Objective

Motivated by innovation. Experienced Professional with a technical skill set and a creative business oriented mind. Experience working in agile team. Constantly devoting time to study new concepts.

Skills

- Scrum, Kanban, Business Analysis, Requirements Gathering, Figma, Miro, Jira, Azure DevOps, Cloud (AWS), Data Analysis (Power BI, Tableau), NoSQL, Git, CI/CD, JavaScript, Typescript, Node.js, Angular

Work Experience

Business Systems Analyst, J. Becker Solutions

August 2022 - July 2023

- Coordinated strategic efforts with stakeholders and product owners to elicit requirements as epics, features, user stories and acceptance criteria for CarMax's Digital Modernization Initiative.
- Managed sprint planning, daily scrums, backlog refinement sessions, sprint review and sprint retrospectives of over 500 user story work items across cross-functional agile scrum teams.
- Orchestrated the scrum board process, prioritizing and shaping the product backlog, guided user acceptance testing, and tracked board movement to user story completion.
- Collaborated with cross-functional teams to conduct gap analysis on CarMax's Automation Tool, and acted as a subject matter to map 250+ printable forms to be electronic document generated.

Sr. Delivery Tech Arch Analyst, Accenture

Oct 2017 - Dec 2020

- Engineered and refactored REST APIs of two Accenture enterprise applications and explained functional programming to stakeholders and business leadership, in a clear and concise manner.
- Scaled Front and Back-end development, unit testing, and data integration to beat performance requirements and make code efficient, testable, and reproducible to other team members.
- Utilized Amazon Web Services to implement Microservices, RESTful APIs, and Serverless Architectures with AWS lambda, API Gateway, and DynamoDB.
- Designed and implemented data visualization dashboards using AWS Cloudwatch, enabling custom alarms with real-time insights and data-driven decision-making.

Delivery Tech Arch Analyst, Accenture

Oct 2015 - Dec 2017

- Performed comprehensive performance analysis on application platforms by executing SUTs, load tests, and code profiling. Identified critical issues, resulting in a ~10-15% performance increase by implementing targeted solutions.
- Automated the Octopus DevOps migration process for over 500 Accenture internal CIO teams using PowerShell scripts, streamlining the process and reducing manual effort by 99%, resulting in increased efficiency and accuracy.
- Delivered detailed documentation of over 75 API endpoints, usage metrics, and response times, facilitating performance changes to development teams

Education

BSc Business Information Systems
Illinois State University

Aug 2010 - Dec 2014

Certified ScrumMaster®
Scrum Alliance

Dec 2014
