## Professional Summary

Detail-oriented Statistical Analyst with state government experience in labor market and health data. Skilled in epidemiological analysis, SAS, SQL, and advanced Excel. Experienced in analyzing cancer incidence, conducting descriptive and inferential statistics, and collaborating across teams to ensure accurate data reporting. Adept at transforming complex datasets into actionable insights for public health policy and decision-making.

## Education

Master of Science in Biostatistics

Middle Tennessee State University – Murfreesboro, TN | Dec 2023

Bachelor of Science in Biochemistry

Middle Tennessee State University – Murfreesboro, TN | Dec 2017

## Professional Experience

### Statistical Analyst

Tennessee Department of Labor and Workforce – Nashville, TN | Nov 2024 – Present

- Collect, validate, and analyze statewide employment and wage data to identify labor market gaps and support economic policy decisions.
- Extract and analyze employment and wage datasets using Oracle SQL Developer, performing data validation, cleaning, and quality checks to ensure accuracy.
- Use Excel functions (PivotTables, VLOOKUP, SUMIFS) to clean, validate, and aggregate data for internal and public reporting.
- Began incorporating SAS for statistical modeling and reporting to expand reproducibility and align with federal data standards
- Conduct descriptive and regression analyses on employment trends to support federal reporting, compliance, and state labor market initiatives.
- Build Tableau dashboards and visualizations to communicate workforce trends to policymakers and the public.
- Collaborate with internal stakeholders to refine data definitions, improve reporting workflows, and enhance reproducibility of statistical processes.

### Area Manager I (Pick Department)

Amazon BNA3 Fulfillment Center – Murfreesboro, TN | Jan 2024 – Nov 2024

- Led and coached a team of 50+ associates, using data-driven performance metrics to

improve productivity and reduce workflow bottlenecks.

- Analyzed operational data to identify process inefficiencies, implementing corrective actions that increased throughput and reduced errors.
- Monitored compliance with quality and safety standards, producing reports to guide staffing and labor allocation decisions.

### **Biostatistics Intern**

Tennessee Department of Health – Nashville, TN | Jul 2023 – Dec 2023

- Developed and executed SAS programs for statistical analysis of cancer incidence data across multiple Tennessee counties.
- Conducted descriptive and inferential statistical testing to support a cancer cluster investigation.
- Validated outputs for accuracy and consistency before reporting results.
- Communicated findings in presentations and reports tailored for both technical and public health audiences.

### **Certifications**

- SQL for Data Science – Coursera
- Statistics with SAS – Coursera
