St. Louis, MO <https://www.linkedin.com/in/abinaykarnam9/>

SKILLS

- Programming Language: Python (ML, NLP), Data Mining, OOPS , R Language, SQL
- IDE: Visual Studio, Spyder, Pycharm, Pystudio, Jupyter Notebook, Atom, Anaconda
- Frameworks: Django, Flask
- Python Libraries: Pandas, Numpy, Scipy, Scikit-learn, Matplotlib, Seaborn, Beautiful-soup, Statsmodels, Pytables, Python-twitter, Urllib2, Booto, NLP, spaCy, TensorFlow, Keras
- Database: RDBMS Oracle, Mysql, SQL Server, PostgreSQL, NoSQL, MongoDB
- ETL Tools: SSIS, SSRS, Talend, Informatica
- DevOps Tools: Git, Github, PyBuilder, maven, Jenkins, Docker, Kubernetes
- Cloud Services: Amazon Web Services (AWS), Azure
- Monitoring & Messaging: Splunk, PyTesting, Unit Testing, Integration Testing, Selenium, Apache, Kafka, Rabbit
- Web Services: REST, Soap, Microservices
- Web & App Servers: Html5, Css3, Php, Xml, Angulars
- Web Analytics: Google Analytics 4, Google Tag Manager
- Application Servers: Apache Tomcat Server, WebLogic, WebSphere
- Statistical Techniques: Descriptive statistics, Exploratory Data Analysis (Eda), Null Hypothesis, Sampling, Resampling Methods, Hypothesis Testing, Confusion Matrix, T-test, Anova, Chi-square Test, Vif, Correlation, Feature Engineering / Feature Selection Techniques
- Visualization Tools: Tableau, Power BI, Excel, Looker Studio
- Soft Skills: Adaptable, Collaborative.

EXPERIENCE

Data Analyst

Accenture - Texas Medicaid Health Partnership (TMHP), Austin, Texas, US June 24 – August 24

- Collaborated with the Operations team to process and evaluate ideas submitted by Full-Time Employees (FTEs) to enhance operational efficiency and innovation within the Texas Medicaid and Health Partnership program.
- Utilized Excel, Python, Tableau, Power BI, and MySQL to analyze and streamline the idea submission and evaluation process, ensuring data-driven decision-making. Used MySQL for database management and querying to store, retrieve, and organize idea submissions and their corresponding evaluations and accomplished 90% accuracy in metrics.
- Automated data processing workflows, reducing turnaround time by 30% and developed interactive dashboards for providing actionable insights that supported data driven decision making for stake holders.
- Created dashboards and reports using Tableau and Power BI to track idea submissions, evaluate progress, and present actionable insights to stakeholders. Developed Python scripts and utilized PySpark for automating repetitive processes, reducing manual effort, and improving workflow efficiency.

- Built and managed data pipelines and optimized ETL processes to streamline data flow, enhancing operational efficiency and ensuring high-quality data for business analytics.

Data Analyst

Eclerx, Chandigarh, IN

June 2021 – August 2023

- Handled and processed large-scale datasets for Enterprise Rent-A-Car, ensuring data accuracy, consistency, and integrity through rigorous validation and cleaning processes using Python, R, and SQL.
- Utilized Excel, Python, and PySpark for data processing, transformation, and automation, and leveraged Tableau and Power BI to create interactive dashboards and visualizations for business insights.
- Managed and queried databases using MySQL, Oracle, and MongoDB, ensuring efficient data retrieval, storage, and management for business operations.
- Worked with proprietary tools tailored to the client's requirements, delivering customized and scalable solutions to meet their business needs.
- Designed and delivered insightful reports and visualizations using Tableau, Power BI, and Python libraries (Matplotlib, Seaborn, Bokeh), enabling the client to track key performance metrics, optimize processes, and make data-driven decisions.
- Automated repetitive workflows using Python and PySpark, significantly improving operational efficiency and reducing turnaround times.
- Conducted meticulous quality checks on data and reports to ensure accuracy, consistency, and alignment with client standards and expectations.
- Coordinated with internal teams and client stakeholders to gather requirements, address challenges, and ensure the timely delivery of high-quality outputs using collaboration tools like Jira, Confluence, and Slack.
- Applied Machine Learning techniques (XGBoost, SVR, Scikit-Learn) to build predictive models and generate actionable insights for business optimization.
- Deployed and managed solutions on Cloud Platforms (AWS, Azure) and utilized Docker for containerization, ensuring scalability and reliability.

Operations Analyst

Exploring Infinities (now Bhanzu), India

February 2021 – June 2021

- Collaborated with the development team to implement website features using HTML and MySQL, ensuring smooth user experience and efficient data management. Utilized web scraping for data extraction and analysis.
- Leveraged Python and Tableau to analyze data, create dashboards, and automate tasks, improving efficiency. Developed a Tableau dashboard for a marketing campaign that led to a 15% increase in lead conversions. Applied data mining to uncover insights from website data for better campaign targeting.
- Collaborated with business and tech teams to gather requirements and deliver solutions on time. Used data mining and web scraping to extract valuable insights from websites, supporting strategies to grow the business and engage customers.

EDUCATION

Master's in computer science

University of North Texas, Denton, Texas, 2024

3.66/4.0

Bachelor of Technology, Computer Science

Lovely Professional University, Punjab, India, 2021

7.1/10

CERTIFICATIONS

- Certified in Data Science by UpGrad
- Microsoft Power BI Associate as Certified Data Analyst.
- Google Data Analytics Professional Completed certification.
- AWS Cloud Practitioner certification.
