EDUCATION

Masters in Computer and Information Sciences

Texas Tech University

Aug 2023 - May 2025

Lubbock, Texas

Bachelor of Technology in Computer Science

Geethanjali College of Engineering And Technology

Aug 2019 – Jun 2023

Hyderabad, India

TECHNICAL SKILLS

Language & Testing: Java, Python, C, SQL, JavaScript, HTML, CSS. **Python Libraries:** Numpy, Pandas, Matplotlib, PyTorch, Tensor-Flow. **Cloud:** AWS (S3, SQS, Glue, Lambda, Sagemaker, EMR, Kinesis), Microsoft Azure, Microsoft Purview. **Database:** SQL Server, MySQL, Mongo DB. **Tools and Technologies:** Docker, Kubernetes, Rest APIs, Git, Agile, SDLC, WaterFall, Jupyter, Eclipse, Visual Studio, Postman, Splunk, Linux, Unix, ElasticSearch, Kibana, GitLab.

EXPERIENCE

Machine Learning and Data Security Intern, **Symmetry Systems**, United States

May 2025 – Present

- Conducted in-depth research, collaborated with engineering and ML teams on product development, and supported customer interactions and endpoint security operations. Contributed to refining posture checks, improving UI, and integrating Microsoft Purview.
- Worked within the scope of enterprise-scale Generative AI adoption, focusing on Microsoft 365 Copilot. The aim was to assess and mitigate data exposure risks using Microsoft Purview's governance controls and Symmetry's proprietary ML models through a Data + AI lens.
- Delivered actionable insights that enhanced product functionality, improved data protection strategies, and supported secure GenAI integration. Strengthened internal security operations and helped guide the design of customer-facing solutions.

Machine Learning Intern, **Symmetry Systems**, United States

Feb 2025 – May 2025

- Collaborated with engineering teams to research data exposure risks in the context of enterprise Generative AI adoption; contributed to feature development, testing, documentation, and team knowledge sharing to support secure AI operationalization.
- Conducted hands-on risk analysis and AI governance assessments, delivering well-documented insights that informed key product enhancements and supported mitigation strategies using a Data + AI approach.

Associate Configurator, **Infiniqo**, Hyderabad, India

Aug 2022 – Dec 2022

- Developed foundational insurance domain expertise and executed hands-on pilot projects using no-code configuration tools, reducing development time by 40% and enhancing alignment with business requirements by 30%.
- Collaborated with cross-functional teams to implement practical insurance solutions, improving user adoption rates by 35% through streamlined workflows and enhanced application efficiency.

Intern, **Travancore Analytics Private Limited**, Kerala, India

April 2022 – May 2022

- Designed & Developed key features for the OCI Assessment Portal, enhancing user experience and efficiency by 35%.
- Conducted in-depth analysis of portal requirements, optimizing system performance and reducing response time by 40%.

PROJECTS

Evaluating Bias in Recruitment Systems Powered by Large Language Models

Jan 2025 – Mar 2025

- Analyzed gender, racial, and age biases in recruitment AI using Large Language Models (BERT, GPT-2, GPT-Neo) and supervised classification (WEAT).
- Achieved 70.93% accuracy with Random Forest; findings revealed significant gender and racial biases and minimal age-related bias, leading to proposed strategies for bias mitigation and ethical AI adoption in recruitment processes.

Alzheimer's Disease Detection Using Deep Learning

June 2024 – Aug 2024

- Developed a deep learning pipeline for early-stage Alzheimer's diagnosis using MRI brain scans; optimized CNN architectures (VGG-16, VGG-19, Inception V3, EfficientNet-B3) to classify stages of cognitive decline.
- Implemented advanced preprocessing techniques to enhance input quality, achieving improved diagnostic accuracy and efficiency, validated through standard evaluation metrics (accuracy, precision, recall, F1-score).

PUBLICATIONS

Forecast of Traffic Accidents Utilizing Deep Learning Ensemble Model

Oct 2024

9th International Conference on Technical Advancements in Computer Science and Engineering.

Criminality Data Scrutiny Using Logistic Regression Algorithm

June 2023

International Journal of Research - GRANTHAALAYAH.

Number Plate Detection System

Dec 2022

Gradiva Review Journal.

Stock Administration Framework Utilizing AWS

Oct 2022

International Journal of Scientific Research in Engineering and Management (IJSREM).
