

AASHRITHA SANDIRI

Dallas, TX | sandiriaashritha@gmail.com | +1 (940) 843-7596 | <https://www.linkedin.com/in/aashritha-sandiri-227526206/>

Professional Summary

I'm a **Software Engineer** with a **Master's degree in Computer Science** from the **University of North Texas** and over **3 years + of experience** in full-stack development, cloud deployment, and AI-based systems. Skilled in **Java, Python, Angular, and cloud platforms (Azure, GCP)**. Passionate about solving real-world problems through scalable, user-centric software. Adept at collaborating in agile environments, optimizing performance, and delivering clean, reliable code.

Education

University of North Texas | Denton, TX | May 2025

Master of Science | Computer Science

Technical Skills

Programming Languages: Java, Python, JavaScript, HTML, Angular, Go

Cloud Platforms: Microsoft Azure (Certified), Google Cloud Platform (GCP)

Azure Tools & Skills: Azure Functions, App Services, Key Vault, Azure Storage, Event Grid, Service Bus, Azure DevOps, GitHub Actions, CI/CD Pipelines

Databases: Oracle, SQL, MongoDB, H2

DevOps & Tools: Git, VS Code, Eclipse

BI & Analytics: Tableau, Power BI

Concepts: Object-Oriented Programming (OOP), Embedded Systems, Artificial Intelligence (AI), Machine Learning (ML), Cloud-Native Architecture

Methodologies: Project Management, Agile, Scrum

Professional Experience

Software Engineer

Soulstice Dating - Carrollton, Texas | Aug 2025 – Present

- Develop and maintain full-stack features using **Angular, Flask, and MongoDB**.
- Enhanced API performance, reducing page load times and improving user experience.
- Integrated **Auth0** with role-based access control and **NoonLight** safety protocols to strengthen platform security.
- Implemented an **AI-driven matchmaking API** to improve match recommendations and personalize user experiences.
- Involved in UI optimizations for mobile-first design, improving retention and engagement.
- Implemented **CI/CD pipelines** and **Agile workflows**, reducing deployment errors and accelerating release cycles.

Software Development Intern

Soulstice Dating - Carrollton, Texas | Feb 2025 – Aug 2025

- Built and optimized **web applications** with **Angular, Python (Flask), and MongoDB**.
- Integrated **AI-based matchmaking features** using third-party APIs to enhance compatibility scoring and user satisfaction.
- Introduced secure login and data protection using **Auth0** and **Noonlight** integrations.
- Collaborated in **Agile sprints**, utilizing **Git** and **CI/CD pipelines** for efficient and reliable team delivery.

AI & Embedded Systems Instructor

University of North Texas - Denton, Texas | May 2024 – Aug 2024

- Taught 180+ students fundamentals of **Python, embedded systems, and AI** using hands-on projects.
- Designed interactive activities using **Microbit** and **LEGO Spike**, promoting early STEM interest.

System Engineer

Tata Consultancy Services Limited (TCS) - Telangana, India | Aug 2022 - Sept 2023

- Delivered full-stack banking solutions using **Java, Oracle, and Tomcat** for clients including **Bank of America and IndusInd Bank**.
- Improved application performance and reliability through optimized queries and bug fixes.
- Contributed to a UI redesign that enhanced usability and load speed.
- Awarded "**Best Team Award**" (**March 2023**) for developing a scalable banking platform.

Associate System Engineer

Tata Consultancy Services Limited (TCS) - Telangana, India | Aug 2021 – Aug 2022

- Developed and enhanced web applications using **Core Java, Oracle, and JBoss server** for **Bank of Baroda**.
- Conducted unit testing with H2 Database, ensuring production-ready stability.
- Modernized legacy systems and contributed to Agile sprint planning and implementation.

Embedded Systems Intern

National Small Industries Corporation (NSIC) – Hyderabad, India | Jun 2020 – Aug 2020

- Designed and built a **real-time accident detection and alert system** using **Arduino, GSM**, and **GPS modules**.
 - Created printed circuit board (PCB) layouts and validated performance through prototype testing.
 - Strengthened expertise in **IoT system integration, sensor interfacing**, and **embedded C programming**.
-

Projects

California Wildfire Damage Analysis

Tech: BigQuery, OpenRefine, Looker Studio, GCP

Analyzed wildfire data (2014-2025) to identify key financial and geographic patterns. Cleaned and visualized datasets in Looker Studio, providing data-driven insights for disaster preparedness and resource allocation.

AI-Powered Matchmaking Engine

Tech: Python, Flask, TensorFlow, MongoDB, Docker

Built and deployed an **AI-based recommendation system** that analyzed user behavior to improve match accuracy by 20%. Packaged the model with **Docker** and deployed it as a scalable microservice.

Fake News Detection System

Tech: Python, Scikit-learn, TensorFlow, Streamlit

Developed a **Machine Learning Model** to classify news articles as real or fake using feature extraction and supervised learning techniques. Deployed through an interactive **Streamlit dashboard** for real-time prediction and visualization.

Zena – A Desktop Voice Assistant

Tech: Python, SpeechRecognition, pyttsx3

Developed a **voice-controlled desktop assistant** with capabilities like playing music, accessing files, web search, and sending emails.

Certifications

- **Microsoft Certified: Azure Developer Associate (AZ-204) – June 2025**
- **Master Java, Spring 6 and Spring Boot 3, Spring JPA, Security, Spring AI, Docker, and Microservices - Udemy**
