Professional Summary

I'm a **software engineer** with a **Master's degree in Computer Science** from the **University of North Texas** and about **3 years of hands-on experience in software development**. I've worked on a wide range of projects, from building **full-stack web applications** and **cloud deployments** to **AI projects** and **embedded systems**. I'm comfortable working with **Java, Python, Angular**, and cloud platforms like **Azure** and **GCP**. I enjoy solving **real-world problems**, building **user-friendly solutions**, and working closely with teams in **fast-paced, agile environments**.

Education

University of North Texas | Denton, TX | May 2025

Master of Science | Computer Science

Technical Skills

Programming Languages: Java, Python, JavaScript, HTML, Angular

Cloud Platforms: Microsoft Azure (Certified), Google Cloud Platform (GCP)

Azure Tools & Skills: Azure Functions, App Services, Key Vault, Azure Storage, Event Grid, Service Bus, Azure DevOps, GitHub Actions, CI/CD Pipelines

Databases: Oracle, SQL, MongoDB, H2

DevOps & Tools: Git, VS Code, Eclipse

BI & Analytics: Tableau, Power BI

Embedded Systems: MicroBit, LEGO Spike, Arduino

Concepts: Object-Oriented Programming (OOP), Embedded Systems, Artificial Intelligence (AI), Machine Learning (ML), Cloud-Native Architecture

Methodologies: Project Management, Agile, Scrum

Productivity Tools: Microsoft Office Suite.

Professional Experience

Software Development Intern

Soulstice Dating - Carrollton, Texas | Feb 2025 – Present

- Develop and maintain scalable front-end and back-end applications using **Angular, Python (Flask)**, and **MongoDB**.
- Integrated Auth0 for secure authentication and role-based access control (RBAC), enhancing overall security and user data protection.
- Improved security and UI responsiveness for better user engagement.
- Employed **Git, Agile practices**, and **CI/CD pipelines** for streamlined version control and efficient team workflows.

AI & Embedded Systems Instructor

University of North Texas - Denton, Texas | May 2024 – Aug 2024

- Instructed over 180 middle school students in learning **Python programming** using Microsoft VS Code, encouraging early exposure to computer science.
- Conducted hands-on sessions on **embedded systems** using **Microbit** and **LEGO Spike**.
- Facilitated **AI-based challenges**, such as object detection and robotic navigation, to introduce foundational machine learning concepts.
- Fostered interactive learning through live demos, problem-solving sessions, and group projects, enhancing student engagement.

System Engineer

Tata Consultancy Services Limited (TCS) - Telangana, India | Aug 2022 - Sept 2023

- Worked on full-stack development for major banking clients like **Bank of America** and **IndusInd Bank**, using **Core Java**, **Oracle**, and **Apache Tomcat**.
- Used **H2 Database** for writing and running unit tests, making sure code was solid before going live.

- Helped improve performance and fix critical bugs, which made the apps more reliable and kept clients happy.
- I took part in **Agile/Scrum sprints**, where I planned tasks, reviewed code, and rolled out updates based on client feedback.
- Helped redesign an older banking platform, making the interface cleaner, faster, and more user-friendly.

Associate System Engineer

Tata Consultancy Services Limited (TCS) - Telangana, India | Aug 2021 – Aug 2022

- Helped build and improve web applications for banking clients like **Bank of Baroda**, using **Core Java**, **Oracle**, and **JBoss server**.
- Used **H2 Database** for unit testing to make sure features worked as expected before going live.
- Worked on making the applications faster and easier to use by improving **performance** and **user interface design**.
- I took part in **Agile sprints**, collaborated with the team on day-to-day tasks, and helped update older systems to make them more modern and user-friendly.

Embedded Systems Intern

National Small Industries Corporation (NSIC) – Hyderabad, India | Jun 2020 – Aug 2020

- Gained hands-on experience in **circuit design**, **PCB development**, and **microcontroller programming** as part of a hardware-focused IoT internship.
- Designed and built a **real-time accident detection and alert system** using **Arduino**, **GSM module**, and **GPS** for automatic location-based emergency notifications.
- Developed printed circuit board (PCB) layouts and conducted prototype testing to validate system performance and hardware reliability.
- Strengthened understanding of **IoT system integration**, **sensor interfacing**, and **embedded C programming**.

Projects

California Wildfire Damage Analysis | GCP

- Analyzed 2014-2025 California wildfire data using BigQuery, OpenRefine, GCP Storage, and Looker Studio.
- Cleaned, visualized, and interpreted key financial and geographical trends.
- Delivered data-driven recommendations for disaster preparedness and resource allocation.

Zena – A Desktop Voice Assistant

- Designed a voice assistant with capabilities like playing music, accessing files, web search, and sending emails.

Automatic Hand Sanitizer & Smart Door/Bin

- Built sensor-based Arduino projects for contactless sanitation and automation systems.

Achievements

- **Best Team Award** – Tata Consultancy Services (TCS) – *March 2023*
Recognized for successful delivery of a scalable and user-centric online banking solution for IndusInd Bank, enhancing client satisfaction and platform reliability.

Certifications

- **Microsoft Certified: Azure Developer Associate (AZ-204)** – *June 2025*
- **Java Programming** - Udemy
