

Abishek Penigalapati | DevOps Engineer

VA, US | +1 (571) 479-0787 | abishek28061@gmail.com | [LinkedIn](#)

SUMMARY

DevOps Engineer with **4+ years of experience** improving deployment speed, reducing manual work, and supporting stable releases across multiple teams. Strong background in streamlining operations, maintaining release pipelines, and troubleshooting system issues during testing and production. Consistently reduced errors, reduced environment setup times, and helped teams deliver on faster release cycles. Known for documenting processes clearly and resolving deployment blockers quickly to keep sprint goals on track in high-paced development settings.

PROFESSIONAL EXPERIENCE

DevOps Engineer Feb 2025 - Current

BCBS, VA, USA

- Cut deployment time 85% by building GitLab CI/CD pipelines supporting 50+ microservices, integrating auto-rollback, environment variables, and pre-deploy checks in each job stage.
- Reduced AWS spend 45% by rearchitected infrastructure with Terraform, replacing underutilized EC2 instances and applying advised S3 lifecycle rules for cold storage.
- Simplified application uptime 70% by deploying Dockerized workloads to EKS with autoscaling, node health monitoring, and liveness/readiness probes.
- Shortened incident response from 90 to 25 minutes by integrating CloudWatch, Datadog, and Splunk dashboards with real-time alerts and logs.
- Passed all internal audits by enforcing IAM least-privilege roles and automating CloudTrail logging with secure access controls and encryption policies.
- Enabled zero-downtime deployments for production systems by designing blue-green rollout strategy in Kubernetes with route switching and rollback fallback.
- Reduced environment mismatches 50% by aligning local, test, and prod setups using Docker Compose, improving QA test coverage and developer feedback cycles.

Associate DevOps Engineer Aug 2020 - Aug 2023

CGI Group Inc., India

- Reduced manual provisioning time 60% by using Ansible to automate software setup, patching, and network configurations across 150+ Linux machines in dev and staging.
- Solved deployment success rate 55% by building Jenkins pipelines for GitLab repositories, adding rollback logic and conducted testing stages for each release.
- Prevented 30+ deployment delays monthly by using Bicep and YAML templates to provision Azure NSGs, VMs, and storage accounts in a repeatable, audit-friendly format.
- Lowered AKS container restarts 45% by optimizing Helm charts and resource allocation in Dockerfiles, reducing runtime crashes and latency.
- Accelerated root-cause analysis by 35% by implementing Azure Monitor dashboards with KQL alerts for performance spikes, memory leaks, and node failures.
- Decreased merge conflicts 40% by standardizing GitLab branch strategies and tagging policies across 20+ repositories used by multiple distributed development teams.

Junior DevOps Engineer Jun 2019 - Jul 2020

CGI Group Inc., India

- Reduced configuration time by 60% using Puppet to automate server setups, including user access, package installations, and environment variables for internal RedHat and Ubuntu systems.
- Improved local development reliability by creating Vagrant environments with VirtualBox, allowing new engineers to onboard in hours instead of days.
- Wrote YAML and JSON templates for container deployments on DC/OS, eliminating inconsistencies across staging and production environments.
- Arranged daily backup verification for Cassandra using Python scripts, increasing snapshot integrity confidence and reducing recovery validation time by 25%.
- Managed sprint boards and ticket queues in JIRA, helping track blockers and improving ticket resolution SLAs across the DevOps backlog.

EDUCATION

Master's in Computer Science Dec 2024

University of Illinois, Spring Field, IL, US

Bachelor's Computer Science Engineering May 2022

Sree Vidyanikethan Engineering College, Andhra Pradesh

CERTIFICATION

Ultimate AWS Certified SysOps Administrator - Associate 2021

Ultimate AWS Certified Developer - Associate 2021 - NEW

AWS Certified DevOps Engineer - Professional 2025 - DOP-C02

TECHNICAL SKILLS

- Continuous Integration Tools:** Jenkins, GITLAB
- Continuous Management Tools:** Ansible, Puppet
- Versioning Tools:** GIT, GITHUB, GITLAB
- Container Orchestration Tools:** Docker, Kubernetes, DC/OS, Mesosphere, Terraform
- Bug Tracking Tools:** JIRA, CA Rally
- Scripting:** Shell, YAML, JSON, Python, Bicep
- Virtualization Tools:** Vagrant, Oracle Virtual Box, Minikube
- Database:** Oracle, SQL Server, Cassandra, DynamoDB
- Operating System:** RedHat, Debian, Ubuntu, CentOS, Windows and OS X.
- Logging &Monitoring Tools:** Datadog, Splunk, Cloud watch, Azure Monitor
- Cloud Infrastructure:** AWS, Azure, GCP
- GIS Platforms:** Esri ArcGIS Enterprise
- AWS Services:** EC2, ELB, Eks, VPC, RDS, IAM, S3, AWS CLI, Trusted Advisor, CloudWatch, CloudTrail, SNS, SQS, EBS, Elastic Cache, ECS, Lambda, Glacier, Direct Connect, Storage Gateway, Transit Gateway IGW.
- Azure Services:** Azure (VMs, AKS, VNETs, NSGs, Azure Monitor, Azure Functions, Table Storage, Resource Groups)
