Education

University of Maryland, B.S. in Information Science Minor: Data Science

Expected May 2026

- President's Scholarship Recipient (2022-present)

- **Selected Coursework:** Database Design and Modeling , Technologies, Infrastructure and Architecture , Discrete Structures, User-Centered Design , Data Visualization and Presentation

Certifications

- Certified Data Science Associate — Issued by DataCamp, 2024
- Certified Associate in Python — Issued by OpenEDG Python Institute, 2021

Experience

Salesforce Developer Consultant, Temple View Capital — Remote

Sept 2025 – Dec 2025

- Built and shipped production features for a customer facing financial application using **React Native (Expo) and TypeScript**.
- Integrated frontend components with backend services through **REST APIs**, handling validation, loading states, and error cases.
- Collaborated closely with product stakeholders to translate requirements into scalable software solutions.
- Debugged production issues and iterated quickly to improve reliability and user experience.

Undergraduate Teaching Assistant — University of Maryland

Sept 2025 – Present

- Supported instruction for **INST335 (Teams and Organizations)** by facilitating group activities and case-based data analysis.
- Provided feedback on assignments and mentored students in applying information science concepts to collaborative problem-solving.
- Reinforced course material through guided practice, building communication skills in explaining technical content to non-technical peers.

Software & Data Analytics Intern, Temple View Capital — Bethesda, MD

June 2025 – Aug 2025

- Developed end to end features for a mobile loan application used in real world customer workflows.
- Built user interfaces using **React Native (Expo + TypeScript)** with dynamic multi step forms and state management.
- Created an **AI powered onboarding chatbot** to guide users through data entry, dynamically generating questions and validating inputs.
- Integrated backend APIs to securely store and process user submitted data.
- Tested, debugged, and refined application features prior to deployment.

Data Analyst Intern, Acira LLC — Remote

June 2024 – Aug 2024

- Built and supported internal tools for processing and validating structured data in a production environment.
- Debugged data pipelines and application logic to improve system reliability and accuracy.
- Worked with engineers and stakeholders to clarify requirements and deliver maintainable technical solutions.

Data Analyst Intern, Crown Castle — Remote

Jan 2024 – Feb 2024

- Built **computer vision workflows** using Python, Roboflow, and OpenCV to process and analyze fiber inspection data.
- Conducted **model training, tuning, and evaluation**, improving defect classification performance through iterative testing.
- Presented visual results and actionable insights to engineering leadership, translating technical outputs into business decisions.

Research Experience

Undergraduate Researcher, Vertically Integrated Projects (VIP) Team — University of Maryland

Sept 2025 – Present

- Conducting research on undergraduate experiences in research programs using **qualitative and mixed-methods approaches**.
- Applying **AI and statistical methods** to analyze survey and behavioral data, improving frameworks for evaluating student engagement.
- Developed skills in **exploratory data analysis, applied statistics, and data storytelling**, translating findings into insights for academic stakeholders.

Extracurriculars

Project Engineer, Hack4Impact UMD

Sept 2025 – Present

- Promoted after BootCamp graduation to serve as a **Project Engineer** on the Long-Term Success Team.
- Focused on updates and maintenance of the Hack4Impact-UMD website, application portal, and prior nonprofit projects.
- Contribute to full-stack development with emphasis on usability, maintainability, and clean code practices.

Sourcing Member & BootCamp Graduate, Hack4Impact UMD

Sept 2024 – May 2025

- Completed BootCamp training in UI/UX, frontend/backend development, and project scoping.
- Conducted outreach to nonprofits, assessed technical needs, and contributed to project scoping.
- Collaborated with the Sourcing team to build impactful nonprofit partnerships.

Skills

Programming Languages: Python, Java, JavaScript, TypeScript, SQL (MySQL), R, MATLAB, HTML/CSS

Frameworks & Libraries:React, React Native (Expo), Node.js, Pandas, NumPy, scikit-learn, Jupyter Notebooks

Tools & Platforms: Git, REST APIs, Firebase/Firestore, SQL Databases, Cloud Platforms (coursework)
