SUMMARY

DevOps & Cloud Engineer with 3+ years of experience designing, deploying, and optimizing scalable, secure, and high-availability cloud infrastructure for financial and e-commerce platforms. Expert in **AWS, Azure, Terraform, Docker, Kubernetes, CI/CD pipelines, and DevSecOps**, driving automation, reducing deployment times, and improving system uptime. Skilled in **monitoring, observability, and workflow automation** using Datadog, ELK Stack, Prometheus, Grafana, Python, and Bash.

SKILLS

Cloud Platforms & Services: AWS (EC2, S3, IAM), Azure (AKS, Azure Functions, Azure DevOps), Terraform, ARM Templates
CI/CD & Automation: Jenkins, GitLab, GitHub Actions, Blue/Green & Canary Deployments, Pipeline Orchestration
Containerization & Orchestration: Docker, Kubernetes (EKS/AKS), Microservices Deployment, Autoscaling
Scripting & Automation: Python, Bash, Workflow Automation, Log Parsing, Compliance Auditing
Monitoring & Observability: Datadog, ELK Stack, Prometheus, Grafana, Azure Monitor
Security & Compliance: RBAC, IAM Policies, DevSecOps, Vulnerability Scans, Regulatory Adherence
Collaboration & Methodologies: Agile/Scrum, Cross-functional Team Collaboration, Legacy System Migration

EXPERIENCE

DevOps Engineer | Rackspace Technology

Nov 2024 – Current | Remote, USA

- Orchestrate scalable CI/CD pipelines using **Jenkins** and **GitLab** for cloud-native financial applications, reducing deployment time by 45% and accelerating release cycles while maintaining zero-downtime.
- Automate AWS infrastructure provisioning (**EC2, S3, IAM**) with **Terraform** and **Ansible**, creating repeatable environments across 15+ projects, improving reliability and cutting configuration errors by 60%.
- Deploy and manage **Azure cloud workloads** using **AKS, Azure Functions**, and **Azure DevOps**, implementing autoscaling and resilient microservices architecture, improving system uptime by 99.9% and reducing infrastructure costs by 20%.
- Implement **containerized orchestration** with **Docker** and **Kubernetes (EKS/AKS)**, streamlining microservice management, improving performance, and reducing system downtime by 35%.
- Integrate monitoring, observability, and DevSecOps using **Datadog, ELK Stack, IAM policies**, and automated vulnerability scans, improving incident response times by 40% and reducing security risks by 30%.
- Develop automation scripts in **Python** and **Bash** for workflow optimization, log parsing, and compliance auditing, saving 10+ operational hours per week and enhancing regulatory adherence for financial applications.

Cloud & DevOps Engineer | Flipkart

Mar 2021 – Jul 2023 | India

- Designed and implemented end-to-end CI/CD pipelines using **Azure DevOps**, Jenkins, and GitHub Actions, reducing software release cycles by 45% and enabling zero-downtime deployments with blue/green and canary strategies.
- Provisioned and managed scalable **Azure cloud infrastructure** using **Terraform** and **ARM templates**, automating environment setup and reducing provisioning time by 60%, ensuring consistency across staging and production environments.
- Deployed and orchestrated containerized applications using **Azure Kubernetes Service (AKS)**, improving system scalability, reducing deployment failures by 35%, enabling rapid feature rollouts for e-commerce platforms serving 200K+ users.
- Automated repetitive operational workflows with **Python** and **Bash** scripts, saving 15+ hours per week and improving team productivity during high-demand retail campaigns.
- Integrated security into DevOps pipelines (**DevSecOps**) by implementing **RBAC**, IAM policies, vulnerability scans, and compliance checks, achieving 99% adherence to industry-standard security practices.
- Implemented centralized monitoring and logging using **Prometheus, Grafana**, and **Azure Monitor**, reducing mean time to detection (MTTD) by 30% and improving incident response for high-traffic e-commerce systems.
- Collaborated with cross-functional teams in **Agile/Scrum environments** to modernize cloud infrastructure and migrate legacy retail applications to Azure, contributing to a 25% increase in system reliability and uptime during peak sales events.

EDUCATION & CERTIFICATIONS

Masters of Science in Technology Management

Aug 2023 – May 2025 | Columbia, Kentucky

Lindsey Wilson University

AWS Certified DevOps Engineer | Docker Certified Associate (DCA) | Kubernetes Certifications (CKA / CKAD / CKS)

PROJECTS

CI/CD Pipeline with Jenkins, Docker & Kubernetes | Tech Stack: Jenkins, GitHub, Docker, Kubernetes, Helm, Maven

- Designed and implemented a fully automated **CI/CD pipeline** using **Jenkins, GitHub webhooks**, and **Docker**, reducing manual deployment efforts by **80%**.
- Containerized a **Java Spring Boot** application, pushed images to **Docker Hub**, and deployed via **Kubernetes (Helm, YAML)** for scalable, seamless rollouts.

Infrastructure Automation with Terraform on AWS | Tech Stack: Terraform, AWS (EC2, S3, VPC, IAM), GitHub Actions

- Built reusable **Infrastructure as Code (IaC)** modules using **Terraform** to automate AWS provisioning of **VPCs, EC2, S3, and IAM**, ensuring scalability and consistency.
- Integrated **Terraform** with **GitHub Actions** for automated infrastructure deployment on commits, improving provisioning speed and version-controlled state management.
