

Abhiram Gelle

Atlanta, GA 30324, United States | +1 678-480-4408 | abhiramgelle738@gmail.com | [LinkedIn](#)

Summary

Experienced Java full stack Developer with hands on expertise in DevOps, delivering secure, scalable, and high performance applications. Proficient in Spring Boot, React, and Python, with strong experience in REST API design, cloud platforms, and CI/CD automation. Known for bridging development and operations to accelerate delivery and improve system reliability.

Education

Georgia State University | *Master's, Computer Science (GPA: 3.65/4)* **Aug 2024 - Present**

BML Munjal University | *Bachelor of Technology, Computer Science (GPA: 8.2/10)* **May 2018 - Apr 2022**

Skills

- **Technical Concepts:** Java, Python, OOP Concepts, Data Structures, OAuth, Authentication, Automation
- **Databases:** DynamoDB, SQL, PostgreSQL, MongoDB, Redis, Solr
- **Frontend Web Development:** React, Angular, Webpack, vite, JavaScript, HTML, CSS, TypeScript, Android, cordova
- **Backend Development:** Spring Boot, Flask, FastAPI, Object Oriented Programming, Rest APIs, JDBC
- **DevOps Tools:** Ansible, Docker, Kubernetes
- **Tools, Software, Technologies:** Jenkins, Argo CD, Jira, GitHub, Flutter, Grafana, Prometheus, Android Studio, Linux, SVN

Experience

Georgia State University | *Full stack developer [Graduate Research Assistant]* **Dec 2024 - Present**

Designed and developed the OGMS application using Python FastAPI and React, implementing RESTful APIs and handling AJAX requests for dynamic data updates.

- Integrated AG-Grid for high-performance data visualization and applied Tailwind CSS for responsive, user-friendly UI design.
- Designed and documented backend API endpoints with Swagger, ensuring clear communication between frontend and backend teams and reducing integration issues.

Global Payments Inc | *Software Engineer Intern* **Jun 2025 - Aug 2025**

Developed Java REST services for postal code distance calculations and integrated them into the Magnon API for fraud rule evaluations, improving fraud detection accuracy.

- Utilized SonarQube to monitor code quality, maintained 90%+ test coverage, and authored detailed API documentation for QA and operations teams.
- Automated end-to-end test suites for 5 fraud containers (AFC, PFC, AFL, TFL, AMEFL), reducing QA time by 50%.
- Applied AWS services (EC2, S3, DynamoDB) alongside Docker, Jenkins, and GitLab CI/CD to automate deployment workflows and improve release efficiency.

Optimal Health Solutions Pvt Ltd - MedPlus | *Software Engineer* **Jun 2022 - Jul 2024**

Developed full-stack enterprise applications using React, Spring Boot, and REST APIs, improving application performance and scalability.

- Created a reusable DataGrid component with advanced filtering, pagination, and sorting, boosting efficiency in data handling across all internal applications.
- Upgraded a Progressive Web App to React 18 with server-side rendering, streaming, and suspense APIs, improving page load times and user engagement.
- Enhanced build and deployment performance using Webpack and Vite, reducing build times and improving CI/CD workflows.
- Built a cross-platform native app using Apache Cordova, ensuring seamless compatibility for Android and iOS devices.

Hughes Systique Corporation | *Associate Software Engineer* **Jan 2022 - May 2022**

Automated CI/CD pipelines and enhanced deployment processes, improving release frequency and stability.

- Developed automation scripts leveraging Docker and Kubernetes for containerization and orchestration, reducing deployment times and improving operational reliability.

EAEISB Software Solutions | *Trainee Engineer, Internship* **May 2020 - Jul 2020**

Completed training in Angular and Spring Boot, gaining hands-on experience in full-stack development and contributing to a team project that improved application performance

Projects

GOO [Grab Online Order] | [\[GitHub Link\]](#) | *StartMeUp Nominations* **Nov 2020 - May 2021**

- Developed a Doordash style Android application for ordering from local restaurants and stores, enabling real-time order placement, seamless merchant management, and efficient delivery coordination.

Employee Management System | [\[GitHub Link\]](#) | *EAEISB Software Solutions* **May 2020 - Jul 2020**

- Designed and developed a web-based application for task tracking, team management, and leave approvals, improving workflow visibility and streamlining administrative processes.

Fly Easy | [\[Report Link\]](#) | *Bachelor's Final Year Project* **Jan 2021 - May 2021**

- Developed a machine learning-based web app that recommends top universities to students based on academic profiles, using FastAPI, Angular, MongoDB, and KNN algorithms.

Achievements

- **Wadhvani StartMeUp Award** | GOO App Development
- **40% Merit Scholarship** | For academic excellence
- **ICCCN 2022** | Presented Fly Easy project
