EDUCATION

Wilmington University

Masters of Science in Information Systems Technologies- Information Assurance

May 2025

New Castle, Delaware

Sreyas Institute of Engineering and Technology

Bachelor of Science- Computer Science

May 2018

Hyderabad, Telangana, INDIA

PROFESSIONAL EXPERIENCE

Amazon Development Center

TRON Associate

Oct 2021 - Feb 2022

Noida, INDIA

Key Responsibilities:

- Reviewed and annotated large-scale image and video datasets to train, validate, and fine-tune machine learning models, consistently maintaining 98%+ accuracy that improved production model performance.
- Identified edge cases and emerging problem patterns through trend analysis, leading to redesigned training datasets and optimized model training pipelines.
- Performed root cause analysis on recurring data accuracy and system performance issues, contributing to long-term corrective solutions.
- Collaborated with QA and product development teams to define and refine labeling guidelines, ensuring quality and consistency across annotation workflows.
- Utilized internal tools and platforms to maximize operational efficiency while maintaining high throughput in annotation tasks.
- Assisted in testing, validation, and benchmarking ML outputs against defined metrics to ensure reliable deployment.
- Researched and adopted emerging ML technologies, tools, and processes, contributing to continuous improvement of AI initiatives.
- Supported pilot projects and automation initiatives, enhancing scalability and reducing dependency on manual review.
- Received performance recognition for adaptability and rapid learning in response to evolving tools, platforms, and guidelines.

PROJECTS

1) Mentoring System for Students

- Developed an online mentoring system to encourage student participation in academic activities.
- Designed and implemented modules for student–mentor interaction, activity tracking, and feedback.
- Technologies: Core Java, Advanced Java, JDBC, JSP/Servlets, JavaScript, HTML, MySQL

2) Novel Efficient Remote Data Possession Checking Protocol

- Implemented a cloud storage security protocol using Homomorphic Hash Functions, protecting against forgery, replacement, and replay attacks.
- Conducted validation against a typical cloud security model to ensure data integrity.
- Technologies: HTML, JavaScript, JDBC, JSP/Servlets, MySQL

3) ERP Online Management System

- Built a web-based ERP platform integrating modules for inventory, sales, purchase, HR, and reporting.
- Designed a normalized MySQL database with optimized SQL queries for faster data retrieval.
- Implemented CRUD operations with secure, role-based authentication and MVC architecture.
- Created real-time dashboards and reports to visualize business KPIs, improving decision-making.
- Technologies: Java, SQL (MySQL), JDBC, JSP/Servlets (Spring Boot optional), HTML/CSS, JavaScript

4) TaskTrack – Team Task Management Web App

- Developed a full-stack task management app enabling teams to track projects, tasks, and deadlines in real-time.
- Implemented role-based authentication (Admins, Team Members) and notifications for task assignments/deadlines.
- Built a responsive dashboard UI with Bootstrap and EJS for dynamic rendering.
- Designed relational MySQL schema with optimized queries, improving task filtering efficiency by 30%.
- Deployed on Heroku/Render with environment-based configurations.
- Technologies: JavaScript, Node.js, Express.js, MongoDB/MySQL, HTML/CSS, Bootstrap, EJS

TECHNICAL SKILLS

- Databases: Oracle, SqlServer, MySql, MongoDB
- Tools: SqlServer Profiler, SQL developer
- Languages: C, SQL, Html 5, Javascript, Typescript, PHP.
