## PROFESSIONAL SUMMARY

Business Analyst with expertise in requirements gathering, process improvement, and data-driven decision support. Skilled at bridging business needs with technical solutions through stakeholder collaboration, workflow analysis, and documentation. Experienced with SQL, Power BI, Excel, and Microsoft Azure to build reporting systems and dashboards that deliver actionable insights. Certified in UX & Visual Interface Design, applying a user-centered approach to system implementation and process optimization.

## SKILLS

- Business requirements gathering & documentation
- Stakeholder communication
- Data analysis & reporting
- Microsoft Azure, MS Project, Jira
- Process mapping & workflow analysis
- Business process improvement
- Power BI, Excel, SQL

## WORK HISTORY

- 04/2021 - Current  
**Intelligence Analyst**  
*Drug Enforcement Administration, Washington D.C. | Seattle, WA*
- Conducted **trend analysis and geospatial modeling** (heat maps, location data) to identify operational patterns and emerging risks.
  - Designed and maintained **Power BI dashboards and visualizations** that translated complex datasets into actionable insights for leadership.
  - Delivered **briefings and reports to U.S. and international stakeholders** (e.g., Thailand), aligning findings with strategic and operational goals.
  - Partnered with cross-functional teams to **gather requirements, document workflows, and perform forecasting** to support data-driven decision making.
- 08/2019 - 07/2020  
**Operations Project Coordinator**  
*CHARIS Counseling Associates, Vancouver, WA*
- Analyzed and documented clinical and administrative workflows to identify inefficiencies and requirements for improvement.
  - Built and implemented internal payroll and reporting tools that automated manual tasks and improved accuracy.
  - Partnered with leadership and staff to define business needs and implement new communication systems, enhancing cross-team coordination.
  - Produced process documentation and onboarding materials to ensure consistent adoption of new systems.
- 10/2018 - 07/2020  
**Front End Associate**  
*Costco Wholesale Corp, Vancouver, WA*

- Delivered fast, high-volume customer service while maintaining quality experience standards
- Managed inventory restocks, supported team operations, and helped train new hires
- Contributed to team efficiency and performance during peak business hours

---

## EDUCATION

06/2025    **Certification, UX & Visual Interface Design, *University of Washington, Professional & Continuing Education***, Seattle, WA

- Applied design thinking and user research to prioritize user needs, create personas, and structure content through information architecture
- Developed low- and high-fidelity prototypes in Figma to test usability, iterate on features, and refine layouts
- Designed interactive, accessible interfaces aligned with visual design best practices and inclusive design standards
- Leveraged Figma for wireframing, prototyping, and maintaining organized, scalable design systems

12/2017    **Bachelor of Arts, Multidisciplinary - Business & Nonprofit Mgmt, *University of Washington***, Tacoma, WA  
Minor in Nonprofit Studies

---

## INTERNSHIPS

**Program & Research Associate, Healthbridge Global, Tacoma, WA**

- Developed grant proposals supporting global health initiatives, aligning strategies with long-term program sustainability
- Partnered with leadership and international stakeholders to secure funding, including hospital construction in Romania
- Developed internal systems to track grants, streamline donor communications, and automate reporting workflows, improving efficiency and transparency
- Coordinated grant calendars, reporting schedules, and stakeholder engagement, improving transparency and long-term funding relationships

**Project & Operations Coordinator, RAIN (The Readiness Acceleration & Innovation Network) Tacoma, WA**

- Translated complex scientific innovations into funder-ready proposals and communications to advance cancer research
- Collaborated with scientists and leadership to align messaging with funding strategies and organizational priorities
- Improved grant tracking, documentation, and budgeting processes, increasing efficiency and cross-team coordination
- Secured funding for a MiSeq DNA Sequencer from The Norcliffe Foundation, expanding research capabilities
