+1 (313) 338 7929 | hireabhishek05@gmail.com | <https://www.linkedin.com/in/abhishek-hire>

Data Science and Supply Chain Analytics professional with 4 years of experience delivering impactful solutions across supply chain, healthcare, energy, and IT domains. Proven track record of leveraging tools like Excel, SAP(ERP), Power BI, SQL, Power Apps, Microsoft Access and Python to optimize sourcing strategies, automate workflows, and enhance visibility across the supply chain. Skilled in analyzing historical purchasing patterns, building predictive models, and developing dashboards that support strategic decision-making resulting in measurable outcomes. Strong foundation in data warehousing, data analysis and Lean methodologies, with a focus on continuous improvement and operational efficiency.

EXPERIENCE

Data Analyst (BASF | USA) Aug 2024 – Present

- Queried and filtered large SAP Procurement records using SQL to identify trends, support Direct Procurement and supplier data to resolve data inconsistencies to ensure high data quality and integrity.
- Conducted in-depth analysis of historical purchasing patterns using SAP data, optimizing datasets to streamline raw material bidding events and successfully achieved a 9% cost savings.
- Collected and analyzed key procurement data including MOQ, RFQ procedures, shelf life, lead time, trade names, and packaging specifications to support efficient sourcing and supply chain planning.
- Designed and developed a Power BI dashboard report for current supplier product portfolio, enabling tracking of raw material visibility and enhancing procurement insights for upcoming purchases.
- Developed an automated workflow using Power Apps, Excel, and Word to streamline supplier approval form mapping, significantly reducing manual effort and eliminating redundancy.

Data Analyst (Ecojiva LLC | USA) Feb 2024 - July 2024

- Managed the collection of daily solar generation data from diverse customer sites facilitating tracking and analysis.
- Designed a Power BI dashboard to analyze and visualize daily trends in solar energy generation and consumption, enabling data-driven insights for performance monitoring.
- Streamlined workflow automation using Excel VBA, Power Apps seamlessly integrating it into existing systems to enhance efficiency and reduce manual effort.

Data Analyst (NorthStar Care | USA) May 2023 - July 2023

- Queried patient records using SQL to identify and resolve data integrity issues, consolidating multiple patient IDs for readmitted patients.
- Identified key performance indicators (KPIs) such as PPS scale, shortness of breath, and weight loss as critical factors for hospice care classification, improving baseline accuracy to 86% using data-driven insights.
- Developed a predictive model utilizing the Histogram-based Gradient Boosting algorithm, achieving 86% accuracy in classifying hospice care readiness and enhancing decision-making processes for patient care.

Data Analyst (Cisco Systems | India) Nov 2021 - Jul 2022

- Analyzed and processed log files from over 200 network devices, working with large-scale datasets to identify patterns, anomalies, and performance bottlenecks, ultimately contributing to improved network efficiency.
- Utilized SolarWinds to monitor active network devices and complete Layer 2 and Layer 3 topology diagrams, ensuring accurate and up-to-date network datasets.
- Advised Python script that automated extraction of log files from over 200 network devices, reducing extraction time.

Jr Data Analyst (Manasavi Tech Solutions | India) Nov 2020 - Nov 2021

- Implemented robust data management strategies across 5+ projects, ensuring high-quality standards throughout data collection, cleaning, and analysis phases.
- Designed and developed 50+ interactive visuals in Power BI, delivering clear visual insights that boosted stakeholder's engagement and decision-making efficiency.

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL, R, VBA.

Data Visualization Tools: Tableau, Power BI.

Certifications: CCNA, Microsoft Azure Associate Data Engineer, LEAN Six Sigma (White Belt).

Cloud Platforms: AWS, Microsoft Azure

Software Tools: Jira, Power Apps, SAP (ERP), Excel, Word, Visio, Azure Data Bricks, SharePoint, Microsoft Access.

Area of Expertise: Machine Learning, Relational Databases, Statistics, Data Warehousing, Qualitative and Quantitative Analysis, Data Visualization, EDA Analysis, Data Analytics, Agile Methodology, SQL server, SSRS, Business Analytics, Supply Chain Analytics, LEAN Principles, DIMAC Methodology, DAX, ETL Process, SQL server, A/B Testing.

EDUCATION

Master's in Data Science & Business Analytics (Wayne State University | Detroit, MI) Aug 2022 - Dec 2023

Bachelor's in Computer Engineering (Pune University | India) Jun 2015 – Jul2020
