testing, A/B Testing, Feature Scaling, PCA, SHAP Interpretability, MLflow, SageMaker, Feast
- **Data Quality & Governance:** Collibra, Alation, Great Expectations, Validation Scripts, Anomaly Detection, Data Cataloging, Controlled Access, GDPR & HIPAA Tagging, OAuth2, RBAC
- **Project & Delivery:** Agile, Scrum, JIRA, Confluence, Storyboards, BRDs, FRDs, UAT, Stakeholder Workshops
- **Marketing & CRM Analytics:** Google Analytics, Salesforce, HubSpot integration

Experience

DXC Technology - USA Data Analyst	Jan 2025 - Current
• Designed and maintained robust ELT workflows by integrating dbt Cloud transformations on Snowflake with SQL Server data marts, processing large datasets to support weekly dashboards that improved visibility into business performance across product lines. • Developed advanced LightGBM churn prediction models tracked via MLflow, automating daily scoring jobs that fed into Looker dashboards, enabling marketing teams to adjust business strategies in near real-time and reduce churn by 12%. • Conducted detailed ad-hoc data analysis on cohort retention trends using Python and PostgreSQL, providing recommendations that directly informed pricing experiments and customer segmentation. • Automated critical month-end close processes by building Excel VBA scripting tools with Power Query and Solver, shortening financial reconciliation from 5 days to under 48 hours. • Partnered with cross-functional teams in marketing, finance, and IT to define key performance indicators (KPIs), embedding them into LookML models that standardized metrics across executive reports. • Implemented Great Expectations validation scripts across Snowflake staging tables, proactively flagging anomalies and enhancing trust in core reporting solutions by 40%. • Documented data lineage, glossary definitions, and transformation logic in Confluence, while managing Agile sprints and backlog priorities in JIRA, achieving a 95% on-time delivery rate for analytics initiatives.	
CitiusTech - India Data Analyst	Jan 2021 - Aug 2023
• Engineered end-to-end ingestion and transformation pipelines with Talend, Kafka Streams, and PySpark, loading multi-format datasets into Snowflake to support actuarial models for payer business strategies. • Designed Tableau dashboards using LODs, bullet charts, and parameter controls to track readmission KPIs, enabling client teams to monitor business performance and optimize care management programs. • Developed robust A/B testing frameworks in Python (Statsmodels, SciPy) and R, conducting power analyses and hypothesis tests on telehealth engagement campaigns that improved ROI by 20%. • Implemented orchestration with Apache Airflow, automating Snowflake ELT jobs and downstream Tableau extract refreshes, cutting manual handoffs by 80% and ensuring timely reporting solutions. • Managed Alation data catalog, tagging PHI/PII columns for GDPR & HIPAA compliance, improving data traceability and reducing audit turnaround times by 50%. • Collaborated with cross-functional stakeholders including compliance, actuarial, and operations teams to design robust data collection methodologies, supporting scalable analytics workflows. • Automated actuarial Excel models with ODBC live Snowflake pulls, empowering teams to perform ad-hoc data analysis without waiting on IT extracts, which reduced cycle times by 2 weeks. • Coordinated JIRA sprints and authored BRDs & FRDs that documented acceptance criteria for new data pipelines, aligning delivery to regulatory audit schedules.
