

Abdul Fahad Syed

Data Scientist

Houston, TX | +1 346-758-7605 | abdufahadsyed@gmail.com | [LinkedIn](#)

SUMMARY

Data Scientist with 5+ of experience in applying advanced data analytics, machine learning, and statistical techniques to solve complex business problems. Skilled in developing and deploying machine learning models, including Linear/Logistic Regression, Random Forests, and XGBoost, achieving significant improvements in predictive accuracy. Capabilities include building scalable data pipelines, implementing real-time analytics systems, and deploying models for use cases including predictive analytics, customer segmentation, fraud detection, recommendation systems, and natural language processing (NLP). Experienced with data visualization tools including Tableau, Power BI, and custom dashboard solutions for presenting analytical results to technical and non-technical stakeholders. Skilled in end-to-end project execution, from requirement gathering to model deployment, within Agile development environments. Strong focus on production-grade model implementation, performance optimization, and continuous integration of AI/ML advancements into enterprise workflows.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Language: Python, R, SQL, SAS

IDEs: Visual Studio Code, PyCharm, Jupiter Notebook

Statistical Methods: Hypothetical Testing, ANOVA, Time Series

Machine Learning: Regression analysis, Bayesian Method, Decision Tree, Random Forests, Support Vector Machine, Neural Network, K-Means Clustering, KNN, Classification, SVM, Naive Bayes, NLP, LLM, CNN, XGBoost, Deep Learning

Packages: NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit-Learn, PyTorch, TensorFlow, Keras, Spark

Visualization/Other Tools: Tableau, Power BI, Jira, MS Excel, MS Office

Cloud Technologies: AWS, GCP, Azure

Database: MySQL, SQL Server, Oracle, MongoDB

Software/Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-solving, Decision Making, EDA, Communication Skills, Databricks, Data Visualization, Predictive Analytics, Pattern Recognition, JMP, Data Integrity, Quantitative Data, Data Science, Statistics, Statistical Analysis, Data Analytics, Data Modeling, Big Query, Snowflake, Data Analysis, Data Mining, SAP, Computer Science, Git, SVN, Atlassian, Confluence, Jenkins, ALM, Postman

Operating System: Windows, Linux

EXPERIENCE

Capital One, USA | Data Scientist

July 2023 - Current

- Applied Agile methodologies to adapt to evolving project requirements and deliver iterative, high-quality solutions on time.
- Conducted statistical hypothesis testing to validate key variable relationships and inform strategic decisions.
- Built and deployed NLP models for sentiment analysis to extract insights from customer feedback.
- Designed interactive Tableau dashboards to visualize complex data and support strategic decision-making.
- Developed and deployed supervised learning models such as Linear/Logistic Regression, Decision Trees, Random Forests, and SVM for classification and regression tasks, improving prediction accuracy by 15%.
- Created AI models for demand forecasting, reducing forecast error by 18% and enhancing inventory accuracy.
- Leveraged ensemble learning methods like XGBoost and Gradient Boosting to enhance model accuracy and reduce overfitting, resulting in a 25% performance improvement.
- Designed and trained deep learning models, including CNNs for image classification and RNNs/LSTMs for time series forecasting, achieving 30% improved model accuracy.
- Leveraged AWS EC2 for scalable computing, optimizing data processing tasks and reducing model training time by 50%.
- Developed custom visualizations using Matplotlib, & Seaborn in Python to communicate complex data trends, improving client understanding of data-driven recommendations by 15%.
- Optimized MySQL database schema to enhance data storage, retrieval efficiency, and scalability, ensuring robust performance.

Cybage Software, India | Data Scientist

March 2019 - July 2022

- Managed project timelines and deliverables according to a detailed Waterfall project plan, ensuring that each phase was completed before progressing to the next.
- Seamlessly integrated Databricks solutions into existing data pipelines through effective collaboration with cross-functional teams, enhancing data processing efficiency.
- Led end-to-end development of advanced machine learning models, including Regression Analysis, Decision Trees, Random Forests, and Neural Networks, resulting in a 25% improvement in predictive accuracy for key business metrics.
- Developed and optimized deep learning models using PyTorch and TensorFlow, implementing custom architectures to enhance model performance and accuracy.
- Built scalable ETL pipelines for training data using Spark, Databricks, & Airflow to automate and accelerate the ML lifecycle.
- Integrated Power BI with Excel and other sources to build real-time, dynamic reports for decision support.
- Designed and trained Deep Learning models using Keras (including RNN and LSTM architectures) to improve industrial decision-making processes and operational efficiency.
- Used AWS EC2 for scalable data processing and model training, optimizing resource usage and managing workloads effectively.
- Designed and maintained SQL Server databases to ensure efficient data storage and retrieval for data science projects.

EDUCATION

Master of Science in Management Information Systems | Lamar University, Beaumont, Texas, United States

Bachelor of Technology in Computer Science and Engineering | Jawaharlal Nehru Technological University, Telangana, India
