

Abhinaba Das

Amherst, MA • abhinabadas@umass.edu • 4132107612 • <https://www.linkedin.com/in/abhinabadas>

Well-rounded Electrical and Computer Engineering Masters student possessing excellent communication skills and sound knowledge of Artificial Intelligence, Computer Networking & Cybersecurity, using Data Science in Healthcare with prior software industry experience

EDUCATION

Master of Science in Electrical and Computer Engineering (Magna Cum Laude)

University of Massachusetts at Amherst • Amherst, Massachusetts • Sep 2022

Bachelor of Technology in Computer Science and Engineering (First Class Distinction)

S.R.M. University • Tamil Nadu, India • May 2018

SKILLS

Operating Systems Platforms : Windows, Linux(Red Hat Linux)

Programming Languages and data science Libraries : C, Java , Python, SQL, NumPy, Pandas, Scikit-Learn, HTML, CSS, Javascript, Linear and Logistic Regression, KNN, CNN, Matplotlib,

Environments : Eclipse IDE, Google Colaboratory, Jupyter Notebooks, VS Code, Microsoft Azure(cloud), Anaconda,

Development Boards : Google Coral

INDUSTRY EXPERIENCE

Infosys

Systems Engineer

July 2018 – Aug 2019

Hyderabad, India

- Implemented Blaze rule writing to oversee decision making regarding loan eligibility of clients using FICO Blaze Advisor software to maximize control over high volume operational decisions
- Used KCML to encode flat files which generated and tracked invoices for vehicle dealerships for CDKGlobal for sale of automobiles and after sales tasks such as vehicle insurance to help grow business and retain customers for auto dealers

Infosys

Systems Engineer Trainee

Feb 2018 – May 2018

Mysore, India

- Utilized Hibernate framework in Java to map OOP models to the tables in a database managed by the RDBMS to build different tiers of an enterprise application as part of a group project
- Developed learner use case as per Agile framework guidelines, implemented associated user stories (viewing courses, log-in & logout, session authentication & management) of an education platform using web technologies -HTML, CSS(for styling), JavaScript (functionality)
- Presented dynamic content through two-way data-binding using AngularJS and RESTful Web services

ACADEMIC EXPERIENCE

Graduate Research Assistant, Department of Electrical and Computer Engineering

Spring 2022

University of Massachusetts, Amherst, MA

- Simulated dynamic voltage and frequency scheduling algorithms for cyber-physical systems (Research grant funded by NSF) to reduce power consumption in cores of a processor while taking into account several factors

Graduate Teaching Assistant, Department of Astronomy

Fall 2021

University of Massachusetts, Amherst, MA

- Mentored students with coursework, assignments spanning introductory college level Astronomy lectures
- held weekly office hours to resolve doubts and proctored exams

ACADEMIC PROJECTS

- Data Science project to analyze the relation between Anencephaly and several Risk Factors using Natality datasets (NCHS) Spring 2022
- Deep learning based project – Connect-4 using AlphaGo and Monte Carlo Tree Search, deployed Spring 2022
- TensorFlow Lite models converted by ONNX on Google Coral Edge TPU on Google Coral Edge device
- Deep learning based sensor fusion for mixed reality system using Microsoft HoloLens Fall 2021
- Implemented basic Machine Learning algorithms (Back Propagation, Dropout, Fully Connected Nets) in Python Fall 2021
- Analyzed different aspects of Computer Networks (RTT) with respect to time and sequence numbers of data packets Fall 2019
- by using Wireshark packet capture tool
- Intelligent Policy Framework for Geo Routing Using Spatial Databases to find shortest route between two points, Spring 2018
- designed layouts/appearance of the application in XML
- developed an AI expert system to cluster and categorize HTML parsed data using histogram techniques Fall 2017

CONFERENCE PRESENTATIONS & PUBLICATIONS

- Co-prepared and published a paper titled “Changing Mechanisms of Enterprise Security” that May 2018
- was presented at International Conference on Research & Development in Engineering, Science & Technology (ICRDEST-2018)
- Co-prepared and published a paper titled “Intelligent Policy Framework on Geo Routing Using Spatial Databases” May 2018
- that was presented at International Conference on Contemporary Engineering and Technology (ICCET, Paper Id-18238)

TRAININGS / CERTIFICATIONS

- Trained in Azure AZ 500 Cloud Security Technologies training course Jun 2021
- Undertook Digital Computer Forensics course Jun 2017
- Trained in Red Hat Certified Engineer Linux Administration Jun 2016-Jul 2016
