Summary

Software Engineer with 2+ years of experience building scalable, fault-tolerant backend systems using Java, Spring Boot, and AWS. Delivered secure, customer-facing APIs and microservices in agile environments. Strong in data-driven problem solving, CI/CD, and mentoring. Solved 190+ LeetCode problems focused on core DSA and earned 2024 & 2025 badges for consistent practice.

Education

The University of North Carolina at Charlotte

May 2025

Master of Science in Information Technology

Charlotte, NC

Relevant Coursework: Applied Database, App Development, Software System Design, Cloud Computing and Data Analysis

Savitribai Phule Pune University, India

May 2020

Bachelor of Engineering in Electronics and Telecommunications

India

Relevant Coursework: Data Structures and Algorithms, Database Systems, Operating Systems, IOT, Computer Networks

Work Experience

UNC Charlotte

Aug 2024 – May 2025

Graduate Teaching Assistant

Charlotte

- Contributed to course materials focused on **SDLC** concepts, **Agile methodology**, and **software engineering principles**; developed detailed rubrics with **10+** criteria to evaluate student projects.
- Mentored **150+** students on **Agile development**, **SDLC**, and **software architecture**; designed grading rubrics with **10+** technical criteria to evaluate scalability and design quality.

Accenture Solutions Pvt Ltd

Mar 2021 – June 2023

Application Development Analyst

India

- Engineered and deployed **5+ microservices** using **Java**, **Spring Boot**, and **Hibernate** for a banking client, enhancing transaction processing speed by **30%** while ensuring system scalability and maintainability.
- Optimized **SQL** queries and **Hibernate** mappings across high-volume services, resulting in a **25%** reduction in **database** response time and improved overall system throughput.
- Incorporated **CI/CD** pipelines with **Jenkins** and **GitHub** to automate build, test, and deployment processes, cutting manual release time by **40%** and improving deployment reliability.
- Implemented and secured **RESTful APIs** handling customer data and account management, achieving **99.99%** uptime and aligning with industry-grade authentication and authorization protocols.
- Led **Agile** sprints across cross-functional teams to deliver mission-critical banking features, reducing bugs by **35%** and accelerating deployment.

Projects

MyMusic Recommendation System | Python, Flask, Spotify API, Data Analytics

April 2025

- Engineered a scalable music recommendation engine using **Flask** and Spotify **API**, enhancing engagement with data-driven personalization and increasing retention by **35%**.
- Integrated **Spotify API** for real-time content and optimized request handling to enhance user experience.

Simple Text Extraction Tool | Python, Azure AI, RegEx, PyPDF2

December 2024

- Developed an automated tool for extracting structured text from documents, improving data processing speed by **40%**.
- Architected an intuitive interface for document review and added modular design and logging to streamline **debugging** and batch operations.

Weather Data Analytics | Python, SQL, MapReduce, HDFS

April 2024

- Processed **10M+** weather records using **Hadoop** and **Spark**, reducing missing data by **40%**.
- Identified and analyzed extreme weather events in **Spark** and **Hive**, achieving **95%** accurate region-level metrics.

Technical Skills

Concepts: Distributed Systems, Multi-threading, Object-Oriented Design, SDLC, Agile, REST APIs, CI/CD, Unit Testing

Languages: Java, Python, SQL, C++, JavaScript, TypeScript

Tools/Cloud: AWS, Docker, Kubernetes, Jenkins, Git, JIRA, Linux, HPQC

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, GraphQL
