Data Analyst with 2+ years of experience and a Master's in Applied Data Analytics from Boston University. Skilled in SQL, Python, and BI tools, with proven success in translating complex data into actionable insights that drive revenue growth, optimize marketing campaigns, and improve operational efficiency. Experienced across media/advertising analytics and manufacturing data systems.

EDUCATION

Boston University – Boston, USA

Mar 2025

Master of Science in Applied Data Analytics

Thapar Institute of Engineering and Technology – Patiala, India

Jul 2019

Bachelor of Engineering, Electrical Engineering

EXPERIENCE

Data Analyst | Avanti Media Limited (TV100 News) – Chandigarh, India

Apr 2022 – Jul 2023

- Analyzed BARC weekly viewership data to identify peak audience windows; optimized ad slot recommendations that improved ROAS and drove **18% YoY revenue uplift**.
- Evaluated competitor AdEx data using SQL & Excel; calculated share of wallet (SOW) and built Tableau dashboards, highlighting missed opportunities and supporting sales in client acquisition.
- Synthesized audience and show performance data to identify high-TRP content, boosting ad fill rates and enabling targeted outreach to competitor advertisers.

Data Systems Analyst | Prachi International – Faridabad, India

Jan 2020 – Feb 2022

- Built Power BI dashboards on MySQL data to monitor KPIs such as order fulfillment and throughput, helping executives identify bottlenecks and improve efficiency.
- Conducted time-series anomaly detection in production data with Python, reducing defect rate by 12% and improving quality control.
- Improved sales forecasting accuracy by 22% through Excel-driven demand modeling.
- Migrated static Excel workflows into Tableau dashboards integrated with a data warehouse, enabling real-time monitoring.
- Optimized PL/SQL pipelines, **cutting query latency by 30%** and enhancing KPI reporting.

PROJECTS

- **Search Summarizer with AI Agents** – Search summarizer is a AI powered agent that takes query, fetches information and delivers a clear, structured summary with sources.
- **Predictive Analytics Models** – Developed classifiers (Logistic Regression, Decision Trees) in Python for liver disease and depressive disorder detection (**up to 85% accuracy**).
- **Data Warehousing & Dashboard Creation** – Designed star schema and Power BI dashboards for an electronic store, improving query speed and business decisions.
- **Airbnb Investment Dashboard** – Created Tableau dashboard analyzing pricing and demand trends across Seattle zip codes for investor insights.

TECHNICAL SKILLS

Programming & Data: **Python** (NumPy, Pandas, scikit-learn), **SQL** (MySQL, PL/SQL, BQ), **R**

Analytics & BI: **Tableau**, Power BI, Excel, Python

Frameworks & Tools: **AI Agents**

Specialties: **Data Warehousing**, Normalization, Forecasting, Anomaly Detection, Dashboard Automation, Marketing Analytics

Certificates: **Google Data Analytics**
