EDUCATION

University of Minnesota | Cumulative GPA 3.76 Minneapolis, MN
Bachelor of Science: Computer Science May 2026
Relevant Coursework: Data Structures and Algorithms, Software Engineering, Operating Systems, Software Design and Development, Computer Architecture, Computational Linear Algebra.
Awards: College of Science & Engineering Dean's List Recipient. Spring 2024

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, Kotlin, MATLAB, Java, C/C++, JavaScript, HTML/CSS, OCaml, Assembly
Software: SEM, AFM, Optical Microscopy, SQL, REST API, Express JS, EKS, Django, Git, Visual Studio, Vercel, Firebase
Certifications: AWS Solutions Architecture Simulation, AT&T Technology Academy (Cloud Computing, Agile Methodologies)

PROFESSIONAL EXPERIENCE

Teaching Assistant Minneapolis, MN
University of Minnesota Aug 2025 - Present

- Providing technical support for 150+ students by streamlining course delivery on Canvas, ensuring efficient access to assignments and project guidelines.
- Mentored 50+ students by breaking down complex sustainability models into structured, step-by-step methods, strengthening students' ability to apply quantitative analysis and research techniques.
- Collaborating with faculty to design scalable feedback systems, applying elements of software architecture to improve grading efficiency and enhance student outcomes.

Chewy | Software Engineering intern | Minneapolis, MN (Hybrid) June 2025 - Aug 2025

- Boosted Canadian organic search visibility, driving ~\$175K projected annual traffic uplift, by restructuring SEO logic across 8+ SPAs using JavaScript, React, and Next.js, improving regional clarity and Google rankings.
- Resolved a production issue by removing misleading shipping/returns messaging, increasing policy accuracy by 20% and reducing related support tickets by 35% without impacting checkout flow.
- Enhanced promotions infrastructure scalability and maintainability by migrating from legacy ECS to modern EKS architecture with feature toggle support, contributing to robust system design and improved deployment reliability.

Headstarter AI July 2024 - Dec 2024

Software Engineering

- Engineered solutions using React, Node.js, and OpenAI, reducing operational costs by 20% and enhancing app usability to meet client needs.
- Delivered software solutions in five hackathons, building scalable features and debugging critical issues under tight deadlines.
- Collaborated with senior engineers on code reviews and architectural improvements, optimizing app performance by 30% and boosting retention by 25%.

Energy Solution & Technologies

Feb 2024 - Aug 2024

Web Developer Intern

- Automated test processes, reducing manual testing hours by 50% and boosting quality assurance efficiency by 30%.
- Executed full-stack web development with React, creating an SEO-optimized, responsive website that raised organic traffic by 40% and reduced page load time by 50%.
- Collaborated cross-functionally to provide technical troubleshooting, increasing website uptime by 30% and elevating user satisfaction.

AWS APAC Solutions Architecture

Sep 2024 - Nov 2024

- Developed scalable AWS Elastic Beanstalk software architecture, reducing client response times by 40% and supporting 3x user traffic growth.
- Communicated technical concepts in client-friendly terms, improving client understanding, satisfaction, and decision-making.
- Optimized infrastructure for growth, implementing security best practices to enhance stability by 30% and cut operational costs by 25%.

PROJECTS

AI Custom Support Chatbot | JavaScript, Next.js, React, API

- Led a team of 3 developers in creating a highly efficient AI chatbot that improved response accuracy by 30% post-testing and debugging.
- Designed a modern user interface emphasizing accessibility and usability, improving overall interaction quality.
- Pursued mentorship from senior engineers, specializing in software architecture and system design; applied optimization techniques to improve response times by 30%.

Pantry Tracker | Full-Stack: Next.js, Material UI, Firebase

- Developed a pantry management app with real-time database management via Firebase, reducing manual tracking by 60% and improving accuracy; additional experience with PostgreSQL.
- Automated deployment using CI/CD pipelines in Vercel, applying DevOps practices and automation to reduce update times by 70% and improve reliability.
- Redesigned UI to enhance visual clarity and user engagement, leading to higher interaction rates.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Management Leadership of Tomorrow(MLT)| Career Preparation Fellow| Ascend Scholar Washington, DC

- Selected for a competitive 11-month fellowship, gaining training in leadership, career development, and software industry preparation.
- Engaged in monthly coaching and workshops to refine technical proficiency, communication, and project coordination skills while building a national network of peers and mentors.

National Society of Black Engineers (NSBE) | Member — Active participant in professional development workshops and diversity initiatives in tech.
