Professional Summary:

Finance professional with 5+ years of hybrid experience spanning Accounts Payable operations, financial analysis, SAP data migration, and process optimization. Strong background in high-volume AP processing, 3-way matching, vendor management, reconciliations, accruals, and month-end close. Skilled in SQL, Python (Pandas/NumPy), Power BI, SAP S/4HANA, and advanced Excel to build dashboards, automate reporting, and drive variance analysis. Proven ability to improve AP accuracy, prevent duplicate payments, accelerate invoice cycles, and enhance cash-flow and forecasting insights. Known for cross-functional collaboration, analytical problem-solving, and delivering accurate, audit-ready financial results in deadline-driven environments.

Skills

- **ERP Systems:** SAP S/4HANA, SAP ECC, JD Edwards, Ariba, GEP Smart, SAP Concur, Kofax MarkView/ReadSoft
- **Accounting Tools:** Tally ERP9, QuickBooks, Peachtree, Wings
- **Data & Analytics:** SQL, Python (Pandas, NumPy), SQLite
- **Reporting & BI:** Power BI, Excel (Pivot Tables, VLOOKUP)
- **Workflow Tools:** ServiceNow, Cora, JIRA, VSD
- **Compliance & Documentation:** SOX Controls, 1099 Reporting, DocuSign
- **FUNCTIONAL SKILLS:** Accounts Payable Operations, 3-Way Matching, Invoice Coding, P2P Cycle, Vendor Management, Payment Processing (Net 30/45/60), AP Aging & Accruals, Month-End Close, Financial Modeling, Variance Analysis, Forecasting, Data Migration (SAP ECC : S/4HANA), Reconciliations, KPI Dashboards, Process Automation, Duplicate Payment Prevention, Internal Controls
- **SOFT SKILLS:** Analytical Thinking, Cross-Functional Collaboration, Problem Solving, Attention to Detail, Time Management, Stakeholder Communication

Professional Experience:

Financial Analyst

February 2025 – Present

Tri Pointe Homes, Irvine, CA

- Supported migration of GL, AP, AR, and Asset Management financial data to SAP ECC and S/HANA, ensuring 100% accuracy and full audit compliance.
- Performed data mapping, cleansing, and validation using SAP BODS, LSMW, and SQL, reducing discrepancies by 75-80% and boosting integration testing efficiency by 20%.
- Executed 40+ UAT test scenarios for finance modules, resolving 90% of critical issues before go-live.
- Designed and automated six Power BI reports for financial performance, increasing reporting accuracy by 25% and shortening month-end close by 1.5 days.
- Collaborated with Legal and Compliance teams to validate contract and loan data, achieving zero audit exceptions.
- Conducted SQL-driven variance analysis on \$5M+ in G&A expenses, identifying \$400K in cost-saving opportunities.
- Performed post-migration GL and AP reconciliations for 3,000+ records, strengthening internal financial controls.
- Built and maintained financial models for cost forecasting, cash flow projections, and budget variance analysis to support strategic decision-making.
- Consolidated multi-department financial submissions during budgeting and forecasting cycles, improving planning accuracy and transparency.

Accounts Payable Analyst

May 2021 – April 2022

Dupont

- Resolved over 100+ vendor and business accounts payable queries per month through the ticketing system (VSD), email, and JIRA by researching issues in SAP S/HANA and Kofax MarkView. Reached a customer satisfaction rating of 95% by continuously providing solutions within SLA timelines.
- Processed and validated more than 500+ invoices per month throughout US, Canada, UK, and EMEA using SAP S/HANA and automated workflow system for approval routing, ensuring timely payments of 99% by proactively resolving issues and engaging stakeholders on pending invoices.
- This included management of the end-to-end procure-to-pay cycle, which comprises P2P, Purchase Order Management, vendor onboarding, and invoice approvals in Ariba.
- Conducted vendor account reconciliations and regular statement reviews to find and resolve discrepancies; guaranteed timely, accurate supplier payments with strong vendor relationships.

- Implemented invoice audit controls and duplicate payment identification processes to optimize the payment cycle through the elimination of redundant steps and capturing billing errors. Invoices are now processed 15% faster than before, and duplicate overpayments have been averted, saving an estimated \$50K annually.
- Leveraged Python utilizing Pandas and NumPy in addition to SQLite to automate AP data cleaning and analysis by developing a vendor aging dashboard, which tied accounts payable data into cash-flow insights. This automation reduced manual data processing by 30% and uncovered early payment discount opportunities to improve cash flow.
- Developed and tracked key AP performance metrics-invoice cycle time, backlog trends, and vendor performance-using Excel pivot tables to identify bottlenecks and drive process improvements, which contributed to a 20% reduction in the invoice backlog in six months.
- Contributed to the month-end close by reconciling AP accounts and preparing accruals and forecasts for the accurate reporting of financial results.

Accounts Payable Specialist
Genpact

May 2019 – May 2021

- Managed high-volume invoice processing in SAP ERP by processing more than 1,000 invoices monthly for the US, Canada, UK & EMEA with OCR automation in Kofax MarkView/ReadSoft and 3-way matching in Ariba/GEP Smart. Ensured 99% accuracy and 97% on-time vendor payments.
- Resolved more than 100-plus weekly accounts payable queries coming from vendors and internal teams through ServiceNow tickets, Cora case workflows, and direct calls to vendors. Realized a 95% same-day resolution rate with overall improvement in vendor satisfaction.
- Proactively handled AP workflow escalations by investigating and fast-tracking slow invoice approvals through ERP workflow tools such as SAP and JD Edwards to coordinate with approvers. This reduced the average approval cycle time by 30% and also eliminated payment backlogs.
- Conducted AP aging analysis and vendor statement reconciliations using Excel (VLOOKUP, Pivot Tables) to support month-end accruals. Ensured 100% accrual entry accuracy and reduced overdue invoices by 15%.
- Improved processes & compliance: Process improvements, such as electronic document approvals via DocuSign, were implemented to further streamline vendor onboarding and document control. New vendor setup times were reduced by 50%. Strict compliance with SOX controls and 1099 reporting requirements were maintained, yielding zero audit findings during tenure.

Accounts Payable Associate
BAIG & ASSOCIATES

July 2017 – December 2018

- Optimized invoice processing accuracy by enforcing 3-way matching (invoices vs. POs and GRNs) and performing precise invoice coding to correct GL accounts in Tally ERP9, ensuring compliance with internal controls and preventing overpayments or duplicate payments.
- Provided month-end close support by preparing detailed AP aging reports and recording accruals for un-invoiced liabilities at month-end, ensuring all expenses were captured for timely financial close and accurate financial reporting.
- Managed the full payment cycle in QuickBooks, scheduling vendor payments per agreed terms (Net 30/5/60) and monitoring vendor compliance with invoicing requirements to meet payment terms ensured on-time payments to avoid late fees and capture early payment discounts, strengthening vendor relationships and optimizing cash flow.
- Resolved billing discrepancies by processing vendor credit memos and performing debit/credit note reconciliations reconciled vendor statements monthly in collaboration with vendors to clear outstanding credits, ensuring accurate AP ledgers and improving audit readiness.
- Streamlined expense reimbursements by verifying receipts and GL coding for employee expense claims navigated multiple ERP systems (Tally ERP9, Peachtree, QuickBooks) to record journal entries and perform bank reconciliations, maintaining strict internal controls over disbursement and consistent accuracy in accounts payable records.
