SUMMARY

Business analyst with 4+ years of experience driving process improvements and cost savings for Fortune companies. Expertise in requirements gathering, data modeling, and stakeholder management. Collaborated with cross-functional 10+ team members to implement business solutions that reduced process complexity and managed process gaps.

SKILLS

Methodology: SDLC, Agile, Waterfall, Scrum	Visualization Tools: Tableau, Power BI, MS Excel
Language: Python, R, Java	Tracking/Other Tools: Jira, MS Visio, HP Quality Center, JAD, UAT, RMT, Alteryx, SQL, Visio, SAP
Documentation: FRD, BRD, SRS, User Stories	Operating System: Windows, Linux
Project Management Tools: MS Project, MS SharePoint	
Analysis Skills: Cost/Benefit, Risk, SWOT, and GAP Analysis	

EXPERIENCE

Business Analyst, State Street, USA May 2024-Present.

- Spearheaded the development and documentation of comprehensive Business Requirements Documents (BRDs) and functional specifications for a new ERP system, ensuring seamless alignment with overarching business objectives.
- Leveraged Power BI's robust data visualization tools and techniques to adeptly communicate intricate financial data to both internal and external stakeholders, achieving an impressive success rate of 95%.
- Conducted thorough GAP analyses to pinpoint disparities between current and desired states, resulting in the identification of key areas for improvement, leading to a 20% reduction in turnaround time and a 15% increase in productivity.
- Applied data mining techniques to Claims data using intricate SQL queries, uncovering valuable patterns, leading to a 20% enhancement in process effectiveness and a 20% increase in stakeholders' satisfaction.
- Analyzed and interpreted complex Sales datasets to identify trends, patterns, and opportunities for process improvement and cost optimization with a success rate of 90% in providing actionable insights to management and stakeholders.

Business Analyst, HCA Healthcare, USA March 2023 – April 2024

- Applied Waterfall methodologies to plan and execute project phases, ensuring adherence to budgets and timelines.
- Conceptualized Alteryx for data blending, preparation, and analysis time by 35%.
- Monitored and tracked key performance indicators (KPIs) post-launch, analyzing project performance against set benchmarks and recommending iterative improvements that helped in a 15% increase in user engagement.
- Conducted SWOT analysis and risk assessments to identify potential gaps and areas for improvement within existing processes.
- Developed a comprehensive go-to-market strategy, including pricing, distribution channels, and promotional activities to launch the project within 3 months of the project initiation.
- Facilitated generation of product requirement documents (PRDs), user stories, and specifications, ensuring clear and concise communication of project features and functionalities, leading to an improvement in user satisfaction by 20%.

Business Analyst, Experion Technologies May 2018 – September 2021

- Generated detailed documentation at each stage of the Waterfall model, ensuring clarity in project progress reports and adherence to predefined project phases.
- Crafted 5+ BRDs outlining business needs, objectives, and success criteria, providing a roadmap for project development and implementation, leading to an improvement in project clarity by 22%.
- Managed project resources within MS Project, tracking resource utilization, availability, and allocation, ensuring optimal resource distribution for project deliverables, and reducing resource-related delays by 15%.
- Collaborated with teams including engineers, designers, and marketers to document the process of conceptualization, design, and development of the wearable project, enhancing the project development cycle by 15%.
- Accompanied comprehensive cost/benefit analysis to assess the financial viability of projects, evaluating potential costs and benefits to aid decision-making processes and improved project ROI by 25%.
- Led in-depth market research to identify emerging trends, customer needs, and competitive landscapes, providing valuable insights for project development strategies, hence improving market positioning by 15%.
- Designed and implemented Power BI dashboards, transforming raw data into comprehensive visual reports for data-driven decision-making, refining reporting efficiency by 25%.
- Managed project tasks and tracked issues using Jira, ensuring project progress visibility and collaborating with teams via HP Quality Center for effective test management, thus reducing project bottlenecks by 30%.

EDUCATION

Master in Business Analytics (MS) , Trine University Angola, Indiana USA	May 2024 – Present
Master in Project Management (MS) , Northeastern University Boston, Massachusetts USA	September 2021 – April 2023
Bachelor in Electrical and Electronics Engineering (BS) , AKTU, Lucknow, India	September 2015 – May 2019
