EXPERIENCE

Research Assistant I

2023-2025

CPC Clinical Research, Remote

- Reduced protocol deviations by 30% through improved quality control tracking and reporting.
- Executed eTMF, record management and document upload for 30 plus clinical sites.
- Tracked and assessed clinical site study start up metrics via Salesforce, leading to acceleration of site activation by an average of 5 days.
- Oversaw study start-up activities, including metric and document tracking, resulting in an average of 2 clinical sites activated per week.

Quality Assurance Associate/ Adverse Event Reporting Officer

2023

Snow Companies, Remote

- Completed over 10 daily product safety adverse event forms via Salesforce, for any submitted health condition and/or medication/device malfunction.
- Collaborated with team and Compliance department to improve risk analysis and corrective actions as identified by internal review of Salesforce.
- Implemented changes to adverse event Salesforce workflow leading to 10% increase in efficiency rating.

Research Associate

2018-2019

Cleveland VA Medical Research & Education Foundation / Case Western Reserve University, Cleveland OH

- Enhanced data quality control, and data collection methods, via structured spreadsheet management.
- Analyzed and interpreted dataset trends, using Excel, leading to creation of descriptive reports for multiple AI diagnostic imaging oncology research studies.
- Streamlined data collection/submissions processes, ensuring 100% on-time submissions for a team of 8 post-doctoral researchers.
- Navigated multiple secondary analyses resources, including TCGA, NLST and EHR Epic Databases, extracting data on upwards of 15 variables, including nodule size and spiculation.

Clinical Research Oncology Data Specialist

2017-2018

University Hospitals, Cleveland OH

- Managed clinical trial data entry processes, including collection and documentation of adverse event data, for participants enrolled in hematology oncology clinical research studies.
- Executed case report form entry, review, and abstraction for up to 10 studies concurrently, while resolving multiple queries and data discrepancies.
- Provided timely and professional ongoing data entry of clinical trial data by identifying errors and inconsistencies of data in accordance with study submission.
