SUMMARY

AWS Certified Solutions Architect and Computer Science graduate student with expertise in full-stack development, cloud computing, and DevOps. Experienced in building scalable Spring Boot microservices and Angular apps, automating deployments with Docker and Kubernetes, and ensuring reliability through testing. Skilled in securing enterprise integrations, optimizing backend efficiency, and delivering production-ready solutions that enhance performance and support business workflows.

EXPERIENCE

Michigan State University | Graduate Teaching Assistant

Jan 2025 – May 2025

Course: Object-Oriented Software Development

Michigan

- Presented lectures to students on object-oriented principles, software design patterns, and coding best practices.
- Mentored students in Java OOP and algorithms during lab hours through personalized guidance.
- Led and coordinated Learning Assistants, optimizing lab scheduling and raising course pass rate by 30%.

Tata Consultancy Services | Software Developer

Jul 2021 – Dec 2023

Client: Equifax

India

- Architected and deployed Java microservices for Debt Monitoring, enabling real-time monitoring of loan applicants and improving decision accuracy for a leading U.S. credit bureau.
- Led the migration of microservices from Spring Boot 2 to 3 and Java 11 to 17, enhancing security, enabling modern RESTful APIs, and ensuring long-term platform stability.
- Deployed application to AWS using Kubernetes, automated with Jenkins CI/CD pipelines, achieving 99.99% uptime.
- Built interactive front-end in Angular using data binding and reusable components, enhancing responsiveness and user experience.
- Improved backend efficiency through Elasticsearch query optimization and caching, reducing database calls and API latency.
- Delivered critical features on schedule in Agile sprints, accelerating project milestones through cross-team collaboration.
- Achieved 95% test coverage with JUnit and Mockito, ensuring business logic correctness and minimizing production defects.

TECHNICAL SKILLS

Programming Languages:	Java, Python, C++, JavaScript, TypeScript, HTML, CSS
Frameworks and Libraries:	Spring Boot, Angular, React, Node.js, Django
Database:	SQL, PostgreSQL, MongoDB, Elasticsearch, Firebase
Cloud & DevOps:	AWS, GCP, Docker, Kubernetes, Jenkins, Git, Jira
Testing:	JUnit, Mockito, Jasmine, Karma

EDUCATION

Michigan State University

Jan 2024 – Dec 2025

Master of Science in Computer Science

Michigan

Gujarat Technological University

Aug 2017 – Jun 2021

Bachelor of Engineering in Computer Science

India

PROJECTS

Automated Alerting Service | Java, Spring Boot, Elasticsearch, Docker, Kubernetes

- Designed a cron microservice for a top U.S. Credit Bureau, automating data ingestion and validation, saving over 3 hours per day.
- Developed alerting pipelines with REST APIs and Docker, generating reports and automatically sending alert emails to stakeholders.

OCR Invoice System | Java, Spring Boot, Regex, Google API

- Built a Spring Boot tool for invoice generation with dual-OCR integration (Tesseract, Google Vision), boosting accuracy by 80%.
- Optimized a Regex-driven pipeline and REST API to generate structured PDF invoices within 2 seconds per request.

Full-Stack Search Engine | Angular, Spring Boot, JPA, MySQL

- Created a game search platform using UI routing and state management, enabling fast search and tracking for 2000+ games.
- Implemented Spring Boot REST APIs with JPA to ensure secure data persistence in user authentication and profile management.
