SOFTWARE DEVELOPER

User Experience Optimization – Full Stack Development – Project Support – Integration Testing – Agile Methodologies

- Around 9 years of experience in utilizing Java tools in business, Web, and Client-Server environments using the latest Java/J2EE technologies for analysis, design, development, maintenance, installation, implementation, and testing on various platforms.
- Experienced in complete SDLC in both Web-based and Enterprise applications including Requirement Analysis, Implementation, and Maintenance, and experience with Agile and SCRUM.
- Proficient in Various AWS services such as VPC, EC2, S3, ELB, Auto Scaling Group (ASG), CloudFormation, Lambda, Step functions, Cloud watch, SQS, SNS, SES, AWS systems Manager etc.
- Working experience on the frontend using **React.js**, Next.js, Node.js, Redux, java script, **Angular11/13** framework and Bootstrap.
- Proven expertise in Computer Systems Integration (CSI), ensuring seamless connectivity and optimized performance across diverse platforms.
- Experienced in developing web-based applications using Python and JavaScript in LINUX-based OS.
- Experience in handling UI technologies like Angular 11, jQuery, CSS3, and HTML 4.0/5.
- Experience with CI CD pipeline to integrate the Java code to align with DevOps practices using Docker.
- Experience in React JS and working with React Flux Architecture.
- Expertise in several testing environments like JUnit, Selenium, Jenkins and expert in handling Unit Testing using Junit/TestNG.
- Proficient in using cloud technologies/platforms like Amazon Web Services (AWS), CloudWatch, CloudFront, Elastic Cache, S3, SQS, SNS, and AMI.
- Experienced in automating, configuring and deploying instances on AWS, Azure environments and Data Centers, also familiar with EC2, CloudWatch, CloudFormation and managing security groups on AWS.
- Developed applications using the latest technologies like Spring 3.x/4.x, REST-based Web Services (Axis2.0, JAX WS 2.0, JAX RS)
- Experienced in developing complex PL/SQL Queries, Procedures, Triggers, Stored Procedures, Packages, and Views in various databases such as Oracle, DB2, and MYSQL, SQL Server.
- Enhanced platform reliability by innovating and maintaining scalable back-end architecture to support 1M+ concurrent users, securing a consistent 90% uptime that set a new benchmark for future Amazon Web Services (AWS) projects for other teams.
- Proven expertise in unit testing, scripting and automation, system design, UI validation, canary testing, front- end and back-end development, debugging and troubleshooting, strategic planning, project reporting, and team training.

TECHNICAL SKILLS

Languages	Java 1.8/11/17, J2EE, Python 3.9,3.11
Java/J2EE Technologies	JSP, JSTL, JDBC, JSF, MVC, XML, JAXP, DOM, JNDI, Web services (REST/SOAP)
Design Tools	Rational Rose, Star UML, Enterprise Architect
Web Technologies	HTML, JavaScript, CSS, XML, React JS, Angular 9, 11/13, Node.JS, Java Script
Frameworks	Spring, Spring-Data, Spring Boot, Spring JDBC, Hibernate, Spring Core, Spring ORM, Spring MVC
Web/Application Servers	Web Logic, WebSphere, Apache Tomcat, JBOSS
Cloud	AWS
Version Control Tools	GIT, SVN, CVS
Build Tools	Ant, Maven, Gradle
Database Environments	Oracle, SQL, MySQL, NoSQL
Operating Systems	Windows, Mac, Linux and UNIX

AMAZON WEB SERVICES • Seattle, WA**Aug 2022- Feb 2025***Amazon Web Services, Inc. provides on-demand cloud computing platforms and APIs to individuals, companies, and governments.***Software Development Engineer**

Recruited to design, develop, and maintain innovative software solutions to provide a seamless experience to millions of AWS users, ensuring high system availability, reliability, and seamless functionality.

- Drove efficiencies and mitigated critical issues before release by streamlining testing protocols and verifying the functionality of a UI builder through extensive testing, including user interface, integration, canary, and security assessments.
- Reduced support dependency and expanded AWS's accessibility to a broader client base by simplifying user interface customization and pioneering a no-code or low-code UI builder, allowing non-technical users to personalize the interface easily.
- Boosted team productivity by 15% and cross-functional collaboration among 10+ team members through meticulous documentation of each development phase, ensuring clarity and continuity throughout the project lifecycle.
- Improved deployment cycles by leveraging canary testing with Postman to expedite project delivery and meet strategic deliverables, reinforcing API security to minimize deployment-related downtime and ensure seamless integration.
- Engineered and optimized public APIs, enabling seamless customer integration for CRUD operations & customizable view pages.

BCBS, Richardson, TX**May 2021-May 2022****Role: Java Full Stack Developer**

- Followed Agile/Scrum methodology for project development, task tracking, and day-to-day work and involved in design and requirement analysis discussions.
- Developed presentation layer using JSP, HTML5, CSS3, and client validation using JavaScript, and DOM.
- Used two-way data binding features of AngularJS to implement Data binding to bind various server controls to the data from the database.
- Developed the application on micro-service design. The application consists of seven modules.
- Writing services in Spring Boot and running and deploying them in the cloud.
- Used Java 1.8 Method References feature to point to methods by their names and used functional Interfaces. Used Java 1.8 Streams and Parallel Streams they consider collection as its source.
- Designed and developed RESTful Services to retrieve configuration JSON documents related to customers.
- Extensive experience in implementation of the version control software GIT.
- Experience in the development and integration of enterprise applications using Micro Services RESTFUL Web Services.

Environment: Java 1.8, SQL, MYSQL, GIT, JUnit, Rest API, Web Services, Micro Services, Json, Postman.**Micro Spark Solutions Pvt Ltd, Hyderabad, India****Sept 2019- Nov 2020****Java Developer**

- Involved in all phases of the end-to-end implementation project- requirements gathering, analysis, and design, development, testing, and debugging.
- Developed presentation layer using JSP, HTML5, CSS3, and client validation using JavaScript, and DOM.
- Developed Web Services to allow communication between applications through REST over HTTP.
- Developed the Presentation layer using JSP, HTML, CSS, and JavaScript and used AJAX/jQuery-based rich client for improved customer experience.
- Wrote SQL queries, stored procedures, and modifications to existing database structure as required for the addition of new features using Oracle database.
- Maintained the code based using CVS and SVN version control system.

Environment: Java, JEE, HTML, CSS, JavaScript, Oracle, AWS, JAX-RPC, JUnit, Eclipse, GIT

ZenQ, Hyderabad, India

Sept 2017- Aug 2019

Java Developer

- Developed the presentation layer using JSP, HTML5, CSS3, and JavaScript, enhancing user interaction.
- Implemented client-side validation to improve application reliability and user experience.
- Created RESTful Web Services for seamless application communication, optimizing performance.
- Managed codebase with version control, ensuring efficient collaboration and project tracking.

Environment: Java, JEE, HTML, CSS, JavaScript, AWS, JUnit, Eclipse, GIT

Lince Soft Solutions, Hyderabad

July 2015-Aug 2017

Java Front-end Developer

- Executed Software Development Life Cycle (SDLC) like Analysis, Design, Code Development, and Implementation.
- Implemented Model View Controller (MVC) architecture through Struts at the Web tier level to isolate each layer of the application to avoid the complexity of integration and ease of maintenance.
- Used Exception Handling and Collections API to implement various features and enhancements.
- Worked in a multithreading environment by using different concepts like Thread Synchronization, Thread Deadlock, and Inter Communication.
- Developed using simple Struts validation for validating user input as per the business logic and initial data loading.
- Used Hibernate to retrieve/update the data from/to the database.
- Developed supporting Java classes that controlled the whole flow of the module as per specifications.

Environment: J2EE, JSP, Spring, Eclipse, Maven, Log4j, Oracle, SQL and Windows.

EDUCATIONAL BACKGROUND

Master of Science in Robotics and Automation Engineering | Concentration in Robotics: Computer Vision, Machine Learning | University at Buffalo, The State University of New York, Getzville, NY | 2022

Bachelors in electrical engineering | Concentration in Electrical Machines, Control Systems | Ujjain Engineering College, IN | 2015
