

ABHIRAM SAINI

DATA ENGINEER

Email: abhiram.saini311@gmail.com Contact: 704-904-3564 Location: Birmingham, Alabama

SUMMARY

Experienced Data Engineer with around 3 years in designing and optimizing ETL pipelines and data storage solutions. Proficient in Python, Scala, R, and SQL, and skilled in using a diverse set of tools including Databricks, Snowflake, SSIS, and Apache Spark. Demonstrated ability to enhance data integration efficiency by 30% and improve performance by 20%. Experienced in developing interactive dashboards with Power BI and Tableau, and managing big data solutions using Hadoop, Kafka, and HDFS.

SKILLS

- **Programming Languages:** Python, Scala, R, SQL, Java
- **ETL Tools:** Databricks, Snowflake, SSIS, SSAS, Azure Data Factory, AWS Glue, GCP Dataflow, DBT.
- **Big Data Technologies:** Apache Spark, Hadoop, MapReduce, HDFS, Hive, Kafka, Airflow
- **Data Visualization and Reporting Tools:** Qlik Sense, Qlik View, Power BI, Tableau, Excel
- **Databases:** MySQL, PostgreSQL, MongoDB, MS SQL Server
- **Cloud Platforms:** Azure (Azure Synapse Analytics, Azure Data Lake), AWS (AWS S3, EC2, Lambda, EMR, Sage Maker), GCP (Google Big Query, Dataflow)
- **Tools:** Git, Jira, Confluence, Jupyter Notebook
- **Soft Skills:** Time Management, Communication, Team Collaboration

EXPERIENCE

PepsiCo

June 2024 – Current

Data Engineer

- Leveraged Apache Spark for distributed data processing and Spark SQL for querying, improving customer targeting accuracy by 30%.
- Engineered data ingestion workflows with Databricks and PySpark, consolidating data from various sources and enhancing coherence by 40%.
- Developed ETL pipelines using Azure Data Factory and Apache Airflow, integrating data from CRM and transactional databases, which improved data accuracy by 30%.
- Utilized Kafka for real-time data streaming and processing, ensuring timely data delivery and improving system responsiveness.
- Managed and optimized data storage solutions with AWS Redshift and Snowflake, reducing query execution times by 25% and improving data retrieval speed by 20%.
- Created and optimized interactive dashboards and reports in Power BI, using DAX for custom calculations, which improved decision-making efficiency by 35%.
- Collaborated with cross-functional teams to optimize ETL pipelines and ensure that data was available for analysis within tight deadlines, improving data freshness for daily reports.

Brightmind Technologies

January 2020 – August 2022

Data Engineer

- Automated data transformation with Python and Spark, reducing preparation time by 25%.
- Built complex SQL queries to aggregate sales data, enhancing sales forecasting accuracy by 20%.
- Employed Hive and HDFS for batch processing and large-scale data management, reducing query times by 20%.
- Generated comprehensive reports in Tableau, leveraging data blending and calculated fields to increase stakeholder satisfaction by 15%.
- Managed data warehousing with PostgreSQL and Google Big Query, optimizing SQL queries and partitioning strategies to improve query performance by 25%.
- Utilized GCP and Snowflake for scalable data warehousing, ensuring efficient data retrieval and concurrent query handling.
- Developed interactive visualizations and reports in Qlik Sense and Qlik View, using custom metrics to improve business strategy by 25%.

EDUCATION

Master of Science

University of Alabama, Birmingham

August 2022- April 2024

Bachelor of Technology

Kakatiya Institute of Technologies and Sciences, India

August 2018- May 2022
