EDUCATION

Kent State University, Kent, OH, USA | MS in Business Analytics | GPA: 3.7/4.0 | **AUG 2023-DEC 2024**
CMR College of Engineering & Technology, India | Bachelor of Technology in Mechanical Engineering | GPA: 8/10.0 | **JUL 2015-MAY 2019**

WORK EXPERIENCE

Business Analyst Intern — Digiantrix LLC | Kent, OH |

Sep 2024 – Dec 2024

- Designed and implemented Tableau dashboards powered by SQL data models to track utilization, engagement, and campaign KPIs, improving visibility and performance insights by **30%**.
- Automated recurring Excel and Power BI reports using VBA and macros, reducing manual reporting time by 6 hours weekly and standardizing data delivery across teams.
- Conducted A/B testing on marketing strategies and integrated Salesforce CRM with dashboards, boosting campaign engagement by 12% and enabling unified segmentation tracking.
- Partnered with cross-functional stakeholders to clean, transform, and automate datasets, streamlining campaign workflows by 40% and ensuring consistent data accuracy.

Data Analyst — Amazon Development Centre India | Hyderabad, India |

Jun 2019 – Jul 2023

- Built and maintained ETL workflows processing 100K+ records per cycle, improving data consistency and supporting high-volume business reporting.
- Created Power BI dashboards visualizing KPIs and cost efficiency across 12 business units, providing real-time insights.
- Applied Python (Pandas, Matplotlib) for exploratory and predictive analysis, improving cost forecasting accuracy by 15%.
- Automated SQL and Excel-based reporting pipelines, reducing turnaround time by 50%.
- Collaborated with Marketing, Finance, and Operations teams to improve data modeling and optimize warehouse performance.
- Delivered executive presentations using PowerPoint, enhancing leadership visibility and decision-making speed by 25%.

ACADEMIC PROJECTS

Zillow Zestimate Prediction

Aug 2023 – Dec 2023

- Developed a regression model in R using 50,000+ property records with 92% R^2 accuracy, enabling precise home value estimation based on demographic and location data.
- Built an ETL pipeline to clean and transform 1 GB+ of housing data and developed three Tableau dashboards that revealed key insights on regional affordability patterns.
- Analyzed 10+ regional datasets and optimized feature selection, reducing model error by **18%** and improving valuation reliability for target regions.

University Enrollment Trends Dashboard

Jan 2023 – May 2023

- Queried 150K+ student records using MySQL to identify participation and retention patterns.

- Designed Power BI and Excel dashboards for forecasting and trend analysis, improving outreach efficiency by 25%.
- Presented insights to 4 administrative departments, influencing updates to enrollment strategies and resulting in a 15% increase in student engagement.

SKILLS

Data Skills: SQL, MySQL, Redshift, Tableau, Power BI, Microsoft Excel (Vlookup Function ,Pivot Tables, Formulas, Macros), SAS Programming, Data Validation, ETL pipeline development

Programming: Python (Pandas, Matplotlib, Scikit-learn), R (Hypothesis Testing, ANOVA, Regression Analysis, PCA, Correlation analysis), Machine Learning

Analytics & Modeling: ETL, Data Cleaning, Forecasting, A/B Testing, Data Visualization, AWS

Business Tools: Salesforce CRM, PowerPoint Reporting, Campaign Analytics, Research findings presentations

Core Competencies: Data Modeling, KPI Dashboarding, Process Automation, Stakeholder Collaboration

Cloud & Systems: AWS (S3, Lambda, EC2), GitHub, Jenkins

Methodologies: Agile, Scrum, CI/CD, KPI Tracking
