

ACHYUT SAI

LOCATION: Memphis, TN | **PHONE:** (731) 236-1539 | **EMAIL:** achyutsp20@gmail.com | [LinkedIn](#)

SUMMARY

- Data Analyst with 4+ years of experience in data analysis, machine learning, and data visualization.
- Strong proficiency in Python, SQL, and R for data analysis.
- Experienced in using Tableau, Power BI, and QlikView for data visualization and presenting actionable insights.
- Skilled in ETL processes and building data pipelines with Talend, Apache Airflow, AWS Glue, and Informatica.
- Expertise in database management using MySQL, MS SQL Server, PostgreSQL, MongoDB, and Firebase.
- Proficient in cloud technologies including AWS (EC2, S3, Redshift) and Google Cloud (Big Query).
- Experienced with machine learning frameworks such as TensorFlow, PyTorch, and Keras for predictive analytics.
- Strong foundation in data analysis libraries like Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, and XGBoost.
- In-depth understanding of data analysis methodologies, including supervised and unsupervised learning, model evaluation, and tuning.
- Solid analytical skills in data mining, data wrangling, statistical analysis, data cleansing, and text mining.
- Familiar with healthcare tools such as HIPAA, EMR, and EHR for handling sensitive patient data.
- Proficient with version control using Git and GitHub.
- Experienced in Agile, Waterfall, and Scrum methodologies for efficient project management and delivery.

SKILLS

- **Programming Languages:** Python, SQL, R
- **Data Analysis Tools:** Excel (Advanced: Pivot Tables, VLOOKUP, Power Query, VBA), R Studio, Jupyter, VS Code
- **Data Visualization:** Tableau, Power BI, QlikView
- **Databases:** MySQL, MS SQL Server, PostgreSQL, MongoDB, Firebase
- **Cloud Technologies:** AWS (EC2, S3, Redshift), Google Cloud (BigQuery)
- **ETL & Data Pipelines:** Talend, Apache Airflow, AWS Glue, Informatica
- **Machine Learning Tools:** TensorFlow, PyTorch, Keras, LLM
- **Data Analysis Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, XGBoost, Statsmodels
- **Version Control:** Git, GitHub
- **Data Analysis Skills:** Supervised & Unsupervised Learning, Predictive Learning, Neural Networks, Model Evaluation and Tuning, EDA
- **Methodologies:** Agile, Waterfall, Scrum
- **Analytical Skills:** Data Mining, Data Wrangling, Statistical Analysis, Data Cleansing, Text Mining
- **Healthcare Tools & Technologies:** HIPAA, EMR, HER
- **Enterprise Systems:** SAP, SAS

WORK EXPERIENCE

PPG Group

June 2023 – Present

Data Analyst

- Led the optimization efforts, leveraging machine learning models to forecast demand, optimize inventory, and reduce supply chain inefficiencies.
- Utilized Python and SQL to process and analyze large datasets from various sources, providing actionable insights for supply chain improvements.
- Implemented machine learning algorithms to predict inventory needs, reducing stockouts by 15% and improving overall inventory management.
- Developed and maintained real-time dashboards using Tableau to visualize key supply chain metrics and track performance.
- Collaborated with supply chain managers to identify key optimization areas, such as order fulfillment rates and transportation costs.
- Conducted root cause analysis on supply chain disruptions and provided data-driven recommendations to mitigate risks.
- Delivered insights that led to a 10% improvement in overall supply chain efficiency, optimizing resource allocation and reducing operational costs.

Trigent Software

July 2019 – July 2021

Data Analyst

- Led the development of a secure platform to ensure HIPAA compliance and protect sensitive patient data across various healthcare systems.
- Conducted thorough data analysis to identify potential security vulnerabilities in existing systems, making recommendations to improve data protection measures.
- Utilized SQL and Python to automate the extraction, cleaning, and transformation of healthcare data, ensuring compliance with regulatory standards.

- Designed and implemented data encryption protocols to ensure the confidentiality and integrity of healthcare data in storage and transmission.
- Collaborated with security teams to conduct risk assessments and implement corrective actions for any identified compliance gaps.
- Built real-time dashboards using Tableau to monitor data security metrics, helping the team identify potential risks and mitigate them promptly.
- Analyzed compliance metrics, reducing data breach incidents by 20% and improving the efficiency of security monitoring systems.
- Worked closely with healthcare professionals and IT teams to ensure the solution adhered to regulatory and industry best practices for data security.
- Created documentation and training materials to educate staff on new security protocols and compliance requirements.

Tatva Soft

May 2018 – May 2019

Data Analyst

- Led the integration of customer data from CRM, transactional, and social media databases to enhance targeted marketing efforts and improve customer segmentation.
- Utilized SQL to extract, clean, and transform data from disparate systems, ensuring consistent and accurate integration across platforms.
- Developed automated data pipelines using Python to streamline data flow between systems, reducing manual intervention and improving data accuracy.
- Performed data analysis to identify trends and patterns in customer behavior, helping marketing teams design more effective campaigns.
- Collaborated with cross-functional teams to understand data requirements and deliver business-driven insights.
- Created visualizations and reports using Tableau and Power BI, allowing stakeholders to make data-driven decisions in real-time.
- Improved customer segmentation and campaign targeting, resulting in a 15% increase in campaign conversion rates.

PROJECTS

Predictive Analytics for Healthcare Resource Allocation

- Applied machine learning models using Python and Scikit-learn to predict patient admission rates and optimize healthcare resource allocation.
- Developed real-time dashboards with Power BI to track resource utilization and help hospital management make data-driven staffing decisions.

Customer Segmentation for Marketing Optimization

- Utilized SQL and Pandas to clean and process customer data from various sources, performing clustering analysis to segment customers by behavior and demographics.
- Designed automated reports and data visualizations using Tableau to provide marketing teams with actionable insights for targeted campaigns.

EDUCATION

- **Master of Science in Computer Science**
California State University, Northridge, CA | **GPA: 3.7**
- **Bachelor of Science in Computer Science and Engineering**
Narasaraopet Engineering College – Narasaraopet, India

August 2021 – May 2023

July 2015 – May 2019
