EDUCATION

University of Massachusetts Dartmouth

North Dartmouth, MA

M.S. in Data Science

Expected Graduation, Aug 2025

- **Concentrations:** Statistics, Advance ML & AI
- **GPA:** 3.86/4.00
- **Related Coursework:** Computer Graphics, Database Management, Advanced Machine Learning, Artificial Intelligence, Data Visualization, Statistics & Applications

Ajeenkya DY Patil University

Pune, MH, India

B.Tech. in Data Science

Aug 2018 - Aug 2022

- **Concentrations:** Statistics, Advance ML & AI
- **CGPA:** 8.9/10.00
- **Related Coursework:** Data Structures & Algorithms, JAVA, C, Database Management, Machine Learning, Artificial Intelligence, Data Visualization, Statistics

EXPERIENCE

UMass Dartmouth

New Bedford, MA

DS Research

Jan 2025 – Current

- Built full-stack CRM and inventory dashboards for KC Enterprises using Django, SQL, HTML/CSS, and REST APIs.
- Developed and deployed a Gen AI chatbot for healthcare users using Python, NLP, and Flask, integrating real-time sentiment analysis and user feedback loops.
- Built an explainable diabetes prediction platform using KNN, Random Forest, and XGBoost, with SHAP-based visual explanations.
- Integrated SQL and NoSQL (MongoDB) databases and deployed services using Docker and GitHub Actions on Azure.

Dexian Technologies

Pune, MH, India

US IT Trainee – Data & QA

Oct 2022 – Jun 2023

- Created Python and Java-based automation for data-driven QA pipelines across healthcare and fintech clients like Wells Fargo, Intuit, and Centene.
- Supported backend development and database integration in Django for job and candidate tracking applications.
- Delivered dashboards on Azure with PySpark, SQL, and Power BI to visualize recruitment insights and system metrics.

Verificent Technologies

Pune, MH, India

Data Analyst

Jan 2021 – Sept 2022

- Built full-stack dashboards with Django and Python to monitor proctoring systems, integrating QA testing and alert systems.
- Automated compliance reports using Jupyter Notebooks, improving operational response time by 80%.
- Assisted in designing scalable data models and refining anomaly detection using classical ML tools.

PROJECTS

- **Sentimental AI Assistant** – Built a real-time sentiment analysis app using HuggingFace Transformers and Streamlit. Deployed a conversational agent that detects and adapts responses to user emotions and mental health support.
- **AI Resume Screener with MLflow + SHAP:** Designed a smart resume screening tool that explains its decisions using SHAP, with model versioning and performance tracking via MLflow.
- **Olympics Data Visualization** – Interactive visual analytics using D3.js + Python backend, MLH Hackathon Winner, VIT
- **Diabetes Risk Research (Published)** – Study analyzing patient behavior using ML; published in IJIRCCCE, 2021.

CERTIFICATIONS

- CISCO Certified in Python Programming
- Microsoft Certified in Data Analysis
- HackerRank Python & SQL Gold Badge
- Generative AI for Data Analysis and Data Science by Dan

SKILLS

Languages/Tools: Python, Java, SQL, Power BI, Django, Flask, Streamlit, D3.js, HTML, CSS, C, C++

Testing/Frameworks: QA Automation, REST APIs, Git, Agile, Unit Testing

Platforms: Azure, PySpark, MongoDB, Bullhorn ATS, Excel (Advanced)
