

Abhijit Chandrasekhar

Boston, MA | 603-852-7896 | abhijit.chandrasekhar1@gmail.com | <https://www.linkedin.com/in/abhijit-chandrasekhar/>

Healthcare-focused Data Analyst with 6+ years of overall experience delivering insights from complex clinical data using SQL, Python, and Tableau. Adept at building visualizations and collaborating with clinical teams to drive efficiency and improve patient outcomes. Core expertise includes claims data analysis, population health, and EPIC systems.

Skills

- **Data Visualization & BI:** Tableau, Power BI, Google Sheets, Advanced Excel, Data Storytelling
- **Technical Skills:**
 - **Languages & Databases:** Python, SQL, R Studio, PostgreSQL, SQL Server
 - **Python Libraries & Frameworks:** PySpark, TensorFlow, Transformers, Pandas, NumPy, Scikit-learn
 - **Concepts & Tools:** Machine Learning, ETL Concepts, Data Profiling, Git/GitHub
- **Healthcare Domain:** Population Health Analysis, Claims Data Analysis, EPIC (Caboodle, Chronicles)

Professional Experience

UMASS MEMORIAL HEALTH

- Career P.A.T.H. Intern – Office of Clinical Integration** January 2025 – present
- Developed an interactive dashboard for a MassHealth ACO to visualize weekly member care management data, built and uploaded the source table to the data warehouse, cutting reporting time by over 90%.
 - Engineered a live dashboard for the Sub-acute Rehab at Home (SARAH) program, enabling physicians to better monitor patient progress and leading to a substantial improvement in patient disposition management.
 - Created a data extraction process for patient weights from EPIC notes using Python and SQL, ensuring 99% accuracy across more than 1,400 patient records for clinical analysis.

Bentley University McCallum Graduate School of Business

- Data Analyst – Research Assistant** April 2023 – December 2024
- Analyzed post-discharge claims data for Harvard Medical School, identifying over 35% in care irregularities and providing insights into opportunities for waste reduction.
 - Transformed and visualized 2.2 million records from the CDC's YRBS dataset, uncovering key trends related to the impact of bullying on adolescent mental health.
 - Improved data integrity for future research by creating a comprehensive data dictionary for CDC datasets (1991–2021), correcting inaccuracies across more than 250 features.
 - Developed a Selenium bot to automate web scraping for product data extraction.

Dun & Bradstreet - South Asia Middle East, Ltd.

- Team Lead – Operations | Senior Associate | Associate** February 2018 - May 2022
- Led a 15-person operations team, improving the quality of Business Information reports and reducing deliverable errors by 23% through targeted process enhancements.
 - Championed the global adoption of a new data compilation tool, a project that saved the company \$15,000 annually.
 - Strengthened client relationships and developed team talent, which was instrumental in retaining approximately \$60,000 of at-risk revenue.
 - Achieved over \$30,000 in cost savings by transitioning to an in-house quality control process, increasing speed of service, and lowered errors and was awarded the Certificate of Excellence for surpassing expectations.

Education

- Master of Business Administration** | Bentley University (High Distinction) May 2024
- Master of Science in Business Analytics - STEM** | Bentley University (High Distinction) December 2024
- Master of Arts in Economics | Bachelor of Business Administration** | University of Madras April 2017|2015

Data Science Competitions

- **2024 Humana-Mays Healthcare Analytics Competition:** Top 6% (60/ 980) participants September 2024
 - Analyzed 1.5-million-member records across 14 claims datasets to build a model that successfully predicted gaps in preventive care, informing population health strategies.
- **Purdue School of Management: Data Analytics for Good:** 3rd place December 2022
 - Leveraged convolutional neural networks (CNN) to classify images and write a narrative to accompany the classification that describes the story behind each image.
