

AAYUSHI PUNJABI

BUSINESS ANALYST

+1 (469)-263 0172 | aayushi@jobhuntmails.com| Austin,Tx | LinkedIn

PROFESSIONAL SUMMARY

A detail-oriented Business Analyst with 4 years of dedicated experience in the healthcare and finance sectors. A collaborative professional adept at building strong partnerships with stakeholders to identify critical business needs and implement effective improvement initiatives. As an innovative problem solver, I consistently strive to deliver measurable success for organizations in a competitive landscape. Committed to leveraging analytical skills and industry knowledge to enhance decision-making processes and drive overall business success.

AREA OF EXPERTISE

- **Project/Program Management:** Project Scheduling, Resource Allocation, Agile Methodologies (Scrum, Kanban), Risk Management
- **Product Management:** Product Lifecycle Management, User Research, Competitor Analytics, Product Strategy
- **Business Analysis:** Data Analytics, Business Case Development, Stakeholder Management, Requirements Gathering
- **Software Tools:** JIRA, Confluence, InVision, Figma, Tableau, Power BI, Salesforce, Google Analytics
- **Technical Skills:** SQL for Data Querying and Analysis
- **User Acceptance Testing (UAT):** Conducting and managing UAT processes
- **Process Improvement:** Identifying gaps and optimizing business processes
- **Communication Skills:** Excellent verbal and written communication for stakeholder engagement
- **Collaboration:** Strong teamwork skills in cross-functional environments
- **Adaptability:** Ability to thrive in fast-paced and changing environments

PROFESSIONAL EXPERIENCE

BUSINESS ANALYST, KAISER PERMANENTE

OCT 2024 – PRESENT

- Led a project to address inefficiencies, manual bottlenecks, and defects in Kaiser Permanente's sales process, aligning it with organizational objectives.
- Adopted Agile methodology to drive iterative progress and foster continuous feedback through sprint cycles and daily Scrum meetings.
- Conducted workshops with stakeholders and utilized Lucidchart to analyze existing workflows, identify inefficiencies, and propose streamlined solutions.
- Collaborated with sales and IT teams to implement redesigned workflows, eliminating redundancies and clarifying task ownership.
- Leveraged JIRA for defect tracking, user stories, and tasks, collaborated with developers, data analysts, and data scientists for efficient prioritization, deliverable tracking, and issue resolution.
- Supported end-to-end testing of redesigned and automated processes to ensure functionality and alignment with business requirements.
- Monitored key performance indicators (KPIs) post-implementation, achieving a 17% reduction in sales cycle duration and significant process efficiency improvements.

BUSINESS ANALYST, ICICI BANK LTD.

04/2020 – 12/2022

- Project: Development of Online Banking Application with International Transactions •
- Conducted workshops with stakeholders to understand customer pain points and regulatory requirements. Compiled detailed requirements for features like fund transfers, balance inquiries, bill payments, and international transactions.
- Collaborated with cross-functional teams to map existing workflows and design optimized processes for the online platform. Defined workflows for international payments, ensuring compliance with SWIFT standards and regional regulations.
- Partnered with developers and compliance teams to build a robust international transactions feature. Integrated currency conversion APIs and implemented multi-level security for fraud prevention.
- Supported Agile project delivery by maintaining the product backlog in JIRA, participating in sprint ceremonies, and ensuring that requirements were met during iterative releases.
- Designed wireframes to represent the application's interface, highlighting seamless navigation for features like transaction history and international transfer tracking.
- Ensured the platform met regulatory standards, including GDPR, AML, and KYC compliance, to maintain customer trust and prevent legal issues.
- Played a key role in the successful rollout of the application, monitoring KPIs such as user adoption rates, transaction success rates, and issue resolution times. Recommended enhancements based on customer feedback and usage analytics.
- Contributed to a successful launch, achieving a 21% increase in digital transactions, a 10% reduction in international transaction processing time, and a 19% improvement in customer satisfaction scores within six months

BUSINESS ANALYST, GENPACT

02/2017 – 02/2018

- Utilized advanced Excel and SQL Server to structure and query healthcare data, streamlining needs collection and improving documentation accuracy by 30%.
- Created standardized FRD and BRD templates, ensuring consistent documentation practices that enhanced communication and resulted in a 20% improvement in project alignment and timely delivery.
- Facilitated workshops with healthcare stakeholders to refine business needs, applying Agile methodologies to integrate feedback and improve project alignment and stakeholder satisfaction.
- Developed a feedback loop to update FRD and BRD based on stakeholder input, addressing gaps and enhancing documentation quality in line with healthcare goals.
- Utilized Power BI to create interactive dashboards for FRD and BRD, improving documentation clarity and decision-making by 25%, while employing AWS Glue and Redshift for version control and transparent project tracking.
