PROFESSIONAL SUMMARY

Early-career data professional with experience supporting analytics, reporting, and data visualization in healthcare, higher education, and regulated research environments. Background includes SQL querying, data curation, dashboard development, and exploratory data analysis, with emphasis on accuracy, documentation, and clear stakeholder communication.

ANALYTICS SKILLS

Tools & Languages: SQL, Python, R, Excel, Power BI, Tableau

Foundations: Data cleaning, exploratory data analysis (EDA), basic statistics, data visualization, reporting, documentation

Systems (End-User): Veeva Vault, SharePoint, ComplianceWire, SAP, Banner (SIS), Microsoft Access, Epic (EHR), Meditech (EHR), GitHub

EXPERIENCE

Data Analyst Intern – LiftedViz | Jan 2026 – Present

Curate and prepare datasets for Tableau dashboards. Apply visualization standards to ensure clarity and consistency. Translate stakeholder questions into analytical outputs and iterate on dashboards based on feedback to improve usability.

Data Analyst – Walden University | Apr 2025 – Dec 2025

Supported institutional reporting using SQL. Assisted with data integration across Banner and internal sources. Helped develop Power BI dashboards for retention and cohort trends. Documented business logic to support data accuracy and governance.

Freelance Data Analyst | Oct 2023 – Present

Performed data cleaning, exploratory analysis, and reporting for healthcare and education clients. Built dashboards and summary deliverables to communicate insights under defined project scopes.

Research & Compliance Analyst – Various Contracts | Feb 2021 – Feb 2024

Supported research and regulatory operations in highly regulated environments. Used Veeva Vault, SharePoint, and ComplianceWire as an end user for document control and training compliance. Maintained SAP and Microsoft Access databases for audit readiness. Supported cross-functional teams during audits.

Medical Laboratory Technician – Trivergent Health Alliance | Jan 2018 – Jan 2021

Performed clinical laboratory testing in a regulated healthcare environment. Used Meditech EHR and Epic as an end user during system transition. Followed CLIA, HIPAA, and internal quality control procedures. Maintained accurate documentation to support patient safety and compliance.

EDUCATION

PhD, Data Science (In Progress) – National University

Completed Coursework: Principles of Data Science, Exploratory Data Analysis, Statistical Modeling, Predictive Analysis

MS, Data Analytics – Western Governors University

Coursework: Data Acquisition, Data Cleaning, Exploratory Data Analysis, Predictive Modeling, Data Mining I & II, Reporting, Capstone

BS, Health Science – Frostburg State University
