CAREER SUMMARY

Full Stack Java Developer

Detail-oriented and results-driven Full Stack Java Developer with 5+ years of experience in designing, developing, and maintaining scalable web applications and enterprise solutions. Proficient in Java, Spring Boot, Hibernate, ReactJS, JavaScript, and Python with hands-on experience in Agile methodologies and modern software engineering practices. Strong problem-solving abilities, excellent communication skills, and a proven track record of delivering high-quality applications on time. Adept at working in collaborative team environments and independently.

AREAS OF EXPERTISE

- **Backend:** Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
- **Frontend:** ReactJS, JavaScript (ES6+), HTML5, CSS3
- **Programming:** Java, Python
- **Tools & Platforms:** Git, GitHub, Maven, Jenkins, JIRA, Postman
- **Database:** MySQL, PostgreSQL, Oracle
- **Cloud & DevOps:** AWS (EC2, S3), Docker (basic), CI/CD pipelines
- **Soft Skills:** Strong analytical thinking, effective communication, team collaboration, problem-solving, time management

PROFESSIONAL EXPERIENCE

AT&T | New Jersey, USA

Jan 2024 – Present

Full Stack Java Developer

- Spearheaded the design and development of a highly scalable customer support dashboard using Java, Spring Boot, ReactJS, and RESTful APIs, resulting in a 30% reduction in average response time and improved user satisfaction.
- Integrated external third-party APIs (e.g., payment gateway, CRM analytics) into a microservices-based backend, improving data synchronization and analytics in real-time.
- Optimized front-end application by implementing ReactJS advanced techniques such as dynamic component loading, React.memo, and code splitting, which enhanced performance and load time by 25%.
- Actively contributed in Agile ceremonies (daily stand-ups, sprint planning, retrospectives), collaborating cross-functionally with business analysts and testers to ensure timely and high-quality feature delivery.
- Implemented robust JWT-based authentication and role-based access control using Spring Security and OKTA, ensuring secure access and compliance with enterprise-grade authorization standards.
- Developed modular, reusable REST APIs for internal microservices, significantly reducing development effort for other teams by 25% through shared API consumption.
- Deployed backend services to AWS EC2 instances and integrated S3 buckets for data storage, resulting in enhanced scalability, availability, and disaster recovery capabilities.
- Ensured application quality by writing comprehensive unit and integration test cases using JUnit and Mockito, achieving over 90% code coverage and minimizing production defects.
- Mentored two junior developers through regular code reviews, pair programming, and design walkthroughs, promoting best coding practices and team knowledge sharing.
- Utilized Docker and Kubernetes to containerize and orchestrate services, reducing deployment issues and improving DevOps efficiency.
- Set up and monitored application logs using AWS CloudWatch and ELK Stack for real-time debugging and proactive issue detection.
- Created technical documentation including API contracts, deployment guides, and onboarding materials to support knowledge transfer and maintain project continuity.

Tata Consultancy Services | Hyderabad, INDIA

Jul 2021 – Aug 2022

Full Stack Java Developer

- Engineered customer onboarding modules for a major banking client using Spring Boot, Hibernate for ORM, and ReactJS for UI, reducing manual onboarding time by 40%.
- Developed interactive UI elements using React Hooks and Redux for state management, improving user engagement and reducing front-end bugs by 20%.
- Collaborated with QA and DevOps teams to streamline CI/CD pipelines using Jenkins, ensuring consistent build deployments and reducing release delays by 15%.
- Tuned complex SQL queries and optimized Hibernate mappings, achieving a 20% improvement in data retrieval and transaction performance.
- Integrated Python-based microservices for backend data analysis and automated reporting, enhancing the decision-making process with accurate insights.
- Actively participated in Agile sprints, requirement analysis, user story estimation, and sprint retrospectives, contributing to process improvements and better sprint velocity.
- Resolved high-priority production incidents, maintaining a 95% resolution rate within SLA by applying root cause analysis and real-time debugging techniques.
- Collaborated with UI/UX designers to refine user flows and ensure front-end components aligned with brand and accessibility standards.
- Developed internal tools for monitoring API response times and database performance metrics, allowing early identification of bottlenecks.

Full Stack Java Developer

- Architected and developed RESTful enterprise-grade web services using Java 11, Spring Boot, and Hibernate, catering to high-availability systems.
- Integrated REST APIs with dynamic front-end modules built in ReactJS, enhancing system interactivity and modularity across applications.
- Developed and executed unit, integration, and regression test cases using JUnit and Mockito, ensuring smooth and reliable product releases with minimal bugs.
- Utilized Git for source control and JIRA for issue tracking, facilitating transparent team collaboration and workflow management.
- Facilitated technical design meetings, providing architectural inputs and performance tuning recommendations that influenced product scalability.
- Improved application load times by 18% by applying code-splitting, lazy loading of components, and reducing bundle sizes through webpack optimizations.
- Configured Maven and Jenkins to automate builds and deployments across environments. This setup enabled faster feedback loops and reinforced continuous integration best practices.
- Collaborated with database administrators to analyze slow-performing queries. Implemented indexing strategies that significantly enhanced the performance of transaction-heavy workloads.
- Supported UAT and production release cycles by drafting detailed release notes and preparing deployment scripts. Also created rollback plans to ensure reliable and safe deployments.
- Maintained a library of reusable UI components and widgets for front-end development. This promoted code reuse and ensured consistent design standards across all modules.

National Small-Scale Industries | Hyderabad, INDIA**Apr 2019 – Aug 2020****Java Developer**

- Developed internal web tools and administrative dashboards using Java, JSP, and Spring MVC, enhancing internal workflow efficiency.
- Refactored and migrated legacy applications to Spring Boot microservices and upgraded UI components to ReactJS, modernizing the technology stack and reducing technical debt.
- Automated recurring data tasks using Python scripts to clean, transform, and load datasets, saving over 10 hours per week of manual processing.
- Conducted detailed discussions with business users to gather requirements and presented interactive demos to ensure alignment with expectations.
- Applied performance monitoring tools and proactive error tracking to reduce system crashes, resulting in a 35% improvement in uptime and reliability.
- Introduced multithreading in backend logic to handle concurrent data requests, significantly increasing application throughput and responsiveness.
- Coordinated with external vendors to troubleshoot integration issues with third-party systems. This ensured smooth and uninterrupted data exchange between platforms.
- Built robust user authentication modules using Spring Security. Incorporated role-based access control policies to enforce secure and granular user permissions.
- Managed database schema migrations and version control using Flyway. This ensured consistency, traceability, and reliability across development, staging, and production environments.
- Documented detailed system architecture diagrams and development workflows. These resources enabled faster onboarding and improved codebase understanding for future developers.

EDUCATION

- **Masters in Computer Science**
Purdue University Fort Wayne | Indiana, USA

Aug 2022 - Dec 2023
