EDUCATION:

Master of Science in Information Systems

Aug 2023 – May 2025

California State University, Long Beach

Coursework: Business Data Analysis(Statistics), Database Management(Oracle, AWS), Machine Learning, Artificial Intelligence for Business Analytics.

Bachelor of Engineering in Information Technology

Aug 2018 – Sep 2022

Kadi Sarva Vishwavidyalaya, Gandhinagar, India

Coursework: Cloud Computing, Data Structures and Algorithms, Operating Systems, Object-Oriented Programming, Web Data management.

SKILLS:

Languages: Python, Shell Script, C++, C, JavaScript, HTML, CSS, SQL, R.

Data Analysis: MS-Excel, Tableau, MS PowerBI, R, Python, Alteryx.

Database Tools: MySQL, MongoDB, PostgreSQL, RDBMS.

Technologies: SAP BI/BO, SAP ERP, SAP BW, Jupyter Notebook.

DevOps: Linux, Git, GitHub, Jira.

Other: OpenCV, Object-oriented Design, Design Patterns, Keras, TensorFlow, MS-Office, Competitive Analysis, VBA, Postman, VS Code, Scikit Learn, Matplotlib, Pandas, NumPy, Problem-solving, KPI, SDLC, Matlab, Outlook.

WORK EXPERIENCE:

Business Intelligence Analyst | Yarra Information Technologies

June 2022 – July 2023

- Streamlined **ETL** processes using SAP **ERP**, achieving a **50%** increase in data loading speed from SAP Business Warehouse and utilized data mining techniques to extract insights from large datasets.
- Developed and maintained data extraction routines utilizing SAP BEx Analyzer, resulting in a **20%** enhancement in data precision, showcasing a dedication to refining processes and implemented data cleaning procedures to ensure data accuracy and consistency.
- Designed and executed complex data workflows using **SQL** and **data modeling** techniques, including work in SAP Query Designer, resulting in a **25%** increase in efficiency, demonstrating adaptability and creativity in addressing intricate data challenges and data integration.
- Improved data transformations, resulting in a **30%** increase in system performance, showcasing expertise in optimizing data processing for enhanced efficiency and **data visualization** techniques to drive insights by creating dashboards, reports using SAP BI/BO.
- Led a diverse **team of 10**, addressing customer needs prioritizing communication, interpersonal skills, CRM, and teamwork, while my meticulous attention to detail and problem-solving prowess ensured exceptional project execution and success.

Business Analytics Intern | Exam Bazaar

Dec 2021 – Jan 2022

- Conducted **quantitative analysis** on financial data to identify trends and patterns of **50+** emerging startups, venture capitalists, and fundraising efforts, demonstrating strong business understanding and market research skills.
- Reviewed **5+ business strategies** with a focus on critical thinking, applying decision analysis techniques to evaluate long-term sustainability, financial strength, and growth potential with the help of **predictive analysis**.
- Utilized MS Office, MS Excel(VLOOKUP, Pivot tables), and Power BI for data analytics, documentation, networking, and dynamic presentations skills, demonstrating versatility and efficiency in supporting **5+ business functions**.
- Managed project tasks diligently, conducted comprehensive online research to gather critical data, and contributed to a **10%** increase in efficiency, fostering well-informed data-driven decision making and strategic enterprise development.

PROJECTS:

E-commerce Recommendation System

- Implemented a collaborative filtering System in **Python** and **SQL**, improving UX with personalized product recommendations.
- Employed **Tableau** to seamlessly integrate dynamic visualizations of user behavior, providing valuable insights through qualitative analysis for customer product preferences, and elevating user engagement through the implementation of personalized recommendations.
- Utilized the recommendation engine to enhance user purchasing decisions, boosting business revenue substantially by **20%**.

Learn-O-Rate

- Leveraged HTML, CSS, Bootstrap, Github, speech recognition, py-audio, and Flask to enhance project functionalities effectively.
- Developed a web application utilizing py-audio to facilitate the narration of questions and speech recognition for the identification of user responses, effectively converting them into a document tailored for vocal interview-based examination preparation.
- Implemented advanced Natural Language Processing (**NLP**) models to thoroughly analyze and rate additional documents.

Plant Disease Detection System

- Leveraged Python, Numpy, Transfer Learning, Tensorflow, Matplotlib, Pandas, Keras, and CNN to develop a machine learning model.
- Strategically implemented data augmentation techniques, expanding the dataset by **20%** to significantly enhance the F1-score.
- Conducted a **comparative analysis** of F1-score and accuracy between 3 unique models, achieving a **30%** accuracy improvement.

Customer Segmentation and Behavior Analysis

- Successfully segmented customers into **5 distinct groups**, enabling targeted marketing efforts that resulted in a **15%** increase in sales.
- Identified and targeted high-value customers with personalized offers, leading to a **10%** improvement in customer retention.
- Collaborated with cross-functional teams to implement data-driven strategies that enhanced customer experience and satisfaction.
