SUMMARY

Data Analyst with **3+ years of experience**, focused on **finance and regulatory risk analytics** with secondary expertise in **healthcare insurance**. Skilled in **Basel III, CCAR, IFRS 17 reporting, and liquidity risk modeling**, delivering more accurate forecasts and compliance outcomes. In healthcare, applied **fraud detection and claims analytics** under **HIPAA/IRDAI standards**, reducing claim leakage and improving adjudication speed. Proficient in **Python, SQL, R, Tableau, and Snowflake**, with a record of turning complex data into **executive-ready insights**.

EXPERIENCE

Data Analyst

- LTI MindtreeMay 2024 - Present, Boston, MA, USA
- Engineered capital optimization models embedding **Risk-Weighted Asset (RWA) harmonization and systemic buffer calibration**, improving regulatory capital forecasts by **24%** and enabling **flawless CCAR submissions under Basel III/IFRS 17 mandates**.
 - Deployed **high-volume trade & loan ingestion engines** across Snowflake and Oracle, reconciling **50M+ daily transactions** with sub-second latency and unlocking **\$2.3M in annual efficiency gains** through automated exception handling.
 - Delivered **treasury-grade liquidity monitoring suites** integrating **Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR), and Intraday Liquidity Stress Indicators**, reducing liquidity blind spots by **35%** and accelerating funding allocation decisions.
 - Calibrated **macroprudential stress simulations** spanning FX contagion, credit spread widening, and collateral haircut shocks—cutting computational runtime by **30%** while fortifying **Asset-Liability Management (ALM) resilience**.
 - Produced **advanced XVA (CVA/DVA/FVA) sensitivity analyses**, surfacing counterparty exposures that prevented potential **\$25M+ capital erosion**, directly informing risk committees and treasury liquidity strategies.

Junior Data Analyst

- ICICI Lombard InsuranceOctober 2021 - July 2023, India
- Revolutionized **claims fraud detection** by deploying advanced machine learning models across 500K+ health insurance claims, reducing fraudulent payouts by **14%** and safeguarding **₹10M+ annually**.
 - Transformed **claims settlement processes** by architecting Tableau/SQL adjudication dashboards covering 250+ hospitals, cutting settlement turnaround by **22%** and enabling near real-time executive oversight.
 - Engineered **automated policy verification pipelines** that processed 50K+ claims monthly, elevating first-pass resolution by **18%** and eliminating thousands of manual errors.
 - Set **new benchmarks in regulatory governance** by embedding HIPAA-aligned and IRDAI-compliant workflows, reducing audit discrepancies by **35%** and ensuring zero regulatory penalties.
 - Redefined **fraud risk management** by designing a predictive risk-scoring engine with underwriters and investigators, elevating fraud detection accuracy by **25%** and transforming claim adjudication into a **data-driven, intelligence-led process**.
 - Delivered **high-impact executive intelligence packs** on claim ratios, denial cohorts, and portfolio risk, directly influencing strategic decisions that improved medical loss ratios by **4.5%** across the business.

EDUCATION

Masters in Management Science and Information Systems

University of Massachusetts • Boston, MA, USA • 2025

Bachelors in Electronics and Communication Engineering

SRM Institute of Science and Technology- India • India • August 2019 – May 2023

PROJECT

Stress Testing & Liquidity Risk Analytics for Banking Portfolios

- University of Massachusetts - Boston, MA • August 2024 - December 2024
- Built **stress-testing frameworks** aligned with **Basel III and CCAR requirements**, simulating credit, market, and liquidity shocks on loan and trading portfolios; improved forecast accuracy of capital adequacy by **22%**.
 - Designed **liquidity risk models** incorporating **Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR)**, identifying funding gaps that could reduce potential shortfall exposure by **\$18M** during stress scenarios.
 - Developed **Tableau dashboards for treasury reporting**, visualizing intraday liquidity positions and capital buffers in real time, which accelerated executive decision-making and reduced regulatory reporting delays by **30%**.

Survival Modeling & Disease Progression in Liver Cirrhosis Patients

- SRM Institute of Science and Technology- India • November 2022 - March 2023
- Implemented **survival analysis techniques** (Cox regression, Kaplan–Meier, hazard modeling) on patient datasets, raising outcome prediction accuracy by **25%** compared to standard statistical methods.
 - Derived **risk profiles** from key lab markers (bilirubin, albumin, prothrombin time), lowering missed early-stage diagnoses by **30%** and improving treatment planning reliability.
 - Visualized **survival trajectories and therapy response patterns** through Tableau, cutting reporting cycles by **40%** and enabling clearer interpretation of clinical outcomes.

CERTIFICATIONS

IBM Data Science Professional Certificate

Coursera • 2025

SKILLS

- Programming & Data Tools:** Python (Pandas, NumPy, Scikit-learn), R, SQL (PostgreSQL, Oracle, Snowflake), Apache Spark, Tableau, Power BI
- Finance & Risk Analytics (Primary):** Basel III, CCAR, IFRS 17, Risk-Weighted Assets (RWA), Stress Testing, Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR), Capital Adequacy, Treasury & Liquidity Risk Reporting
- Healthcare Analytics (Secondary):** Claims Processing & Adjudication, Risk Adjustment Factor (RAF), ICD-10 Data Validation, Denial Management, HIPAA Compliance
- Machine Learning & Modeling:** Predictive Modeling, Regression Analysis, Ensemble Methods (Random Forest, XGBoost), Survival Analysis, Feature Engineering, Hyperparameter Tuning
- Cloud & Data Engineering:** AWS (S3, EC2, RDS, Lambda), Snowflake, ETL Automation, Data Pipelines, Workflow Orchestration (Airflow)
- Professional Strengths:** Regulatory Compliance Reporting, Data Storytelling for Executives, Agile Delivery, Cross-Functional Collaboration
